

SN10KHT5542, SN10KHT5543 OCTAL TTL-TO-ECL TRANSLATORS WITH OUTPUT ENABLE

SDZS001A – D3136, AUGUST 1988 – REVISED DECEMBER 1988

- 10KH Compatible
- ECL and TTL Control Inputs
- P-N-P Inputs Reduce DC Loading
- Flow-Through Architectures Optimizes PCB Layout
- Center Pin VCC, VEE and GND Configurations Minimize High-Speed Switching Noise
- ESD Protection Exceeds 2000 V Per MIL-STD-883C, Method 3015
- Package Options Include "Small Outline" Packages and Standard Plastic 300-mil DIPs

DW OR NT PACKAGE
(TOP VIEW)

description

These octal TTL-to-ECL translators are designed to provide efficient translation between a TTL signal environment and a 10KH ECL signal environment. The designer has a choice of inverting ('5542) or true ('5543) outputs. Two pins, $\overline{OE}1$ and $\overline{OE}2$, are provided for output enable control. These control inputs are negative ANDed together, with $\overline{OE}1$ being ECL compatible and $\overline{OE}2$ being TTL compatible. This offers the choice of controlling the outputs of the device from either a TTL or ECL signal environment. The outputs, when disabled, go to a normal ECL logic low level.

The SN10KHT5542 and SN10KHT5543 are characterized for operation from 0°C to 75°C.

FUNCTION TABLE

OUTPUT CONTROL		DATA INPUT	OUTPUT	
$\overline{OE}1$	$\overline{OE}2$	A	'5542	'5543
H	X	X	L	L
X	H	X	L	L
L	L	L	H	L
L	L	H	L	H

logic symbols†

†These symbols are in accordance with ANSI/IEEE Std 91-1984 and IEC Publication 617-12.

SN10KHT5542, SN10KHT5543
OCTAL TTL-TO-ECL TRANSLATORS WITH OUTPUT ENABLE

SDZS001A – D3136, AUGUST 1988 – REVISED DECEMBER 1988

logic diagrams (positive logic)

absolute maximum ratings over operating ambient temperature range (unless otherwise noted)[†]

Supply voltage range, V_{CC}	–0.5 V to 7 V
Supply voltage range, V_{EE}	–8 V to 0 V
Input voltage range (TTL) (See Note 1)	–1.2 V to 7 V
Input voltage range (ECL)	V_{EE} to 0 V
Input current range (TTL)	–30 mA to 5 mA
Operating ambient temperature range	0°C to 75°C
Storage temperature range	–65°C to 150°C

[†]Stresses beyond those listed under “absolute maximum ratings” may cause permanent damage to the device. These are stress ratings only and functional operation of the device at these or any other conditions beyond those indicated under “recommended operating conditions” is not implied. Exposure to absolute-maximum-rated conditions for extended periods may affect device reliability.
NOTE 1: The input voltage ratings may be exceeded provided the input current ratings are observed.

recommended operating conditions (see Note 2)

		MIN	NOM	MAX	UNIT
V_{CC}	TTL supply voltage	4.5	5.0	5.5	V
V_{EE}	ECL supply voltage	–4.94	–5.2	–5.46	V
V_{IH}	TTL high-level input voltage	2			V
V_{IH}	ECL high-level input voltage [‡]	0°C	–1170	–840	mV
		25°C	–1130	–810	
		75°C	–1070	–735	
V_{IL}	TTL low-level input voltage			0.8	V
V_{IL}	ECL low-level input voltage [‡]	0°C	–1950	–1480	mV
		25°C	–1950	–1480	
		75°C	–1950	–1450	
I_{IK}	TTL input clamp current			–18	mA
T_A	Operating ambient temperature (see Note 3)	0		75	°C

[‡] The algebraic convention, in which the least positive (most negative) value is designated minimum, is used in this data sheet for logic voltage levels and temperature only.
NOTES: 2. If unused, OE1 should be tied directly to –2 V.
3. Each 10KH series circuit has been designed to meet the dc specifications shown in the electrical characteristics table after thermal equilibrium has been established. The circuit is in a test socket or mounted on a printed circuit board, and transverse air flow greater than 500 linear ft/min is maintained.

PACKAGING INFORMATION

Orderable part number	Status (1)	Material type (2)	Package Pins	Package qty Carrier	RoHS (3)	Lead finish/ Ball material (4)	MSL rating/ Peak reflow (5)	Op temp (°C)	Part marking (6)
SN10KHT5543DW	Active	Production	SOIC (DW) 24	25 TUBE	Yes	NIPDAU	Level-1-260C-UNLIM	0 to 70	10KHT5543
SN10KHT5543DW.A	Active	Production	SOIC (DW) 24	25 TUBE	Yes	NIPDAU	Level-1-260C-UNLIM	0 to 70	10KHT5543

⁽¹⁾ **Status:** For more details on status, see our [product life cycle](#).

⁽²⁾ **Material type:** When designated, preproduction parts are prototypes/experimental devices, and are not yet approved or released for full production. Testing and final process, including without limitation quality assurance, reliability performance testing, and/or process qualification, may not yet be complete, and this item is subject to further changes or possible discontinuation. If available for ordering, purchases will be subject to an additional waiver at checkout, and are intended for early internal evaluation purposes only. These items are sold without warranties of any kind.

⁽³⁾ **RoHS values:** Yes, No, RoHS Exempt. See the [TI RoHS Statement](#) for additional information and value definition.

⁽⁴⁾ **Lead finish/Ball material:** Parts may have multiple material finish options. Finish options are separated by a vertical ruled line. Lead finish/Ball material values may wrap to two lines if the finish value exceeds the maximum column width.

⁽⁵⁾ **MSL rating/Peak reflow:** The moisture sensitivity level ratings and peak solder (reflow) temperatures. In the event that a part has multiple moisture sensitivity ratings, only the lowest level per JEDEC standards is shown. Refer to the shipping label for the actual reflow temperature that will be used to mount the part to the printed circuit board.

⁽⁶⁾ **Part marking:** There may be an additional marking, which relates to the logo, the lot trace code information, or the environmental category of the part.

Multiple part markings will be inside parentheses. Only one part marking contained in parentheses and separated by a "~" will appear on a part. If a line is indented then it is a continuation of the previous line and the two combined represent the entire part marking for that device.
