Table 1: Revision

## 1 Purpose and Scope

In July 2016 the company Texas Instruments Incorporated assigned TÜV SÜD for testing and certification the Safety MCU TMS570LSx according to ASIL D of ISO 26262:2011 and SIL 3 of IEC 61508:2010. The project number related to these activities was: 717513322. The report on the certificate gives an overview related to the results of the certification process and the general safety relevant conditions and restrictions related to the use of the Safety MCU TMS570LSx.

## 2 Target of evaluation

### 2.1 Description

The target of evaluation is a generic safety microcontroller device based on the Hercules TMS570LSx and RM4x platform architecture. The assessment is based on a tailored safety lifecycle for safety elements out of context (SEooC) according to ISO 26262:2011 and compliant items according to IEC 61508:2010.

### 2.2 Identification

This report is valid for the silicon revision A. The models covered by the certificate are listed in the following table:

Orderable Part Number	Part Number
TMS5700914APGEQQ1	TMS570LS0914
TMS5700914APZQQ1	TMS570LS0914
TMS5700714APGEQQ1	TMS570LS0714
TMS5700714APZQQ1	TMS570LS0714
TMS5700914APGEQQ1R	TMS570LS0914
TMS5700914APZQQ1R	TMS570LS0914
TMS5700714APGEQQ1R	TMS570LS0714
TMS5700714APZQQ1R	TMS570LS0714

Table 1: Identification

## 3 Certification Requirements

### 3.1 Basis of Certification

The certification of the Safety MCU was performed according to the standards listed in clause 3.3 of this document. The basis of the certification was the successful completion of the following test segments:

- I. Functional Safety
  - Functional Safety management (FSM) and safety life-cycle
  - Avoidance of systematic faults
  - Hardware safety requirements (assumptions of use)
  - Analysis of the device structure (IP FMEAs, DFA)
  - Quantitative analysis of the hardware (FMEDA)
  - Fault injection and simulation
  - Hardware functional test and design verification
  - Hardware qualification
  - Development tool qualification
- II. Safety information in the product documentation (Safety manual, operating instructions)
- III. Product-related Quality Management in manufacturing

Certification is dependent on successful completion of all above listed test segments. The testing follows the basic certification scheme for Safety Components of TÜV SÜD Rail GmbH.

### 3.2 Certification Documentation

The detailed technical evaluation is documented in the technical report N° TH90322T.

### 3.3 Functional Safety

The testing for Functional Safety is to be performed using the following standards:

No.	Standard	Title
[N1]	IEC 61508-1: 2010 (SIL 3)	Functional safety of electrical/electronic/programmable electronic safety-related systems Part 1: General requirements
[N2]	IEC 61508-2: 2010 (SIL 3)	Functional safety of electrical/electronic/programmable electronic safety-related systems Part 2: Requirements for electrical/electronic/ programmable electronic safety-related systems
[N3]	ISO 26262-2:2011 (ASIL D)	Road vehicles — Functional safety — Part 2: Management of functional safety
[N4]	ISO 26262-5:2011 (ASIL D)	Road vehicles — Functional safety — Part 5: Product development at the hardware level

Table 2: Functional Safety

## 4 Results

### 4.1 Functional Safety

The tests performed and quality assurance measures implemented by the manufacturer have shown that the Safety MCU complies with the tailored testing criteria specified in clause 3.3. The Safety MCU provides different safety features implemented on-chip and requires additional safety mechanism to be implemented by the system integrator as software measures and external measures on system level. By using the different safety mechanisms the MCU can be used to support safety functions up to SIL 3 according to IEC 61508:2010 and ASIL D according to ISO 26262:2011.

### 4.2 General Conditions and Restrictions

The use of the Safety MCU shall comply with the current version of the safety relevant parts of the user documentation. The following list describes the main conditions and restrictions of use:

- The guidelines and requirements specified in the user documentation shall be followed. Especially the requirements of the system integration section of the Safety manual have to be regarded.
- The impact on the overall safety concept and the safety function has to be well understood and analysed if a safety mechanism described in the Safety manual is not used.
- All safety mechanism implemented by the system integrator have to be developed and verified according to the targeted safety standards
- All specific required characteristics and behaviour of the Safety MCU required by the final safety function have to be developed and verified according to the targeted safety standards. This includes also timing aspects like reaction times, test intervals or test execution times.
- The system integrator has to make sure that the conditions and restrictions defined in the documentation of the Safety MCU are understood and followed.

