

# CSD88539ND Dual 60 V N-Channel NexFET™ Power MOSFETs

## 1 Features

- Ultra-Low  $Q_g$  and  $Q_{gd}$
- Avalanche Rated
- Pb Free
- RoHS Compliant
- Halogen Free

## 2 Applications

- Half Bridge for Motor Control
- Synchronous Buck Converter

## 3 Description

This dual SO-8, 60 V, 23 mΩ NexFET™ power MOSFET is designed to serve as a half bridge in low-current motor control applications.

Figure 3-1. Top View

## Product Summary

| $T_A = 25^\circ\text{C}$ |                               | TYPICAL VALUE                                   | UNIT           |
|--------------------------|-------------------------------|---|----------------|
| $V_{DS}$                 | Drain-to-Source Voltage       | 60  | V              |
| $Q_g$                    | Gate Charge Total (10 V)      | 7.2   | nC             |
| $Q_{gd}$                 | Gate Charge Gate to Drain     | 1.1   | nC             |
| $R_{DS(on)}$             | Drain-to-Source On Resistance | $V_{GS} = 6\text{ V}$<br>$V_{GS} = 10\text{ V}$ | 27 mΩ<br>23 mΩ |
| $V_{GS(th)}$             | Threshold Voltage             | 3.0   | V              |

## Ordering Information<sup>(1)</sup>

| Device      | Qty  | Media        | Package              | Ship          |
|-------------|------|--------------|----------------------|---------------|
| CSD88539ND  | 2500 | 13-Inch Reel | SO-8 Plastic Package | Tape and Reel |
| CSD88539NDT | 250  | 7-Inch Reel  |                      |               |

(1) For all available packages, see the orderable addendum at the end of the data sheet.

## Absolute Maximum Ratings

| $T_A = 25^\circ\text{C}$ |  | VALUE      | UNIT |
|--------------------------|--|------------|------|
| $V_{DS}$                 | Drain-to-Source Voltage  | 60         | V    |
| $V_{GS}$                 | Gate-to-Source Voltage   | $\pm 20$   | V    |
| $I_D$                    | Continuous Drain Current (Package limited)   | 15         | A    |
|                          | Continuous Drain Current (Silicon limited), $T_C = 25^\circ\text{C}$                                   | 11.7       |      |
|                          | Continuous Drain Current <sup>(1)</sup>  | 6.3        |      |
| $I_{DM}$                 | Pulsed Drain Current <sup>(2)</sup>  | 46         | A    |
| $P_D$                    | Power Dissipation <sup>(1)</sup>   | 2.1        | W    |
| $T_J, T_{STG}$           | Operating Junction and Storage Temperature Range   | -55 to 150 | °C   |
| $E_{AS}$                 | Avalanche Energy, single pulse<br>$I_D = 22\text{ A}$ , $L = 0.1\text{ mH}$ , $R_G = 25\text{ }\Omega$ | 24         | mJ   |

(1) Typical  $R_{\text{DS(on)}} = 60^\circ\text{C}/\text{W}$  on a 1-inch<sup>2</sup>, 2-oz. Cu pad on a 0.06-inch thick FR4 PCB

(2) Pulse duration  $\leq 300\text{ }\mu\text{s}$ , duty cycle  $\leq 2\%$

Gate Charge

An IMPORTANT NOTICE at the end of this data sheet addresses availability, warranty, changes, use in safety-critical applications, intellectual property matters and other important disclaimers. PRODUCTION DATA.

### 4.2 Thermal Information

( $T_A = 25^\circ\text{C}$  unless otherwise stated)

| THERMAL METRIC           |   | MIN | TYP | MAX | UNIT                      |
|--------------------------|---|-----|-----|-----|---------------------------|
| $R_{\theta_{\text{JL}}}$ | Junction-to-Lead Thermal Resistance <sup>(1)</sup>        |     |     | 20  | $^\circ\text{C}/\text{W}$ |
| $R_{\theta_{\text{JA}}}$ | Junction-to-Ambient Thermal Resistance <sup>(1) (2)</sup> |     |     | 75  |                           |

