AFE4410

SBAS832B – MAY 2017 – REVISED JULY 2019

AFE4410 Ultra-Small, Integrated AFE With FIFO for Wearable, Continuous Optical Heart-Rate Monitoring and Biosensing

1 Features

- Accurate, Continuous Heart-Rate Monitoring:
  - Up to 100-dB Dynamic Range for Accurate Heart-Rate Detection
  - Low Current for Continuous Operation on a Wearable Device With a Typical Value:
    - 30 µA for an LED, 25 µA for the Receiver
- Transmitter:
  - 4 LEDs in Common Anode Configurations
  - 8-Bit Programmable LED Current to 200 mA
  - Mode to Fire Two LEDs in Parallel
  - Programmable LED On-Time
  - Simultaneous Support of 3 LEDs for Optimized SpO_2, HRM, or Multiwavelength HRM
  - Average Current of 30 µA Adequate for a Typical Heart-Rate Monitoring Scenario:
    - 20-mA Setting, 60-µs Pulse Duration, 25-Hz Sampling Rate
- Receiver:
  - Supports 3 Time-Multiplexed PD Inputs
  - 24-Bit Representation of Current Input From PD in Two's-Complement Format
  - Individual DC Offset Subtraction DAC (Up to ±127-µA Range) at TIA Input for Each LED, Ambient
  - Digital Ambient Subtraction at ADC Output
  - Transimpedance Gain: 10 kΩ to 2 MΩ
  - Noise Filtering With Programmable Bandwidth
  - Receiver Operates at Approximately 1-µA/Hz Sampling Rate (Example, 25 µA at 25 Hz)
  - Hardware Power-Down Mode: Approximately 0-µA Current
- Flexible Pulse Sequencing and Timing Control
- Clocking Via External Clock or Internal Oscillator
- FIFO With 128-Sample Depth:
  - Programmable Partitioning Across Phases
- Pin-Selectable I^2C, SPI Interface
- Operating Temperature Range: –20°C to +70°C
- 2.6-mm × 2.1-mm, 0.4-mm Pitch DSBGA Package
- Supplies:
  - Tx: 3 V to 5.25 V
  - Rx: 1.8 V to 1.9 V (LDO Bypass), 2.0 V to 3.6 V (LDO Enabled)
  - IO: 1.7 V to Rx_SUP

2 Applications

- Optical Heart-Rate Monitoring (HRM) for Wearables, Hearables
- Heart-Rate Variability (HRV)
- Pulse Oximetry (SpO_2) Measurements
- Maximum Oxygen Consumption (VO_2 Max)

3 Description

The AFE4410 is an analog front-end for optical biosensing applications, such as heart rate monitoring (HRM). The device supports a maximum of four switching light-emitting diodes (LEDs) and a maximum of three photodiodes (PDs). The electrical current from the photodiode is converted into voltage by the transimpedance amplifier (TIA) and digitized using an analog-to-digital converter (ADC). The ADC code is stored in a 128-sample first-in, first-out block (FIFO) with programmable depth. The FIFO can be read out using either an I^2C interface or a serial peripheral interface (SPI). The AFE also has a fully integrated LED driver with 8-bit current control. The device has high dynamic range transmit-and-receive circuitry offering a dynamic range of up to 100 dB that enables accurate heart ratesensing. The AFE achieves extremely low current levels by operating an ultralow power (ULP) mode set by using the ENABLE_ULP register bit.

Device Information[1]

PART NUMBER	PACKAGE	BODY SIZE (NOM)
AFE4410	DSBGA (30)	2.60 mm × 2.10 mm

(1) For all available packages, see the package option addendum at the end of the datasheet.

5 Device and Documentation Support

5.1 Receiving Notification of Documentation Updates

To receive notification of documentation updates, navigate to the device product folder on ti.com. In the upper right corner, click on *Alert me* to register and receive a weekly digest of any product information that has changed. For change details, review the revision history included in any revised document.

5.2 Community Resources

The following links connect to TI community resources. Linked contents are provided "AS IS" by the respective contributors. They do not constitute TI specifications and do not necessarily reflect TI's views; see TI's Terms of Use.

TI E2E™ Online Community *TI's Engineer-to-Engineer (E2E) Community.* Created to foster collaboration among engineers. At e2e.ti.com, you can ask questions, share knowledge, explore ideas and help solve problems with fellow engineers.

