

PMP4497 Test Results

1 General

1.1 PURPOSE

This report provides the detailed data and waveforms for evaluating and verifying the PMP4497. The PMP4497 is the 48V to 1.0V/40A DC-DC converter with the GaN module LMG5200 and the D-Cap+ controller TPS53632. It delivers up to 1.0V/40A output power. The converter could provide high efficiency with the good performance, which makes it an ideal choice for computer & server, FPGA and ASIC power supply. For testing applications, cooling airflow is required.

1.3 TEST EQUIPMENTS

Multi-meter: Fluke Multimeter 287C, Agilent 34401A

DC Source: TDK-Lambda

Oscilloscope: WaveSurfer 104Mxs-B
