SN54ALS857 ... JT PACKAGE

SN74ALS857 . . . DW OR NT PACKAGE

SDAS170A – DECEMBER 1982 – REVISED JANUARY 1995

- Select True or Complementary Data
- Perform AND/NAND (Masking) of A or B Operand
- Cascadable to Expand Number of Operands
- Detect Zeros on A or B Operands
- 3-State Outputs Interface Directly With System Bus
- Package Options Include Plastic Small-Outline (DW) Packages, Ceramic Chip Carriers (FK), and Standard Plastic (NT) and Ceramic (JT) 300-mil DIPs

### description

The 'ALS857 are hextuple 2-line to 1-line multiplexers with 3-state outputs. The devices can provide either true (COMP low) or inverted (COMP high) data at the Y outputs. In addition, the 'ALS857 perform the logical AND function ( $A \bullet B$ ) and the clear function as well. The four modes of operation are:

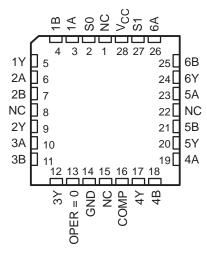

- Select A-data inputs
- Select B-data inputs
- AND A inputs with B inputs
- Clear

In either of the first two modes, OPER = 0 is high if all the selected A or B inputs are low. The six Y outputs and the OPER = 0 output are all 3-state and rated at 12-mA and 24-mA  $I_{OL}$  for the SN54ALS857 and SN74ALS857, respectively. All outputs can be placed in the high-impedance state by applying a high level to the COMP, S0, and S1 inputs simultaneously.

#### SN54ALS857 . . . FK PACKAGE (TOP VIEW)

OP

NC - No internal connection

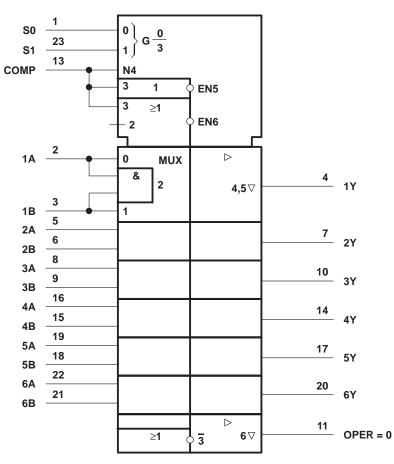

The SN54ALS857 is characterized for operation over the full military temperature range of  $-55^{\circ}$ C to  $125^{\circ}$ C. The SN74ALS857 is characterized for operation from 0°C to 70°C.

PRODUCTION DATA information is current as of publication date. Products conform to specifications per the terms of Texas Instruments standard warranty. Production processing does not necessarily include testing of all parameters.

SDAS170A - DECEMBER 1982 - REVISED JANUARY 1995

## logic symbol<sup>†</sup>

<sup>†</sup> This symbol is in accordance with ANSI/IEEE Std 91-1984 and IEC Publication 617-12. Pin numbers shown are for the DW, JT, and NT packages.

logic diagram (positive logic)

Pin numbers shown are for the DW, JT, and NT packages.

SDAS170A - DECEMBER 1982 - REVISED JANUARY 1995

### absolute maximum ratings over operating free-air temperature range (unless otherwise noted)<sup>†</sup>

Supply voltage, V <sub>CC</sub>	
Voltage applied to a disabled 3-state output	
Operating free-air temperature range, T <sub>A</sub> : SN54ALS857	
SN74ALS857	0°C to 70°C
Storage temperature range	–65°C to 150°C

<sup>†</sup> Stresses beyond those listed under "absolute maximum ratings" may cause permanent damage to the device. These are stress ratings only, and functional operation of the device at these or any other conditions beyond those indicated under "recommended operating conditions" is not implied. Exposure to absolute-maximum-rated conditions for extended periods may affect device reliability.

### recommended operating conditions

		SN54ALS857			SN	UNIT			
		MIN	NOM	MAX	MIN	NOM	MAX	UNIT	
VCC	Supply voltage	4.5	5	5.5	4.5	5	5.5	V	
VIH	High-level input voltage	2			2			V	
VIL	Low-level input voltage			0.7			0.8	V	
IOH	High-level output current			-1			-2.6	mA	
IOL	Low-level output current	12				24	mA		
TA	Operating free-air temperature	-55		125	0		70	°C	

