DS34LV86T 3V Enhanced CMOS Quad Differential Line Receiver
Check for Samples: DS34LV86T

FEATURES
- Low Power CMOS Design (30 mW Typical)
- Interoperable With Existing 5V RS-422 Networks
- Industrial Temperature Range
- Meets TIA/EIA-422-B (RS-422) and ITU-T V.11 Recommendation
- 3.3V Operation
- ±7V Common Mode Range @ V_{ID} = 3V
- ±10V Common Mode Range @ V_{ID} = 0.2V
- Receiver OPEN Input Failsafe Feature
- Ensured AC Parameter:
  - Maximum Receiver Skew: 4 ns
  - Transition Time: 10 ns
- Pin Compatible With DS34C86T
- 32 MHz Toggle Frequency
- >6.5k ESD Tolerance (HBM)
- Available in SOIC Packaging

DESCRIPTION
The DS34LV86T is a high speed quad differential CMOS receiver that meets the requirements of both TIA/EIA-422-B and ITU-T V.11. The CMOS DS34LV86T features typical low static I_{CC} of 9 mA which makes it ideal for battery powered and power conscious applications. The Tri-State enables, EN, allow the device to be disabled when not in use to minimize power consumption. The dual enable scheme allows for flexibility in turning receivers on and off.

The receiver output (RO) is ensured to be High when the inputs are left open. The receiver can detect signals as low as ±200 mV over the common mode range of ±10V. The receiver outputs (RO) are compatible with TTL and LVCMOS levels.

(1) L = Logic Low  
H = Logic High  
X = Irrelevant  
Z = Tri-State  
† = Open, Not Terminated

These devices have limited built-in ESD protection. The leads should be shorted together or the device placed in conductive foam during storage or handling to prevent electrostatic damage to the MOS gates.

### ABSOLUTE MAXIMUM RATINGS(1)(2)

- **Supply Voltage ($V_{CC}$)**: +7 V
- **Enable Input Voltage (EN)**: +7 V
- **Receiver Input Voltage ($V_{ID}$: RI+, RI–)**: ±14 V
- **Receiver Input Voltage ($V_{CM}$: RI+, RI–)**: ±14 V
- **Receiver Output Voltage (RO)**: −0.5 V to $V_{CC}$ + 0.5 V
- **Receiver Output Current (RO)**: ±25 mA
- **Maximum Package Power Dissipation @ +25°C**: D Package 1190 mW
- **Derate D Package**: 9.8 mW/°C above +25°C
- **Storage Temperature Range**: −65°C to +150°C
- **Lead Temperature Range**: Soldering (4 Seconds) +260°C
- **ESD Ratings (HBM, 1.5k, 100 pF)**: Receiver Inputs and Enables ≥6.5 kV  
  Other Pins ≥2 kV

(1) Absolute Maximum Ratings are those values beyond which the safety of the device cannot be ensured. They are not meant to imply that the devices should be operated at these limits. The table of Electrical Characteristics specifies conditions of device operation.  
(2) If Military/Aerospace specified devices are required, please contact the Texas Instruments Sales Office/ Distributors for availability and specifications.

(1) All typicals are given for: V_CC = +3.3V, T_A = +25°C.
(2) Generator waveform for all tests unless otherwise specified: f = 1 MHz, Duty Cycle = 50%, Z_O = 50Ω, t_r ≤ 10 ns, t_f ≤ 10 ns.
(3) C_L includes probe and jig capacitance.
(4) t_{SK1} is the |t_{PHL} − t_{PLH}| of a channel.
(5) t_{SK2} is the maximum skew between any two channels within a device, on either edge.
(6) t_{SK3} is the difference in propagation delay times between any channels of any devices. This specification (maximum limit) applies to devices within V_CC ±0.1V of one another, and a Delta T_A = ±5°C (between devices) within the operating temperature range. This parameter is specified by design and characterization.
(7) All channels switching, output duty cycle criteria is 40%/60% measured at 50% Input = 1V to 2V, 50% Duty Cycle, t_r/t_f ≤ 5 ns. This parameter is ensured by design and characterization.

### Parameter Measurement Information

Generator waveform for all tests unless otherwise specified: f = 1 MHz, Duty Cycle = 50%, Z_O = 50Ω, t_r ≤ 10 ns, t_f ≤ 10 ns.
C_L includes probe and jig capacitance.

![Figure 2. Receiver Propagation Delay and Transition Time Test Circuit](image)
PARAMETER MEASUREMENT INFORMATION (continued)

Generator waveform for all tests unless otherwise specified: \( f = 1 \text{ MHz}, \) Duty Cycle = 50\%, \( Z_O = 50\Omega, \) \( t_r \leq 10 \text{ ns}, \) \( t_f \leq 10 \text{ ns}. \)

\( C_L \) includes probe and jig capacitance.

