

Sensor Hub BoosterPack

BOOSTXL-SENSHUB

Features

- On-board sensors
 - **InvenSense MPU-9150:** 9-axis MEMS motion tracking
 - 3-axis gyro
 - 3-axis accelerometer
 - 3-axis compass
 - **Bosch Sensortec (BMP180):** Pressure sensor
 - **Sensirion (SHT21):** Relative humidity and ambient temperature sensor
 - **Intersil (ISL29023):** Ambient and infrared light sensor
 - **TI (TMP006):** Non-contact infrared temperature sensor
- Uses BoosterPack XL connection standard
 - Two pairs of 10-pin headers providing standard LaunchPad interface
 - Primary header (outer row) compatible with other LaunchPads
 - Secondary header (inner row) offers additional Tiva C Series-based expansion signals
- 2× user input buttons and LEDs
- TI's wireless evaluation module (EM) interface connection
- *Air Mouse* (PC HID) example application demonstrates sensor fusion technology
- Tool chains supported: Code Composer Studio™ IDE, Keil™ RealView®, IAR Systems Embedded Workbench®, and Mentor Embedded Sourcery CodeBench™
- TivaWare™ for C Series DriverLib under TI BSD-style license

Texas Instruments Sensor Hub BoosterPack (BOOSTXL-SENSHUB) is an add-on board designed to fit the Tiva™ C Series TM4C123G LaunchPad along with all of TI's MCU LaunchPads. It is a Tiva platform for evaluating the use of ARM® Cortex®-M4F based TM4C devices in sensor fusion applications, demonstrating the mathematical and algorithm computation capabilities of the M4F. The stackable headers of the Tiva C

Series TM4C123G LaunchPad BoosterPack XL interface also demonstrate how easy it is to expand the functionality of a Tiva C Series LaunchPad when interfacing to other peripherals via BoosterPacks (BPs). The Sensor Hub BP has an example application that uses much of the functionality offered in this platform when used with a Tiva C LaunchPad and it provides many additional options and capabilities for end users to explore.

Kit Contents:

Sensor Hub BoosterPack Options	MSRP
BoosterPack Only (BOOSTXL-SENSHUB) [†]	\$49.99
Standard Bundle (SENSHUBPACK-123G) [†]	MSRP
<ul style="list-style-type: none"> • BoosterPack (BOOSTXL-SENSHUB) • Tiva C Series LaunchPad (EK-TM4C123GXL) 	\$59.99
Wireless Bundle (SENSHUBPACK-123G-W)	MSRP
<ul style="list-style-type: none"> • BoosterPack (BOOSTXL-SENSHUB) • Tiva C Series LaunchPad (EK-TM4C123GXL) • Wireless USB Dongle (CC2531EMK) • Wireless EM (CC2533EMK) • Battery BoosterPack (BOOSTXL-BATTPACK) 	\$199.99

[†]The "Air Mouse" example requires EK-TM4C123GXL for operation and will be tethered on non-wireless options.

IMPORTANT NOTICE

Texas Instruments Incorporated and its subsidiaries (TI) reserve the right to make corrections, enhancements, improvements and other changes to its semiconductor products and services per JESD46, latest issue, and to discontinue any product or service per JESD48, latest issue. Buyers should obtain the latest relevant information before placing orders and should verify that such information is current and complete. All semiconductor products (also referred to herein as "components") are sold subject to TI's terms and conditions of sale supplied at the time of order acknowledgment.

TI warrants performance of its components to the specifications applicable at the time of sale, in accordance with the warranty in TI's terms and conditions of sale of semiconductor products. Testing and other quality control techniques are used to the extent TI deems necessary to support this warranty. Except where mandated by applicable law, testing of all parameters of each component is not necessarily performed.

TI assumes no liability for applications assistance or the design of Buyers' products. Buyers are responsible for their products and applications using TI components. To minimize the risks associated with Buyers' products and applications, Buyers should provide adequate design and operating safeguards.

TI does not warrant or represent that any license, either express or implied, is granted under any patent right, copyright, mask work right, or other intellectual property right relating to any combination, machine, or process in which TI components or services are used. Information published by TI regarding third-party products or services does not constitute a license to use such products or services or a warranty or endorsement thereof. Use of such information may require a license from a third party under the patents or other intellectual property of the third party, or a license from TI under the patents or other intellectual property of TI.

Reproduction of significant portions of TI information in TI data books or data sheets is permissible only if reproduction is without alteration and is accompanied by all associated warranties, conditions, limitations, and notices. TI is not responsible or liable for such altered documentation. Information of third parties may be subject to additional restrictions.

Resale of TI components or services with statements different from or beyond the parameters stated by TI for that component or service voids all express and any implied warranties for the associated TI component or service and is an unfair and deceptive business practice. TI is not responsible or liable for any such statements.

Buyer acknowledges and agrees that it is solely responsible for compliance with all legal, regulatory and safety-related requirements concerning its products, and any use of TI components in its applications, notwithstanding any applications-related information or support that may be provided by TI. Buyer represents and agrees that it has all the necessary expertise to create and implement safeguards which anticipate dangerous consequences of failures, monitor failures and their consequences, lessen the likelihood of failures that might cause harm and take appropriate remedial actions. Buyer will fully indemnify TI and its representatives against any damages arising out of the use of any TI components in safety-critical applications.

In some cases, TI components may be promoted specifically to facilitate safety-related applications. With such components, TI's goal is to help enable customers to design and create their own end-product solutions that meet applicable functional safety standards and requirements. Nonetheless, such components are subject to these terms.

No TI components are authorized for use in FDA Class III (or similar life-critical medical equipment) unless authorized officers of the parties have executed a special agreement specifically governing such use.

Only those TI components which TI has specifically designated as military grade or "enhanced plastic" are designed and intended for use in military/aerospace applications or environments. Buyer acknowledges and agrees that any military or aerospace use of TI components which have **not** been so designated is solely at the Buyer's risk, and that Buyer is solely responsible for compliance with all legal and regulatory requirements in connection with such use.

TI has specifically designated certain components as meeting ISO/TS16949 requirements, mainly for automotive use. In any case of use of non-designated products, TI will not be responsible for any failure to meet ISO/TS16949.
