

TLC696x0 Scan MOSFET Controller for TLC696x2/4/8

1 Features

- Operating voltage V_{CC} range: 3V to 5.5V
- Flexible P-MOSFET driving options:
 - Maximum driving current / sustaining voltage:
 - 30mA / 20V: TLC69600
 - 60mA / 20V: TLC69610
 - 30mA / 50V: TLC69650
 - 60mA / 50V: TLC69660
 - Global 8-bit Maximum Current (MC) setting
 - Individual 8-bit Channel Current (CC) setting
- High speed daisy chain interface:
 - I/O voltage compatible with: 1.8V / 3.3V
 - Data transfer rate: up to 20MHz
- EMI enhancement:
 - Programmable interface driving capability
- Display quality improvement:
 - Minimum brightness update latency
 - Programmable black insertion
 - Variable refresh rate (VRR) without flickering
- Diagnostics:
 - Device thermal shutdown detection
 - Report interface option:
 - UART and interrupt pin (INT)
 - Two-wire output: CLK_O and SOUT

2 Applications

- LCD local dimming backlight:
 - TV
 - Monitor
 - Notebook
 - Tablet

3 Description

TLC696x0 is a scan MOSFET controller compatible with current-sink driver TLC696x2/4/8 to achieve 2/4/8 time-multiplexing control. Each device integrates with 16 constant current sinks for up to 8 scan MOSFETs control. The device equips with ghost-cancellation function to eliminate upside ghosting.

To optimize system efficiency, the device equips with adaptive headroom voltage control scheme to directly control DC/DC. Only the FB pin from last device in serial chain should be connected to DC/DC to achieve simplified system layout. The device also integrates minimum brightness update latency, black insertion and VRR features to improve display quality.

TLC696x0 has three error flags: LED open detection (LOD), LED short detection (LSD) and thermal shutdown detection (TSD) for diagnostic. The device implements two options for readback including UART/INT and SOUT/CLK_O which is programmable by register.

Device Information

PART NUMBER	PACKAGE ⁽¹⁾	BODY SIZE (NOM)
TLC696x0	DSBGA (24)	1.58mm × 2.43mm
	WQFN (24)	4mm × 4mm

- (1) For all available packages, see the orderable addendum at the end of the data sheet.

4 Device and Documentation Support

TI offers an extensive line of development tools. Tools and software to evaluate the performance of the device, generate code, and develop solutions are listed below.

4.1 Receiving Notification of Documentation Updates

To receive notification of documentation updates, navigate to the device product folder on [ti.com](https://www.ti.com). Click on *Notifications* to register and receive a weekly digest of any product information that has changed. For change details, review the revision history included in any revised document.

4.2 Support Resources

[TI E2E™ support forums](#) are an engineer's go-to source for fast, verified answers and design help — straight from the experts. Search existing answers or ask your own question to get the quick design help you need.

Linked content is provided "AS IS" by the respective contributors. They do not constitute TI specifications and do not necessarily reflect TI's views; see TI's [Terms of Use](#).

4.3 Trademarks

TI E2E™ is a trademark of Texas Instruments.
All trademarks are the property of their respective owners.

4.4 Electrostatic Discharge Caution

This integrated circuit can be damaged by ESD. Texas Instruments recommends that all integrated circuits be handled with appropriate precautions. Failure to observe proper handling and installation procedures can cause damage.

ESD damage can range from subtle performance degradation to complete device failure. Precision integrated circuits may be more susceptible to damage because very small parametric changes could cause the device not to meet its published specifications.

4.5 Glossary

[TI Glossary](#) This glossary lists and explains terms, acronyms, and definitions.

5 Revision History

NOTE: Page numbers for previous revisions may differ from page numbers in the current version.

DATE	REVISION	NOTES
April 2023	*	Initial Release

6 Mechanical, Packaging, and Orderable Information

The following pages include mechanical, packaging, and orderable information. This information is the most current data available for the designated devices. This data is subject to change without notice and revision of this document. For browser-based versions of this data sheet, refer to the left-hand navigation.

⁽¹⁾ **Status:** For more details on status, see our [product life cycle](#).

⁽²⁾ **Material type:** When designated, preproduction parts are prototypes/experimental devices, and are not yet approved or released for full production. Testing and final process, including without limitation quality assurance, reliability performance testing, and/or process qualification, may not yet be complete, and this item is subject to further changes or possible discontinuation. If available for ordering, purchases will be subject to an additional waiver at checkout, and are intended for early internal evaluation purposes only. These items are sold without warranties of any kind.

⁽³⁾ **RoHS values:** Yes, No, RoHS Exempt. See the [TI RoHS Statement](#) for additional information and value definition.

⁽⁴⁾ **Lead finish/Ball material:** Parts may have multiple material finish options. Finish options are separated by a vertical ruled line. Lead finish/Ball material values may wrap to two lines if the finish value exceeds the maximum column width.

⁽⁵⁾ **MSL rating/Peak reflow:** The moisture sensitivity level ratings and peak solder (reflow) temperatures. In the event that a part has multiple moisture sensitivity ratings, only the lowest level per JEDEC standards is shown. Refer to the shipping label for the actual reflow temperature that will be used to mount the part to the printed circuit board.

(6) Part marking: There may be an additional marking, which relates to the logo, the lot trace code information, or the environmental category of the part.

Multiple part markings will be inside parentheses. Only one part marking contained in parentheses and separated by a "~" will appear on a part. If a line is indented then it is a continuation of the previous line and the two combined represent the entire part marking for that device.

Important Information and Disclaimer: The information provided on this page represents TI's knowledge and belief as of the date that it is provided. TI bases its knowledge and belief on information provided by third parties, and makes no representation or warranty as to the accuracy of such information. Efforts are underway to better integrate information from third parties. TI has taken and continues to take reasonable steps to provide representative and accurate information but may not have conducted destructive testing or chemical analysis on incoming materials and chemicals. TI and TI suppliers consider certain information to be proprietary, and thus CAS numbers and other limited information may not be available for release.

In no event shall TI's liability arising out of such information exceed the total purchase price of the TI part(s) at issue in this document sold by TI to Customer on an annual basis.

PACKAGE OUTLINE

WQFN - 0.8 mm max height

The drawing illustrates the mechanical specifications of the QFN package through three views:

- Top View:** Shows the square footprint with a side length of 4.15 mm (3.85 mm BGA-compatible). A shaded region on the left is designated as the "PIN 1 INDEX AREA".
- Side View:** Shows the package height of 0.8 mm maximum. The bottom surface features a "SEATING PLANE" with a flatness tolerance of 0.08 mm. The solder mask thickness is specified as 0.05 mm to 0.00 mm.
- Detail View:** Provides a close-up of the package perimeter, showing 24 pins (6 on each side) with a pitch of 0.5 mm. The central square area has a side length of 2.5 mm. The exposed thermal pad is 2.45 ± 0.1 mm square. The package is symmetrical (SYMM) about both horizontal and vertical centerlines. A "PIN 1 ID (OPTIONAL)" is indicated on the left side. A detail of the pin profile shows a width of 0.2 mm typical.

NOTES:

1. All linear dimensions are in millimeters. Any dimensions in parenthesis are for reference only. Dimensioning and tolerancing per ASME Y14.5M.
2. This drawing is subject to change without notice.
