TI's PCI Express Bridge Chip, the XIO2000A, is an industry first. It is designed for seamless migration from the legacy PCI to the PCI Express interface. It bridges an x1 PCI Express bus to a 32-bit, 33/66-MHz PCI bus capable of supporting up to six PCI devices downstream. The XIO2000A fully supports PCI Express rates of 2.5 Gbps. Its architecture supports the PCI 2.3 interface. The chip’s design enables PC and I/O add-on card manufacturers to begin transitioning to native PCI Express technology while preserving compatibility with existing PCI system software and firmware.

**Key Features**
- Compliant with PCI Express to PCI/PCI-X Bridge Specification, Revision 1.0
- Compliant with PCI Express Base Specification, Revision 1.0a
- Compliant with PCI Local Bus Specification, Revision 2.3
- Utilizes 100 MHz differential PCI Express Common Reference Clock or 125 MHz Single-Ended Reference Clock
- Full PCI Local Bus 66 MHz/32-bit Throughput
- Wake/Beacon Event Support
- Robust Architecture to Minimize Latency

**Key Benefits**
- Proven capability and interoperability with leading PCIe chipsets and plethora of PCI devices
- Built-in adaptive receiver equalizer
  - Improves jitter tolerance thereby reliably increasing PCB trace, or cable length, supported by the XIO2000A
- Seven buffered PCI clock outputs (33-MHz or 66-MHz)
  - Reduces external components and costs and saves valuable board space
- 32-bit secondary PCI bus with 33-MHz or 66-MHz clocking option
  - Customizes to meet the needs of high-performance or low-power applications
- Compact footprint (12mm x 12mm)
  - Allows placement in ExpressCard and mini-PCI cards in limited board space
- Advanced power management features
  - Software-programmable and hardware-autonomous power management features for low-power applications such as ExpressCard

▲ XIO2000A functional block diagram

▲ XIO2000A EVM
### Typical system implementation

**Upstream**
- PCI Express
- Vaux
- Auxiliary Power

**System Side**
- PCI Express Reference Clock
- Serial EEPROM
- Miscellaneous PCI Bus functions: CLR_RUN, PWR_OVRD, LOCK, M6_EN, PME, External Arbiter

**PCI Express Link**
- PCI Bus: 32 bit, 33/66 MHz

**Target Markets**
The XIO2000A meets the needs of multiple market segments, including:
- Desktop and mobile PC
- Server
- Storage
- PC add-in cards
- Embedded systems

IMPORTANT NOTICE

Texas Instruments Incorporated and its subsidiaries (TI) reserve the right to make corrections, modifications, enhancements, improvements, and other changes to its products and services at any time and to discontinue any product or service without notice. Customers should obtain the latest relevant information before placing orders and should verify that such information is current and complete. All products are sold subject to TI’s terms and conditions of sale supplied at the time of order acknowledgment.

TI warrants performance of its hardware products to the specifications applicable at the time of sale in accordance with TI's standard warranty. Testing and other quality control techniques are used to test the extent TI deems necessary to support this warranty. Except where mandated by government requirements, testing of all parameters of each product is not necessarily performed.

TI assumes no liability for applications assistance or customer product design. Customers are responsible for their products and applications using TI components. To minimize the risks associated with customer products and applications, customers should provide adequate design and operating safeguards.

TI does not warrant or represent that any license, either express or implied, is granted under any TI patent right, copyright, mask work right, or other TI intellectual property right relating to any combination, machine, or process in which TI products or services are used. Information published by TI regarding third-party products or services does not constitute a license from TI to use such products or services or a warranty or endorsement thereof. Use of such information may require a license from a third party under the patents or other intellectual property of the third party, or a license from TI under the patents or other intellectual property of TI.

Reproduction of TI information in TI data books or data sheets is permissible only if reproduction is without alteration and is accompanied by all associated warranties, conditions, limitations, and notices. Reproduction of this information with alteration is an unfair and deceptive business practice. TI is not responsible or liable for such altered documentation. Information of third parties may be subject to additional restrictions.

Resale of TI products or services with statements different from or beyond the parameters stated by TI for that product or service voids all express and any implied warranties for the associated TI product or service and is an unfair and deceptive business practice. TI is not responsible or liable for any such statements.

TI products are not authorized for use in safety-critical applications (such as life support) where a failure of the TI product would reasonably be expected to cause severe personal injury or death, unless officers of the parties have executed an agreement specifically governing such use. Buyers represent that they have all necessary expertise in the safety and regulatory ramifications of their applications, and acknowledge and agree that they are solely responsible for all legal, regulatory and safety-related requirements concerning their products and any use of TI products in such safety-critical applications.

TI products are neither designed nor intended for use in military/aerospace applications or environments unless the TI products are specifically designated by TI as military-grade or "enhanced plastic." Only products designated by TI as military-grade meet military specifications. Buyers acknowledge and agree that any such use of TI products which TI has not designated as military-grade is solely at the Buyer's risk, and that they are solely responsible for compliance with all legal and regulatory requirements in connection with such use.

TI products are neither designed nor intended for use in automotive applications or environments unless the specific TI products are designated by TI as compliant with ISO/TS 16949 requirements. Buyers acknowledge and agree that, if they use any non-designated products in automotive applications, TI will not be responsible for any failure to meet such requirements.