## 5 Certificate Number

This report defines conditions and restrictions required for the application of the Safety MCU to the certificate:

## IMPORTANT NOTICE FOR TI DESIGN INFORMATION AND RESOURCES

Texas Instruments Incorporated ("TI") technical, application or other design advice, services or information, including, but not limited to, reference designs and materials relating to evaluation modules, (collectively, "TI Resources") are intended to assist designers who are developing applications that incorporate TI products; by downloading, accessing or using any particular TI Resource in any way, you (individually or, if you are acting on behalf of a company, your company) agree to use it solely for this purpose and subject to the terms of this Notice.

TI's provision of TI Resources does not expand or otherwise alter TI's applicable published warranties or warranty disclaimers for TI products, and no additional obligations or liabilities arise from TI providing such TI Resources. TI reserves the right to make corrections, enhancements, improvements and other changes to its TI Resources.

You understand and agree that you remain responsible for using your independent analysis, evaluation and judgment in designing your applications and that you have full and exclusive responsibility to assure the safety of your applications and compliance of your applications (and of all TI products used in or for your applications) with all applicable regulations, laws and other applicable requirements. You represent that, with respect to your applications, you have all the necessary expertise to create and implement safeguards that (1) anticipate dangerous consequences of failures, (2) monitor failures and their consequences, and (3) lessen the likelihood of failures that might cause harm and take appropriate actions. You agree that prior to using or distributing any applications that include TI products, you will thoroughly test such applications and the functionality of such TI products as used in such applications. TI has not conducted any testing other than that specifically described in the published documentation for a particular TI Resource.

You are authorized to use, copy and modify any individual TI Resource only in connection with the development of applications that include the TI product(s) identified in such TI Resource. NO OTHER LICENSE, EXPRESS OR IMPLIED, BY ESTOPPEL OR OTHERWISE TO ANY OTHER TI INTELLECTUAL PROPERTY RIGHT, AND NO LICENSE TO ANY TECHNOLOGY OR INTELLECTUAL PROPERTY RIGHT OF TI OR ANY THIRD PARTY IS GRANTED HEREIN, including but not limited to any patent right, copyright, mask work right, or other intellectual property right relating to any combination, machine, or process in which TI products or services are used. Information regarding or referencing third-party products or services does not constitute a license to use such products or services, or a warranty or endorsement thereof. Use of TI Resources may require a license from a third party under the patents or other intellectual property of the third party, or a license from TI under the patents or other intellectual property of TI.

TI RESOURCES ARE PROVIDED "AS IS" AND WITH ALL FAULTS. TI DISCLAIMS ALL OTHER WARRANTIES OR REPRESENTATIONS, EXPRESS OR IMPLIED, REGARDING TI RESOURCES OR USE THEREOF, INCLUDING BUT NOT LIMITED TO ACCURACY OR COMPLETENESS, TITLE, ANY EPIDEMIC FAILURE WARRANTY AND ANY IMPLIED WARRANTIES OF MERCHANTABILITY, FITNESS FOR A PARTICULAR PURPOSE, AND NON-INFRINGEMENT OF ANY THIRD PARTY INTELLECTUAL PROPERTY RIGHTS.

TI SHALL NOT BE LIABLE FOR AND SHALL NOT DEFEND OR INDEMNIFY YOU AGAINST ANY CLAIM, INCLUDING BUT NOT LIMITED TO ANY INFRINGEMENT CLAIM THAT RELATES TO OR IS BASED ON ANY COMBINATION OF PRODUCTS EVEN IF DESCRIBED IN TI RESOURCES OR OTHERWISE. IN NO EVENT SHALL TI BE LIABLE FOR ANY ACTUAL, DIRECT, SPECIAL, COLLATERAL, INDIRECT, PUNITIVE, INCIDENTAL, CONSEQUENTIAL OR EXEMPLARY DAMAGES IN CONNECTION WITH OR ARISING OUT OF TI RESOURCES OR USE THEREOF, AND REGARDLESS OF WHETHER TI HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES.

You agree to fully indemnify TI and its representatives against any damages, costs, losses, and/or liabilities arising out of your non-compliance with the terms and provisions of this Notice.

This Notice applies to TI Resources. Additional terms apply to the use and purchase of certain types of materials, TI products and services. These include; without limitation, TI's standard terms for semiconductor products (<http://www.ti.com/sc/docs/stdterms.htm>), [evaluation modules](#), and [samples](http://www.ti.com/sc/docs/sampterm.htm) (<http://www.ti.com/sc/docs/sampterm.htm>).
