

Application Report SLAA387–February 2008

# **Operating Environments for PCM2912 Applications**

Takeshi Nakamori

AIP - Consumer Audio Products

#### ABSTRACT

This article describes updated information about operating environments for which proper operation of the PCM2912 has been tested by TI.

# **Operating Environment**

For appropriate operation, one of these operating systems must be running on a host PC and equipped with a USB port certified by the manufacturer. If these condition are met, the operation of the PCM2912 does not depend on the CPU operating speed. Texas Instruments has tested and confirmed the listed operating systems. The PCM2912 may work with other PCs and operating systems also, but proper operation has not been tested and cannot be assured by TI.

# **Operating Systems**

- Microsoft<sup>™</sup> Windows<sup>™</sup> XP Home/Professional Japanese/English edition (For Windows XP, use the latest version of the USB audio driver available from the Windows Internet site, or apply Service Pack 1 or later. See the Q310507 white paper available from Microsoft.)
- Microsoft Windows Vista<sup>™</sup> Business 32-bit / 64-bit Japanese edition
- Apple Computer Mac OS<sup>™</sup> X 10.0 or later English edition
- Apple Computer Mac OS X 10.1 or later Japanese edition SP (For the Mac OS X 10.0 Japanese edition, plug and play does not work appropriately for USB audio devices.)

### **Related Documentation**

- PCM2912 Data Sheet (SLES216)
- DEM-PCM2912 EVM User's Guide(<u>SBAU132</u>)

1

# A PC-AT Compatible Computer Running a Required OS

- Motherboard using Intel<sup>™</sup> i915 chipset (using ICH6/R USB controller in the chipset)
- Motherboard using Intel i925 chipset (using ICH6/R USB controller in the chipset)
- Motherboard using Intel 915GM Express chipset (using the USB controller in the chipset)
- Motherboard using Intel 945GM chipset (using the USB controller in the chipset)
- Motherboard using Intel Q965 Express chipset (using the USB controller in the chipset)
  - **Note:** The PCM2912 has been acknowledged in a USB compliance test. However, the acknowledgment is for the PCM2912 device only, and does not apply to the customer's application system using the PCM2912. If the customer's application system requires a USB certification, this certification must be applied for separately by the customer, using the appropriate category USB-IF instructions. The testing environment is defined by the USB-IF and it can not be chosen by an applicant.

For further questions, contact the Consumer Audio Products, Product Marketing group at Telephone: +81-3-4331-2079 Email: audio-jp@list.ti.com

#### **IMPORTANT NOTICE**

Texas Instruments Incorporated and its subsidiaries (TI) reserve the right to make corrections, modifications, enhancements, improvements, and other changes to its products and services at any time and to discontinue any product or service without notice. Customers should obtain the latest relevant information before placing orders and should verify that such information is current and complete. All products are sold subject to TI's terms and conditions of sale supplied at the time of order acknowledgment.

TI warrants performance of its hardware products to the specifications applicable at the time of sale in accordance with TI's standard warranty. Testing and other quality control techniques are used to the extent TI deems necessary to support this warranty. Except where mandated by government requirements, testing of all parameters of each product is not necessarily performed.

TI assumes no liability for applications assistance or customer product design. Customers are responsible for their products and applications using TI components. To minimize the risks associated with customer products and applications, customers should provide adequate design and operating safeguards.

TI does not warrant or represent that any license, either express or implied, is granted under any TI patent right, copyright, mask work right, or other TI intellectual property right relating to any combination, machine, or process in which TI products or services are used. Information published by TI regarding third-party products or services does not constitute a license from TI to use such products or services or a warranty or endorsement thereof. Use of such information may require a license from a third party under the patents or other intellectual property of the third party, or a license from TI under the patents or other intellectual property of TI.

Reproduction of TI information in TI data books or data sheets is permissible only if reproduction is without alteration and is accompanied by all associated warranties, conditions, limitations, and notices. Reproduction of this information with alteration is an unfair and deceptive business practice. TI is not responsible or liable for such altered documentation. Information of third parties may be subject to additional restrictions.

Resale of TI products or services with statements different from or beyond the parameters stated by TI for that product or service voids all express and any implied warranties for the associated TI product or service and is an unfair and deceptive business practice. TI is not responsible or liable for any such statements.

TI products are not authorized for use in safety-critical applications (such as life support) where a failure of the TI product would reasonably be expected to cause severe personal injury or death, unless officers of the parties have executed an agreement specifically governing such use. Buyers represent that they have all necessary expertise in the safety and regulatory ramifications of their applications, and acknowledge and agree that they are solely responsible for all legal, regulatory and safety-related requirements concerning their products and any use of TI products in such safety-critical applications, notwithstanding any applications-related information or support that may be provided by TI. Further, Buyers must fully indemnify TI and its representatives against any damages arising out of the use of TI products in such safety-critical applications.

TI products are neither designed nor intended for use in military/aerospace applications or environments unless the TI products are specifically designated by TI as military-grade or "enhanced plastic." Only products designated by TI as military-grade meet military specifications. Buyers acknowledge and agree that any such use of TI products which TI has not designated as military-grade is solely at the Buyer's risk, and that they are solely responsible for compliance with all legal and regulatory requirements in connection with such use.

TI products are neither designed nor intended for use in automotive applications or environments unless the specific TI products are designated by TI as compliant with ISO/TS 16949 requirements. Buyers acknowledge and agree that, if they use any non-designated products in automotive applications, TI will not be responsible for any failure to meet such requirements.