### electrical characteristics over recommended operating free-air temperature range (unless otherwise noted)

	TEST CONDITIONS		SN	SN54ALS857			SN74ALS857			
PARAMETER	TEST G	TEST CONDITIONS		TYP <sup>‡</sup>	MAX	MIN	TYP‡	MAX	UNIT	
VIK	$V_{CC} = 4.5 V,$	lj = -18 mA			-1.5			-1.5	V	
	$V_{CC} = 4.5 V \text{ to } 5.5 V,$	$I_{OH} = -0.4 \text{ mA}$	V <sub>CC</sub> –2	2		V <sub>CC</sub> -2	2		V	
VOH		$I_{OH} = -1 \text{ mA}$	2.4	3.3						
	$V_{CC} = 4.5 V$	I <sub>OH</sub> = -2.6 mA				2.4	3.2			
Max	V <sub>CC</sub> = 4.5 V	I <sub>OL</sub> = 12 mA		0.25	0.4		0.25	0.4	V	
VOL		I <sub>OL</sub> = 24 mA					0.35	0.5	v	
IOZH	V <sub>CC</sub> = 5.5 V,	V <sub>O</sub> = 2.7 V			20			20	μA	
IOZL	V <sub>CC</sub> = 5.5 V,	V <sub>O</sub> = 0.4 V			-20			-20	μA	
lı	V <sub>CC</sub> = 5.5 V,	V <sub>I</sub> = 7 V			0.1			0.1	mA	
IIН	V <sub>CC</sub> = 5.5 V,	V <sub>I</sub> = 2.7 V			20			20	μΑ	
١L	V <sub>CC</sub> = 5.5 V,	V <sub>I</sub> = 0.4 V			-0.2			-0.2	mA	
١O§	V <sub>CC</sub> = 5.5 V,	V <sub>O</sub> = 2.25 V	-15		-70	-15		-70	mA	
	V 55V	Outputs high		11	24		11	24		
ICC	$V_{CC} = 5.5 V$ , See Note 1	Outputs low		16	33		16	33	mA	
		Outputs disabled		18	36		18	36		

<sup>‡</sup> All typical values are at V<sub>CC</sub> = 5 V, T<sub>A</sub> = 25°C.

§ The output conditions have been chosen to produce a current that closely approximates one half of the true short-circuit output current, IOS. NOTE 1: I<sub>CC</sub> is measured with all possible inputs grounded while achieving the stated output conditions.

t<sub>pd</sub> = t<sub>PLH</sub> or t<sub>PHL</sub>, t<sub>en</sub> = t<sub>PZH</sub> or t<sub>PZL</sub>, t<sub>dis</sub> = t<sub>PHZ</sub> or t<sub>PLZ</sub> For conditions shown as MIN or MAX, use the appropriate value specified under recommended operating conditions.

SDAS170A - DECEMBER 1982 - REVISED JANUARY 1995

NOTES: A. CL includes probe and jig capacitance.

- B. Waveform 1 is for an output with internal conditions such that the output is low except when disabled by the output control. Waveform 2 is for an output with internal conditions such that the output is high except when disabled by the output control.
  C. When measuring propagation delay items of 3-state outputs, switch S1 is open.
- D. All input pulses have the following characteristics: PRR  $\leq$  1 MHz, t<sub>r</sub> = t<sub>f</sub> = 2 ns, duty cycle = 50%.
- E. The outputs are measured one at a time with one transition per measurement.

SNJ54ALS857JT	Active	Production	CDIP (JT)   24	15   TUBE	No	SNPB	N/A for Pkg Type	-55 to 125	5962-8753301LA SNJ54ALS857JT

<sup>(1)</sup> **Status:** For more details on status, see our product life cycle.

<sup>(2)</sup> Material type: When designated, preproduction parts are prototypes/experimental devices, and are not yet approved or released for full production. Testing and final process, including without limitation quality assurance, reliability performance testing, and/or process qualification, may not yet be complete, and this item is subject to further changes or possible discontinuation. If available for ordering, purchases will be subject to an additional waiver at checkout, and are intended for early internal evaluation purposes only. These items are sold without warranties of any kind.

<sup>(3)</sup> RoHS values: Yes, No, RoHS Exempt. See the TI RoHS Statement for additional information and value definition.

<sup>(4)</sup> Lead finish/Ball material: Parts may have multiple material finish options. Finish options are separated by a vertical ruled line. Lead finish/Ball material values may wrap to two lines if the finish value exceeds the maximum column width.

(5) MSL rating/Peak reflow: The moisture sensitivity level ratings and peak solder (reflow) temperatures. In the event that a part has multiple moisture sensitivity ratings, only the lowest level per JEDEC standards is shown. Refer to the shipping label for the actual reflow temperature that will be used to mount the part to the printed circuit board.

<sup>(6)</sup> Part marking: There may be an additional marking, which relates to the logo, the lot trace code information, or the environmental category of the part.

Multiple part markings will be inside parentheses. Only one part marking contained in parentheses and separated by a "~" will appear on a part. If a line is indented then it is a continuation of the previous line and the two combined represent the entire part marking for that device.

**Important Information and Disclaimer:**The information provided on this page represents TI's knowledge and belief as of the date that it is provided. TI bases its knowledge and belief on information provided by third parties, and makes no representation or warranty as to the accuracy of such information. Efforts are underway to better integrate information from third parties. TI has taken and continues to take reasonable steps to provide representative and accurate information but may not have conducted destructive testing or chemical analysis on incoming materials and chemicals. TI and TI suppliers consider certain information to be proprietary, and thus CAS numbers and other limited information may not be available for release.

In no event shall TI's liability arising out of such information exceed the total purchase price of the TI part(s) at issue in this document sold by TI to Customer on an annual basis.
