

**DecaBDE Statement  
Texas Instruments Semiconductor Products**

As of June 30, 2008 the Decabromodiphenyl ether (DecaBDE) exemption referenced in European Commission Decision of 13 October 2005 (2001/717/EC), will no longer be valid as a EU RoHS exemption. In response to the removal of this exemption, Texas Instruments (TI) would like to convey to its customers that TI integrated circuits do not contain DecaBDE. This information represents TI's knowledge and belief as of the date that is provided. TI bases its material content knowledge on information provided by third parties and has taken and continues to take commercially reasonable steps to provide representative and accurate information, but may not have conducted destructive testing or chemical analysis on incoming materials and chemicals.

Sincerely,

A handwritten signature in black ink, appearing to read "Randy Rath".

Randy Rath  
TI SC Product Stewardship

**Important Warranty and Disclaimer Information**

TI bases its material content knowledge on information provided by third parties and has taken and continues to take reasonable steps to provide representative and accurate information, but may not have conducted destructive testing or chemical analysis on incoming materials and chemicals. TI and TI suppliers consider certain information to be proprietary, and thus CAS numbers and other limited information may not be available for release. TI provides an exclusive warranty for certain material content representations in the Material Declaration Certificate for Semiconductor Products, which can be found at [www.ti.com/leadfree](http://www.ti.com/leadfree). All other material content information is provided "as is."

In some cases, TI components may be promoted specifically to facilitate safety-related applications. With such components, TI's goal is to help enable customers to design and create their own end-product solutions that meet applicable functional safety standards and requirements. Nonetheless, such components are subject to these terms.

No TI components are authorized for use in FDA Class III (or similar life-critical medical equipment) unless authorized officers of the parties have executed a special agreement specifically governing such use.

Only those TI components which TI has specifically designated as military grade or "enhanced plastic" are designed and intended for use in military/aerospace applications or environments. Buyer acknowledges and agrees that any military or aerospace use of TI components which have **not** been so designated is solely at the Buyer's risk, and that Buyer is solely responsible for compliance with all legal and regulatory requirements in connection with such use.

TI has specifically designated certain components as meeting ISO/TS16949 requirements, mainly for automotive use. In any case of use of non-designated products, TI will not be responsible for any failure to meet ISO/TS16949.

## Products

Audio	<a href="http://www.ti.com/audio">www.ti.com/audio</a>
Amplifiers	<a href="http://amplifier.ti.com">amplifier.ti.com</a>
Data Converters	<a href="http://dataconverter.ti.com">dataconverter.ti.com</a>
DLP® Products	<a href="http://www.dlp.com">www.dlp.com</a>
DSP	<a href="http://dsp.ti.com">dsp.ti.com</a>
