

Continuous Computing

Continuous Computing

Enabling NEPs to rapidly deploy carrier-class LTE, DPI & femtocell applications with reduced risk, cost & complexity.

Trillium Femtocell Access Point Solutions from Continuous Computing

- LTE, HSPA+, WCDMA, 2.5G, 2G
- Integrated reference implementations
- Optimized data & control plane SW
- Max performance, min footprint

“Texas Instruments & Continuous Computing provide a high-performance femtocell solution that enables NEPs to enter this exciting market quickly & cost-effectively.”

– Garrett Choi, VP Business Development, Continuous Computing
