# Public policy

## Why it matters

We work with local, state and federal governments in the U.S. to advocate for policies that promote our growth, innovation and competitiveness. Educating policymakers about the implications of their decisions on our business is critical to advancing laws and regulations that help to sustain our long-term growth.

## Our approach

Our political activities and contributions reflect U.S. activity only. We belong to many [associations](#) with which we collaborate on various policy objectives. We are more active in some organizations than others, we do not work on all issues with every association and may not align on all positions. We also collaborate with other outside groups and coalitions to advance policies that drive growth, promote competitiveness and support our shareholders, customers, employees and the communities in which we operate.

## Our goals

Our objective is to educate local, state and U.S. policymakers about the implications of legislation and other policies on our business.

## Assessing our progress

The vice president of Worldwide Government Relations provides a written quarterly update of government relations activities and progress to our strategy leadership team and board of directors, and also makes a formal presentation annually to the board's Governance and Stockholders Relations Committee. This review covers priorities, results and political contributions. We adjust priorities and strategies as company needs or political realities warrant.

## For questions or concerns about public policy

Employees and other stakeholders can contact our vice president of Worldwide Government Relations or the TI Ethics Office with any questions, issues or concerns.