Design Support *TI's Design Support* Quickly find helpful E2E forums along with design support tools and contact information for technical support.

5.3 Trademarks

E2E is a trademark of Texas Instruments.
All other trademarks are the property of their respective owners.

5.4 Electrostatic Discharge Caution

This integrated circuit can be damaged by ESD. Texas Instruments recommends that all integrated circuits be handled with appropriate precautions. Failure to observe proper handling and installation procedures can cause damage.

ESD damage can range from subtle performance degradation to complete device failure. Precision integrated circuits may be more susceptible to damage because very small parametric changes could cause the device not to meet its published specifications.
5.5 Glossary

SLYZ022 — *TI Glossary*.
    This glossary lists and explains terms, acronyms, and definitions.
6 Mechanical, Packaging, and Orderable Information

The following pages include mechanical, packaging, and orderable information. This information is the most current data available for the designated devices. This data is subject to change without notice and revision of this document. For browser-based versions of this data sheet, refer to the left-hand navigation.

PACKAGING INFORMATION

Orderable Device	Status (1)	Package Type	Package Drawing	Pins	Package Qty	Eco Plan (2)	Lead finish/ Ball material (6)	MSL Peak Temp (3)	Op Temp (°C)	Device Marking (4/5)	Samples
AFE4410YZR	ACTIVE	DSBGA	YZ	30	3000	RoHS & Green	SAC396 | SNAGCU	Level-1-260C-UNLIM	0 to 0	AFE4410	Samples
AFE4410YZT	ACTIVE	DSBGA	YZ	30	250	RoHS & Green	SAC396 | SNAGCU	Level-1-260C-UNLIM	-20 to 70	AFE4410	Samples

(1) The marketing status values are defined as follows:
ACTIVE: Product device recommended for new designs.
LIFEBUY: TI has announced that the device will be discontinued, and a lifetime-buy period is in effect.
NRND: Not recommended for new designs. Device is in production to support existing customers, but TI does not recommend using this part in a new design.
PREVIEW: Device has been announced but is not in production. Samples may or may not be available.
OBSOLETE: TI has discontinued the production of the device.

(2) **RoHS:** TI defines "RoHS" to mean semiconductor products that are compliant with the current EU RoHS requirements for all 10 RoHS substances, including the requirement that RoHS substance do not exceed 0.1% by weight in homogeneous materials. Where designed to be soldered at high temperatures, "RoHS" products are suitable for use in specified lead-free processes. TI may reference these types of products as "Pb-Free".
RoHS Exempt: TI defines "RoHS Exempt" to mean products that contain lead but are compliant with EU RoHS pursuant to a specific EU RoHS exemption.
Green: TI defines "Green" to mean the content of Chlorine (Cl) and Bromine (Br) based flame retardants meet JS709B low halogen requirements of <=1000ppm threshold. Antimony trioxide based flame retardants must also meet the <=1000ppm threshold requirement.

(3) MSL, Peak Temp. - The Moisture Sensitivity Level rating according to the JEDEC industry standard classifications, and peak solder temperature.

(4) There may be additional marking, which relates to the logo, the lot trace code information, or the environmental category on the device.

(5) Multiple Device Markings will be inside parentheses. Only one Device Marking contained in parentheses and separated by a "~" will appear on a device. If a line is indented then it is a continuation of the previous line and the two combined represent the entire Device Marking for that device.

(6) Lead finish/Ball material - Orderable Devices may have multiple material finish options. Finish options are separated by a vertical ruled line. Lead finish/Ball material values may wrap to two lines if the finish value exceeds the maximum column width.

Important Information and Disclaimer: The information provided on this page represents TI's knowledge and belief as of the date that it is provided. TI bases its knowledge and belief on information provided by third parties, and makes no representation or warranty as to the accuracy of such information. Efforts are underway to better integrate information from third parties. TI has taken and continues to take reasonable steps to provide representative and accurate information but may not have conducted destructive testing or chemical analysis on incoming materials and chemicals. TI and TI suppliers consider certain information to be proprietary, and thus CAS numbers and other limited information may not be available for release.

In no event shall TI's liability arising out of such information exceed the total purchase price of the TI part(s) at issue in this document sold by TI to Customer on an annual basis.
