Technology for Innovators™

 TEXAS INSTRUMENTS

# Today's Home Theater

- ◆ **Difficult to Install**
  - Too many interface types
  - Too many cables
  - Not enough connections
- ◆ **Difficult to Use**
  - Multiple remotes
  - No communication between equipments
- ◆ **Costly**
  - Duplication of equipment
  - No sharing

# What is HANA?

**H**igh Definition  
**A**udio-visual  
**N**etwork  
**A**lliance

- ◆ **Cross industry alliance of 40+ companies**
- ◆ **Mission: Enhance the consumer HD entertainment experience thru existing standards**

# Membership Levels

## Board of Directors , Promoters

CP

CE

## Contributors

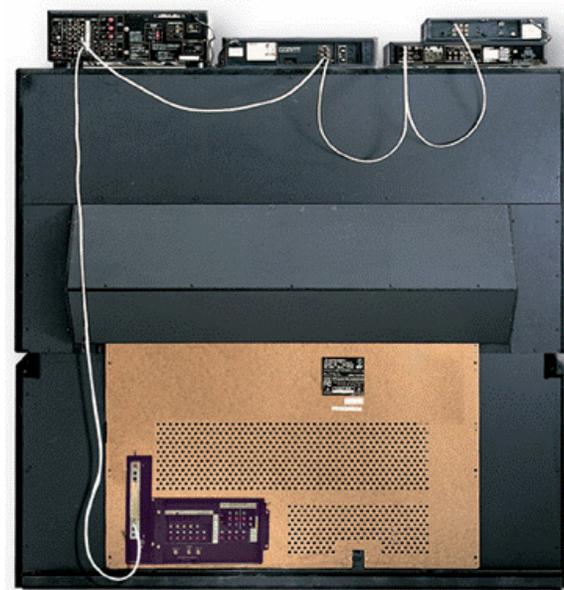

## Adopters

# The Next Generation...

- ◆ **Leverage Existing Technology and Infrastructure**
- ◆ **Single Interface Capable of Multiple Streams of HD Content**
  - Audio
  - Video
  - Control Commands
- ◆ **Simplified User Interface**
- ◆ **Networked Architecture with Zero Configuration**

# Leveraging What's There

- ◆ **Reuse of existing wiring**
  - Coax, CAT5, POF, Power Line
- ◆ **Using existing standards**
  - IEEE-1394
  - CEA-2027, CEA-931

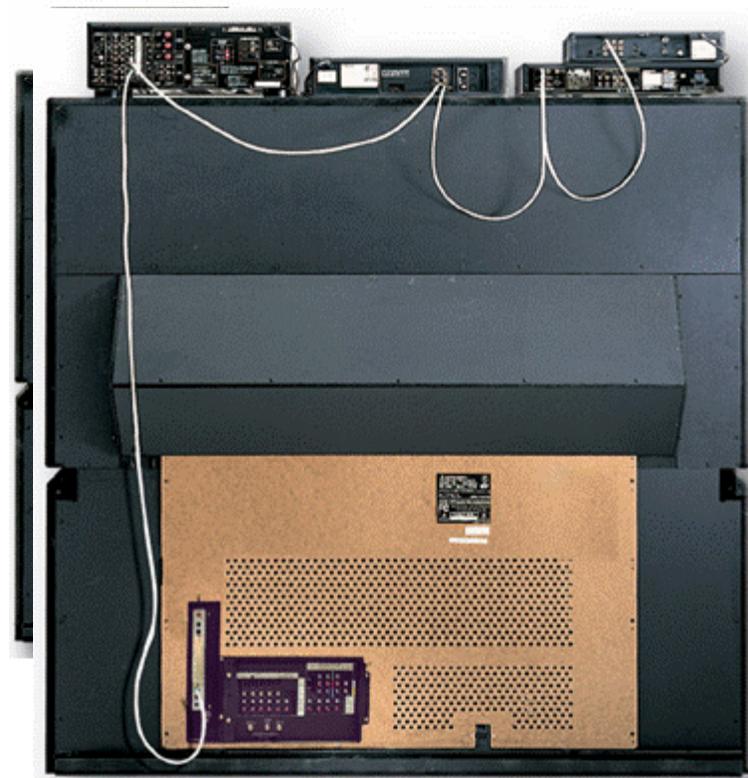

# Why 1394?

- ◆ **Time to market – it's available today**
- ◆ **FCC mandate ensures 1394 as part of the CE cluster for HD digital cable**
- ◆ **Open cable specification requires 1394**
- ◆ **MPAA approved 1394 with encrypted content transfer in digital cable STB**
  - Current TI 1394 silicon supports DTCP Content protection
- ◆ **DVDCCA (copy control assoc.) approved DVD transmit over 1394**
  - Provides path for future addition of DVD and HDDVD to CE cluster
- ◆ **DVD Forum approved DTCP-IP for AV transfer**
  - 1394 technology can support DTCP-IP
- ◆ **1394 based CE products (STB, DVDR, DVC and DTV) are available today**

# Single Interface

- ◆ **Simplifies Installation**
- ◆ **Eliminates Cable Confusion**
- ◆ **Lowers Costs**
- ◆ **Reduces Clutter**