- (1)  $R_{\theta_{\text{JC}}}$  is determined with the device mounted on a 1-inch<sup>2</sup> (6.45-cm<sup>2</sup>), 2-oz. (0.071-mm thick) Cu pad on a 1.5-inch  $\times$  1.5-inch (3.81-cm  $\times$  3.81-cm), 0.06-inch (1.52-mm) thick FR4 PCB.  $R_{\theta_{\text{JC}}}$  is specified by design, whereas  $R_{\theta_{\text{JA}}}$  is determined by the user's board design.  
 (2) Device mounted on FR4 material with 1-inch<sup>2</sup> (6.45-cm<sup>2</sup>), 2-oz. (0.071-mm thick) Cu.

## 5 Device and Documentation Support

### 5.1 Trademarks

NexFET™ is a trademark of Texas Instruments.

All trademarks are the property of their respective owners.

### 5.2 Electrostatic Discharge Caution

This integrated circuit can be damaged by ESD. Texas Instruments recommends that all integrated circuits be handled with appropriate precautions. Failure to observe proper handling and installation procedures can cause damage.

ESD damage can range from subtle performance degradation to complete device failure. Precision integrated circuits may be more susceptible to damage because very small parametric changes could cause the device not to meet its published specifications.

## 6 Revision History

NOTE: Page numbers for previous revisions may differ from page numbers in the current version.

<sup>(1)</sup> **Status:** For more details on status, see our [product life cycle](#).

<sup>(2)</sup> **Material type:** When designated, preproduction parts are prototypes/experimental devices, and are not yet approved or released for full production. Testing and final process, including without limitation quality assurance, reliability performance testing, and/or process qualification, may not yet be complete, and this item is subject to further changes or possible discontinuation. If available for ordering, purchases will be subject to an additional waiver at checkout, and are intended for early internal evaluation purposes only. These items are sold without warranties of any kind.

<sup>(3)</sup> **RoHS values:** Yes, No, RoHS Exempt. See the [TI RoHS Statement](#) for additional information and value definition.

<sup>(4)</sup> **Lead finish/Ball material:** Parts may have multiple material finish options. Finish options are separated by a vertical ruled line. Lead finish/Ball material values may wrap to two lines if the finish value exceeds the maximum column width.

<sup>(5)</sup> **MSL rating/Peak reflow:** The moisture sensitivity level ratings and peak solder (reflow) temperatures. In the event that a part has multiple moisture sensitivity ratings, only the lowest level per JEDEC standards is shown. Refer to the shipping label for the actual reflow temperature that will be used to mount the part to the printed circuit board.

<sup>(6)</sup> **Part marking:** There may be an additional marking, which relates to the logo, the lot trace code information, or the environmental category of the part.

Multiple part markings will be inside parentheses. Only one part marking contained in parentheses and separated by a "~" will appear on a part. If a line is indented then it is a continuation of the previous line and the two combined represent the entire part marking for that device.

**Important Information and Disclaimer:** The information provided on this page represents TI's knowledge and belief as of the date that it is provided. TI bases its knowledge and belief on information provided by third parties, and makes no representation or warranty as to the accuracy of such information. Efforts are underway to better integrate information from third parties. TI has taken and continues to take reasonable steps to provide representative and accurate information but may not have conducted destructive testing or chemical analysis on incoming materials and chemicals. TI and TI suppliers consider certain information to be proprietary, and thus CAS numbers and other limited information may not be available for release.

In no event shall TI's liability arising out of such information exceed the total purchase price of the TI part(s) at issue in this document sold by TI to Customer on an annual basis.

# PACKAGE OUTLINE

## SOIC - 1.75 mm max height

SMALL OUTLINE INTEGRATED CIRCUIT

### NOTES:

1. Linear dimensions are in inches [millimeters]. Dimensions in parenthesis are for reference only. Controlling dimensions are in inches. Dimensioning and tolerancing per ASME Y14.5M.
2. This drawing is subject to change without notice.
3. This dimension does not include mold flash, protrusions, or gate burrs. Mold flash, protrusions, or gate burrs shall not exceed .006 [0.15] per side.
4. This dimension does not include interlead flash.
5. Reference JEDEC registration MS-012, variation AA.
