High-Power Audio Amplifiers
Big sound. Small footprint. Great listening experience.

At Texas Instruments, we believe in empowering our customers to design systems with the highest quality listening experience. Our history in audio, our best-in-class system expertise, and our commitment to customer satisfaction enables us to design products and ecosystems that make it easier for you to develop audio solutions.

High-Resolution
Deliver audio as it was recorded all the way to the speaker. The TPA32xx family supports high-resolution audio.

High-Bandwidth
The TPA32xx family of devices support up to 100 kHz audio bandwidth.

High-Power
Devices with 35 W to 650 W of output power that deliver large sound in a compact size.

Low-Distortion
A new closed-loop design enables ultra-low THD across all frequencies.

Efficient Design
Best power efficiency and idle losses enable low power consumption and a smaller heat sink.

Easy to Use
Simplify PCB design with fewer external components, integrated protection, and scalable power options.

High-Resolution Audio

High-resolution audio offers listeners the ability to hear audio as it was originally recorded. Higher sampling rate Digital-to-Analog Converters (DAC) and higher bandwidth amplifiers are key to delivering hi-res audio all the way to the speaker.

The TPA32xx series of amplifiers support high-resolution audio playback with a large audio bandwidth (100 kHz) and unique features that reduce distortion.

Total Harmonic Distortion and Noise (THD+N)

To achieve the best and most accurate audio quality we have designed the TPA32xx with the lowest noise floor and total harmonic distortion (THD+N) of any integrated Class-D.

Compared to other Class-D amplifiers (dashed line), the TPA32xx THD+N (blue) is well below the competition.

High-Power Audio

The TPA32xx family provides output options from 35 W to 650 W. Start your design by selecting the right part for your audio output power level.
**Efficiency**

- **High efficiency at full output power**
  Nearly twice as efficient as Class-AB amplifiers.
- **Lowest idle power loss ratio**
  Up to 650 W output power with only 1 W of idle power loss.

**Peak Power vs. Continuous Power**

Audio consists of a small number of peaks with low average power that may allow you to eliminate the heatsink and save space.

Selecting the correct package and thermal management is easier with the TPA32xx family. Choose from pad-up or pad-down package options that allow either a heatsink or the PCB to be used for dissipating heat.

**Integrated Protection**

Reduce the solution size by half with integrated fault protection.

The TPA32xx family includes a number of protection features to ensure your product and speakers are safe.

**Flexible Design Options**

The TPA32xx family supports multiple output configurations all in the same pin-compatible package:

- 4-channels - Single-ended (SE)
- Stereo - Bridge-tied load (BTL)
- Mono - Parallel bridge-tied load (PBTL)

The TPA32xx family is pin-to-pin compatible for simple and easy reuse.

Reference Design

The TIDA-00874 TI Design turns the extremely high-performance analog input TPA3251 Class-D amplifier into a digital input system with audio processing, using the highly versatile PCM5242 differential output DAC. The design accepts USB, optical, SPDIF, and I2S digital formats. The PCM5242 DAC includes a mini-DSP for processing flexibility and a fully differential output that directly connects to the TPA3251.

Target Applications

• Wireless speakers
• Sound bar
• Audio-video receiver (AVR)
• Subwoofers
• Professional home cinema
• PA speakers
• Distributed audio amplifier

IMPORTANT NOTICE FOR TI DESIGN INFORMATION AND RESOURCES

Texas Instruments Incorporated ("TI") technical, application or other design advice, services or information, including, but not limited to, reference designs and materials relating to evaluation modules, (collectively, "TI Resources") are intended to assist designers who are developing applications that incorporate TI products; by downloading, accessing or using any particular TI Resource in any way, you (individually or, if you are acting on behalf of a company, your company) agree to use it solely for this purpose and subject to the terms of this Notice.

TI's provision of TI Resources does not expand or otherwise alter TI's applicable published warranties or warranty disclaimers for TI products, and no additional obligations or liabilities arise from TI providing such TI Resources. TI reserves the right to make corrections, enhancements, improvements and other changes to its TI Resources.

You understand and agree that you remain responsible for using your independent analysis, evaluation and judgment in designing your applications and that you have full and exclusive responsibility to assure the safety of your applications and compliance of your applications (and of all TI products used in or for your applications) with all applicable regulations, laws and other applicable requirements. You represent that, with respect to your applications, you have all the necessary expertise to create and implement safeguards that (1) anticipate dangerous consequences of failures, (2) monitor failures and their consequences, and (3) lessen the likelihood of failures that might cause harm and take appropriate actions. You agree that prior to using or distributing any applications that include TI products, you will thoroughly test such applications and the functionality of such TI products as used in such applications. TI has not conducted any testing other than that specifically described in the published documentation for a particular TI Resource.

You are authorized to use, copy and modify any individual TI Resource only in connection with the development of applications that include the TI product(s) identified in such TI Resource. NO OTHER LICENSE, EXPRESS OR IMPLIED, BY ESTOPPEL OR OTHERWISE TO ANY OTHER TI INTELLECTUAL PROPERTY RIGHT, AND NO LICENSE TO ANY TECHNOLOGY OR INTELLECTUAL PROPERTY RIGHT OF TI OR ANY THIRD PARTY IS GRANTED HEREIN, including but not limited to any patent right, copyright, mask work right, or other intellectual property right relating to any combination, machine, or process in which TI products or services are used. Information regarding or referencing third-party products or services does not constitute a license to use such products or services, or a warranty or endorsement thereof. Use of TI Resources may require a license from a third party under the patents or other intellectual property of the third party, or a license from TI under the patents or other intellectual property of TI.

TI RESOURCES ARE PROVIDED "AS IS" AND WITH ALL FAULTS. TI DISCLAIMS ALL OTHER WARRANTIES OR REPRESENTATIONS, EXPRESS OR IMPLIED, REGARDING TI RESOURCES OR USE THEREOF, INCLUDING BUT NOT LIMITED TO ACCURACY OR COMPLETENESS, TITLE, ANY EPIDEMIC FAILURE WARRANTY AND ANY IMPLIED WARRANTIES OF MERCHANTABILITY, FITNESS FOR A PARTICULAR PURPOSE, AND NON-INFRINGEMENT OF ANY THIRD PARTY INTELLECTUAL PROPERTY RIGHTS.

TI SHALL NOT BE LIABLE FOR AND SHALL NOT DEFEND OR INDEMNIFY YOU AGAINST ANY CLAIM, INCLUDING BUT NOT LIMITED TO ANY INFRINGEMENT CLAIM THAT RELATES TO OR IS BASED ON ANY COMBINATION OF PRODUCTS EVEN IF DESCRIBED IN TI RESOURCES OR OTHERWISE. IN NO EVENT SHALL TI BE LIABLE FOR ANY ACTUAL, DIRECT, SPECIAL, COLLATERAL, INDIRECT, PUNITIVE, INCIDENTAL, CONSEQUENTIAL OR EXEMPLARY DAMAGES IN CONNECTION WITH OR ARISING OUT OF TI RESOURCES OR USE THEREOF, AND REGARDLESS OF WHETHER TI HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES.

You agree to fully indemnify TI and its representatives against any damages, costs, losses, and/or liabilities arising out of your non-compliance with the terms and provisions of this Notice.

This Notice applies to TI Resources. Additional terms apply to the use and purchase of certain types of materials, TI products and services. These include, without limitation, TI's standard terms for semiconductor products http://www.ti.com/sc/docs/stdterms.htm), evaluation modules, and samples (http://www.ti.com/sc/docs/sampterms.htm).
