

# Module 9

Activity: SysTick Timer

# Activity: SysTick Timer

## Question 1

Write a function that waits an integer number of seconds. You may use any of the SysTick functions. What is the maximum time this function can wait?

## Question 2

Write two functions that implement a stopwatch.

`Start()` will start the measurement and `Stop()` will return the elapsed time in bus cycles. You may assume the elapsed time is less than 349 ms. For example, consider this use case that measures the time it takes to execute `FunctionUnderTest()`

```
int main(void){ uint32_t time;
  Start();
  FunctionUnderTest();
  time = Stop(); // measures time to execute
  function
  while(1);
}
```

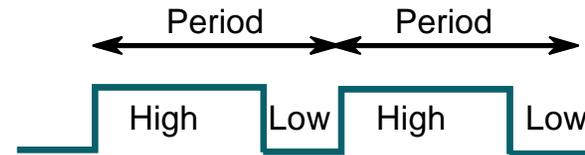

## Question 3

What happens if the user calls this function with `delay` equal to 0? What happens if the user calls this function with `delay` equal to 1?

```
void SysTick_Wait(uint32_t delay){
  SysTick->LOAD = (delay - 1);
  SysTick->VAL = 0;
  while(( SysTick->CTRL&0x00010000) == 0){};
}
```

## Question 4

A PWM system uses a 48 MHz clock to generate a 1 kHz wave. What is the precision of the system in alternatives and in binary bits?

## Question 5

A PWM system uses a 48 MHz clock and a 32-bit timer to generate a wave. What is the longest period that can be generated?

## Question 6

The Lab in this module uses a 1-us SysTick function with to generate a 100 Hz PWM wave. The H parameter varies from 100 to 9900. The LED1 on the LaunchPad is a LTST-C190CKT Digkey 160-1181-1-ND. Assume P1.0 output high voltage is 3.3V. The LED1 circuit uses a 470 ohm resistor in series with the LED. Assume the  $V_F, I_F$  set point of the LED is 1.65V and 3.5mA.

Part a) Derive a relationship between H parameter within the software and applied electrical power in watts delivered to the LED.

Part b) Assuming the LED is 100 % efficient (all electrical power in the LED is converted to optical power), what is the overall efficiency of the interface?, i.e., how much of the electrical power delivered by the microcontroller out P1.0 is converted to light?

Part c) How could you improve the efficiency of this interface? Hint: perform an internet search for “constant current led circuit”

## IMPORTANT NOTICE FOR TI DESIGN INFORMATION AND RESOURCES

Texas Instruments Incorporated ("TI") technical, application or other design advice, services or information, including, but not limited to, reference designs and materials relating to evaluation modules, (collectively, "TI Resources") are intended to assist designers who are developing applications that incorporate TI products; by downloading, accessing or using any particular TI Resource in any way, you (individually or, if you are acting on behalf of a company, your company) agree to use it solely for this purpose and subject to the terms of this Notice.

TI's provision of TI Resources does not expand or otherwise alter TI's applicable published warranties or warranty disclaimers for TI products, and no additional obligations or liabilities arise from TI providing such TI Resources. TI reserves the right to make corrections, enhancements, improvements and other changes to its TI Resources.

You understand and agree that you remain responsible for using your independent analysis, evaluation and judgment in designing your applications and that you have full and exclusive responsibility to assure the safety of your applications and compliance of your applications (and of all TI products used in or for your applications) with all applicable regulations, laws and other applicable requirements. You represent that, with respect to your applications, you have all the necessary expertise to create and implement safeguards that (1) anticipate dangerous consequences of failures, (2) monitor failures and their consequences, and (3) lessen the likelihood of failures that might cause harm and take appropriate actions. You agree that prior to using or distributing any applications that include TI products, you will thoroughly test such applications and the functionality of such TI products as used in such applications. TI has not conducted any testing other than that specifically described in the published documentation for a particular TI Resource.

You are authorized to use, copy and modify any individual TI Resource only in connection with the development of applications that include the TI product(s) identified in such TI Resource. NO OTHER LICENSE, EXPRESS OR IMPLIED, BY ESTOPPEL OR OTHERWISE TO ANY OTHER TI INTELLECTUAL PROPERTY RIGHT, AND NO LICENSE TO ANY TECHNOLOGY OR INTELLECTUAL PROPERTY RIGHT OF TI OR ANY THIRD PARTY IS GRANTED HEREIN, including but not limited to any patent right, copyright, mask work right, or other intellectual property right relating to any combination, machine, or process in which TI products or services are used. Information regarding or referencing third-party products or services does not constitute a license to use such products or services, or a warranty or endorsement thereof. Use of TI Resources may require a license from a third party under the patents or other intellectual property of the third party, or a license from TI under the patents or other intellectual property of TI.

TI RESOURCES ARE PROVIDED "AS IS" AND WITH ALL FAULTS. TI DISCLAIMS ALL OTHER WARRANTIES OR REPRESENTATIONS, EXPRESS OR IMPLIED, REGARDING TI RESOURCES OR USE THEREOF, INCLUDING BUT NOT LIMITED TO ACCURACY OR COMPLETENESS, TITLE, ANY EPIDEMIC FAILURE WARRANTY AND ANY IMPLIED WARRANTIES OF MERCHANTABILITY, FITNESS FOR A PARTICULAR PURPOSE, AND NON-INFRINGEMENT OF ANY THIRD PARTY INTELLECTUAL PROPERTY RIGHTS.

TI SHALL NOT BE LIABLE FOR AND SHALL NOT DEFEND OR INDEMNIFY YOU AGAINST ANY CLAIM, INCLUDING BUT NOT LIMITED TO ANY INFRINGEMENT CLAIM THAT RELATES TO OR IS BASED ON ANY COMBINATION OF PRODUCTS EVEN IF DESCRIBED IN TI RESOURCES OR OTHERWISE. IN NO EVENT SHALL TI BE LIABLE FOR ANY ACTUAL, DIRECT, SPECIAL, COLLATERAL, INDIRECT, PUNITIVE, INCIDENTAL, CONSEQUENTIAL OR EXEMPLARY DAMAGES IN CONNECTION WITH OR ARISING OUT OF TI RESOURCES OR USE THEREOF, AND REGARDLESS OF WHETHER TI HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES.

You agree to fully indemnify TI and its representatives against any damages, costs, losses, and/or liabilities arising out of your non-compliance with the terms and provisions of this Notice.

This Notice applies to TI Resources. Additional terms apply to the use and purchase of certain types of materials, TI products and services. These include; without limitation, TI's standard terms for semiconductor products (<http://www.ti.com/sc/docs/stdterms.htm>), [evaluation modules](#), and [samples](http://www.ti.com/sc/docs/sampterm.htm) (<http://www.ti.com/sc/docs/sampterm.htm>).