**Figure 3.** Receiver Propagation Delay and Transition Time Waveform

**Figure 4.** Receiver Tri-State Test Circuit

Generator waveform for all tests unless otherwise specified: \( f = 1 \text{ MHz}, \) Duty Cycle = 50\%, \( Z_O = 50\Omega, \) \( t_r \leq 10 \text{ ns}, \) \( t_f \leq 10 \text{ ns}. \)

\( C_L \) includes probe and jig capacitance.

**Figure 5.** Receiver Tri-State Output Enable and Disable Waveforms
TYPICAL APPLICATION INFORMATION

General application guidelines and hints for differential drivers receivers may be found in the following application notes:
AN-214 (SNLA137), AN-457 (SNLA148), AN-805 (SNOA233), AN-847 (SNLA031), AN-903 (SNLA034), AN-912 (SNLA036), AN-916 (SNLA219)

Power Decoupling Recommendations: Bypass caps must be used on power pins. High frequency ceramic (surface mount is recommended) 0.1 μF in parallel with 0.01 μF at the power supply pin. A 10 μF or greater solid tantalum or electrolytic should be connected at the power entry point on the printed circuit board.

---

(1) The marketing status values are defined as follows:

**ACTIVE:** Product device recommended for new designs.

**LIFEBUY:** TI has announced that the device will be discontinued, and a lifetime-buy period is in effect.

**NRND:** Not recommended for new designs. Device is in production to support existing customers, but TI does not recommend using this part in a new design.

**PREVIEW:** Device has been announced but is not in production. Samples may or may not be available.

**OBSOLETE:** TI has discontinued the production of the device.

(2) **RoHS:** TI defines "RoHS" to mean semiconductor products that are compliant with the current EU RoHS requirements for all 10 RoHS substances, including the requirement that RoHS substance do not exceed 0.1% by weight in homogeneous materials. Where designed to be soldered at high temperatures, "RoHS" products are suitable for use in specified lead-free processes. TI may reference these types of products as "Pb-Free".

**RoHS Exempt:** TI defines "RoHS Exempt" to mean products that contain lead but are compliant with EU RoHS pursuant to a specific EU RoHS exemption.

**Green:** TI defines "Green" to mean the content of Chlorine (Cl) and Bromine (Br) based flame retardants meet JS709B low halogen requirements of <=1000ppm threshold. Antimony trioxide based flame retardants must also meet the <=1000ppm threshold requirement.

(3) **MSL, Peak Temp. -** The Moisture Sensitivity Level rating according to the JEDEC industry standard classifications, and peak solder temperature.

(4) There may be additional marking, which relates to the logo, the lot trace code information, or the environmental category on the device.

(5) Multiple Device Markings will be inside parentheses. Only one Device Marking contained in parentheses and separated by a "~" will appear on a device. If a line is indented then it is a continuation of the previous line and the two combined represent the entire Device Marking for that device.

(6) **Lead/Ball Finish -** Orderable Devices may have multiple material finish options. Finish options are separated by a vertical ruled line. Lead/Ball Finish values may wrap to two lines if the finish value exceeds the maximum column width.

IMPORTANT NOTICE

Texas Instruments Incorporated (TI) reserves the right to make corrections, enhancements, improvements and other changes to its semiconductor products and services per JESD46, latest issue, and to discontinue any product or service per JESD48, latest issue. Buyers should obtain the latest relevant information before placing orders and should verify that such information is current and complete.

TI's published terms of sale for semiconductor products (http://www.ti.com/sc/docs/stdterms.htm) apply to the sale of packaged integrated circuit products that TI has qualified and released to market. Additional terms may apply to the use or sale of other types of TI products and services.

Reproduction of significant portions of TI information in TI data sheets is permissible only if reproduction is without alteration and is accompanied by all associated warranties, conditions, limitations, and notices. TI is not responsible or liable for such reproduced documentation. Information of third parties may be subject to additional restrictions. Resale of TI products or services with statements different from or beyond the parameters stated by TI for that product or service voids all express and/or implied warranties for the associated TI product or service and is an unfair and deceptive business practice. TI is not responsible or liable for any such statements.

Buyers and others who are developing systems that incorporate TI products (collectively, “Designers”) understand and agree that Designers remain responsible for using their independent analysis, evaluation and judgment in designing their applications and that Designers have full and exclusive responsibility to assure the safety of Designers' applications and compliance of their applications (and of all TI products used in or for Designers’ applications) with all applicable regulations, laws and other applicable requirements. Designer represents that, with respect to their applications, Designer has all the necessary expertise to create and implement safeguards that (1) anticipate dangerous consequences of failures, (2) monitor failures and their consequences, and (3) lessen the likelihood of failures that might cause harm and take appropriate actions. Designer agrees that prior to using or distributing any applications that include TI products, Designer will thoroughly test such applications and the functionality of such TI products as used in such applications.

