*
* Model Usage Notes:
*
* A. Features have been modelled
*   1. Startup and steady state
*   2. Current Limit and Hiccup mode of operation
*   3. Pre-bias operation
*   4. Line and Load transient behavior
*   5. Enable and shutdown sequencing
*   6. Output Discharge Current
*
* B. Features have not been modelled
*   1. Leakage current
*   2. Temperature dependent behavior
*   3. Inverting Buck Boost
*
* C. Application Notes
*   1. The parameter SS has been used to reach the steady state faster.
*      Keep SS = 0 to observe startup behaviour.
*      Keep SS = 1 and appropriate IC on Inductor and capacitor to observe for faster Steady state.
