Dear Customer:

Thank you for purchasing the TVP7000 Evaluation Module (EVM) from Texas Instruments.
This EVM kit allows you to easily evaluate the TVP7000 triple 8/10 bit video and graphics digitizer with analog PLL for use in your application. The enclosed CD-ROM provides detailed information and software for your TVP7000EVM.

Below is a list of the items included with your TVP7000EVM:

- TVP7000 Board
- THS8200 Board
- Parallel Port Cable
- 5V, 3A Universal Power Supply
- CDROM with TVP7000 Data Manual, TVP7000EVM User's Guide, TVP7000EVM Schematics, WinVCC4 application software and PortNT.exe.

The THS8200 board included with the TVP7000EVM will generate analog, YPbPr or RGB outputs.

If digital outputs are required, the TFP410EVM, a DVI transmitter board, may be purchased as a daughter card for use with the TVP7000 board.

Please install Port95NT.exe before using the WinVCC4 application software.

If you have any questions regarding the TVP7000, the TVP7000EVM or the WinVCC4 application software, contact Texas Instruments product information center at (972) 644-5580.

IMPORTANT NOTICE

Texas Instruments Incorporated and its subsidiaries (TI) reserve the right to make corrections, modifications, enhancements, improvements, and other changes to its products and services at any time and to discontinue any product or service without notice. Customers should obtain the latest relevant information before placing orders and should verify that such information is current and complete. All products are sold subject to TI's terms and conditions of sale supplied at the time of order acknowledgment.

TI warrants performance of its hardware products to the specifications applicable at the time of sale in accordance with TI's standard warranty. Testing and other quality control techniques are used to the extent TI deems necessary to support this warranty. Except where mandated by government requirements, testing of all parameters of each product is not necessarily performed.

TI assumes no liability for applications assistance or customer product design. Customers are responsible for their products and applications using TI components. To minimize the risks associated with customer products and applications, customers should provide adequate design and operating safeguards.

TI does not warrant or represent that any license, either express or implied, is granted under any TI patent right, copyright, mask work right, or other TI intellectual property right relating to any combination, machine, or process in which TI products or services are used. Information published by TI regarding third-party products or services does not constitute a license from TI to use such products or services or a warranty or endorsement thereof. Use of such information may require a license from a third party under the patents or other intellectual property of the third party, or a license from TI under the patents or other intellectual property of TI.

Reproduction of information in TI data books or data sheets is permissible only if reproduction is without alteration and is accompanied by all associated warranties, conditions, limitations, and notices. Reproduction of this information with alteration is an unfair and deceptive business practice. TI is not responsible or liable for such altered documentation.

Resale of TI products or services with statements different from or beyond the parameters stated by TI for that product or service voids all express and any implied warranties for the associated TI product or service and is an unfair and deceptive business practice. TI is not responsible or liable for any such statements.