TI’s provision of technical, application or other design advice, quality characterization, reliability data or other services or information, including, but not limited to, reference designs and materials relating to evaluation modules, (collectively, “TI Resources”) are intended to assist designers who are developing applications that incorporate TI products; by downloading, accessing or using TI Resources in any way, Designer (individually or, if Designer is acting on behalf of a company, Designer’s company) agrees to use any particular TI Resource solely for this purpose and subject to the terms of this Notice.

TI’s provision of TI Resources does not expand or otherwise alter TI’s applicable published warranties or warranty disclaimers for TI products, and no additional obligations or liabilities arise from TI providing such TI Resources. TI reserves the right to make corrections, enhancements, improvements and other changes to its TI Resources. TI has not conducted any testing other than that specifically described in the published documentation for a particular TI Resource.

Designer is authorized to use, copy and modify any individual TI Resource only in connection with the development of applications that include the TI product(s) identified in such TI Resource. NO OTHER LICENSE, EXPRESS OR IMPLIED, BY ESTOPPEL OR OTHERWISE TO ANY TECHNOLOGY, INTELLECTUAL PROPERTY RIGHT OF TI OR ANY THIRD PARTY IS GRANTED HEREIN, including but not limited to any patent right, copyright, mask work right, or other intellectual property right relating to any combination, machine, or process in which TI products or services are used. Information regarding or referencing third-party products or services does not constitute a license to use such products or services, or a warranty or endorsement thereof. Use of TI Resources may require a license from a third party under the patents or other intellectual property of the third party, or a license from TI under the patents or other intellectual property of TI.

TI RESOURCES ARE PROVIDED “AS IS” AND WITH ALL FAULTS. TI DISCLAIMS ALL OTHER WARRANTIES OR REPRESENTATIONS, EXPRESS OR IMPLIED, REGARDING RESOURCES OR USE THEREOF, INCLUDING BUT NOT LIMITED TO ACCURACY OR COMPLETENESS, TITLE, ANY EPIDEMIC FAILURE WARRANTY AND ANY IMPLIED WARRANTIES OF MERCHANTABILITY, FITNESS FOR A PARTICULAR PURPOSE, AND NON-INFRINGEMENT OF ANY THIRD PARTY INTELLECTUAL PROPERTY RIGHTS. TI SHALL NOT BE LIABLE FOR AND SHALL NOT DEFEND OR INDEMNIFY DESIGNER AGAINST ANY CLAIM, INCLUDING BUT NOT LIMITED TO ANY INFRINGEMENT CLAIM THAT RELATES TO OR IS BASED ON ANY COMBINATION OF PRODUCTS EVEN IF DESCRIBED IN TI RESOURCES OR OTHERWISE, IN NO EVENT SHALL TI BE LIABLE FOR ANY ACTUAL, DIRECT, SPECIAL, COLLATERAL, INDIRECT, PUNITIVE, INCIDENTAL, CONSEQUENTIAL OR EXEMPLARY DAMAGES IN CONNECTION WITH OR ARISING OUT OF TI RESOURCES OR USE THEREOF, AND REGARDLESS OF WHETHER TI HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES.

Unless TI has explicitly designated an individual product as meeting the requirements of a particular industry standard (e.g., ISO/TS 16949 and ISO 26262), TI is not responsible for any failure to meet such industry standard requirements.

Where TI specifically promotes products as facilitating functional safety or as compliant with industry functional safety standards, such products are intended to help enable customers to design and create their own applications that meet applicable functional safety standards and requirements. Using products in an application does not by itself establish any safety features in the application. Designers must ensure compliance with safety-related requirements and standards applicable to their applications. Designer may not use any TI products in life-critical medical equipment unless authorized officers of the parties have executed a special contract specifically governing such use. Life-critical medical equipment is medical equipment where failure of such equipment would cause serious bodily injury or death (e.g., life support, pacemakers, defibrillators, heart pumps, neurostimulators, and implantables). Such equipment includes, without limitation, all medical devices identified by the U.S. Food and Drug Administration as Class III devices and equivalent classifications outside the U.S.

TI may expressly designate certain products as completing a particular qualification (e.g., Q100, Military Grade, or Enhanced Product). Designers agree that it has the necessary expertise to select the product with the appropriate qualification designation for their applications and that proper product selection is at Designers’ own risk. Designers are solely responsible for compliance with all legal and regulatory requirements in connection with such selection.

Designer will fully indemnify TI and its representatives against any damages, costs, losses, and/or liabilities arising out of Designer’s non-compliance with the terms and provisions of this Notice.