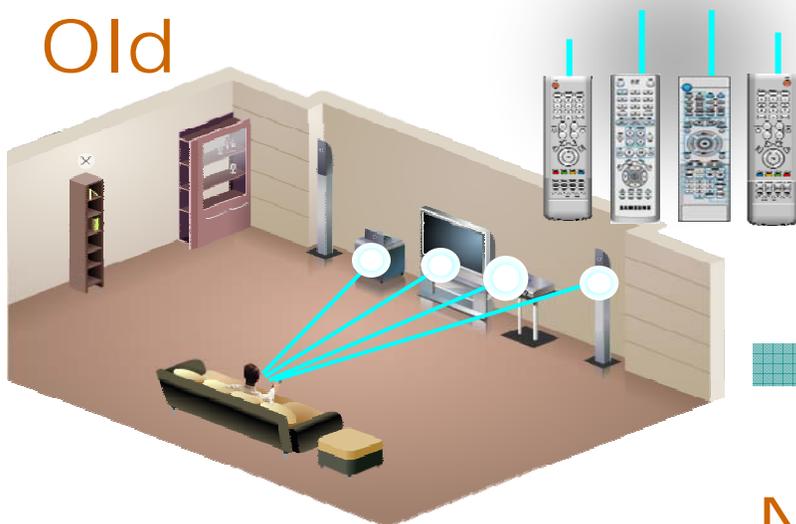

# Simplified User Interface

## Ease of Use

- Control all AV devices with a single remote per room
- Access Contents via a rich TV GUI and EPG

Old

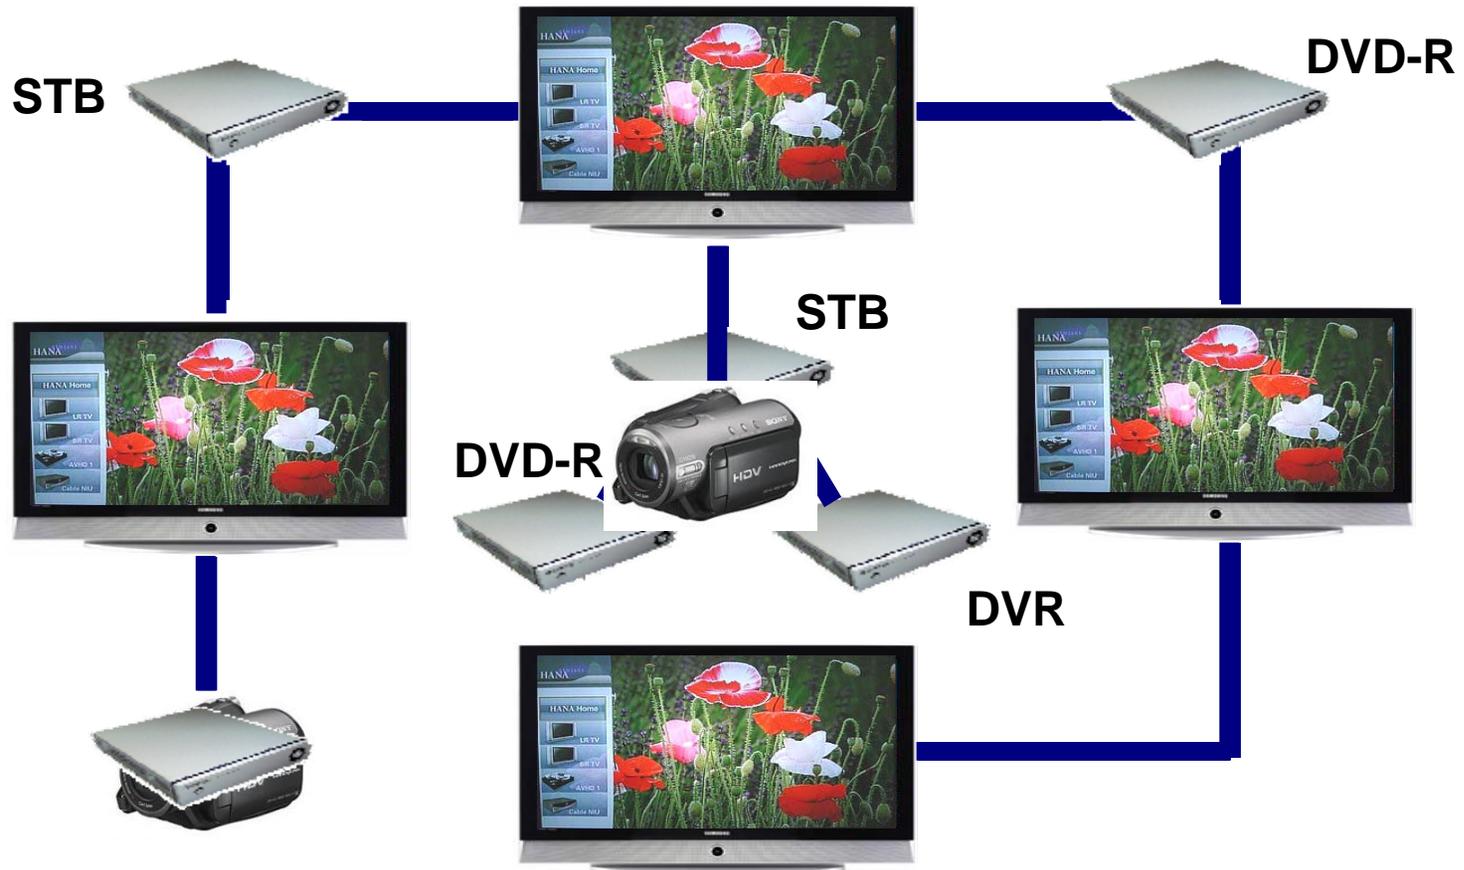

New

# Networked Architecture

\*Supports any topology

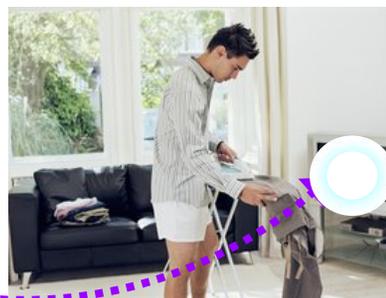

# Shared Content

Room 1

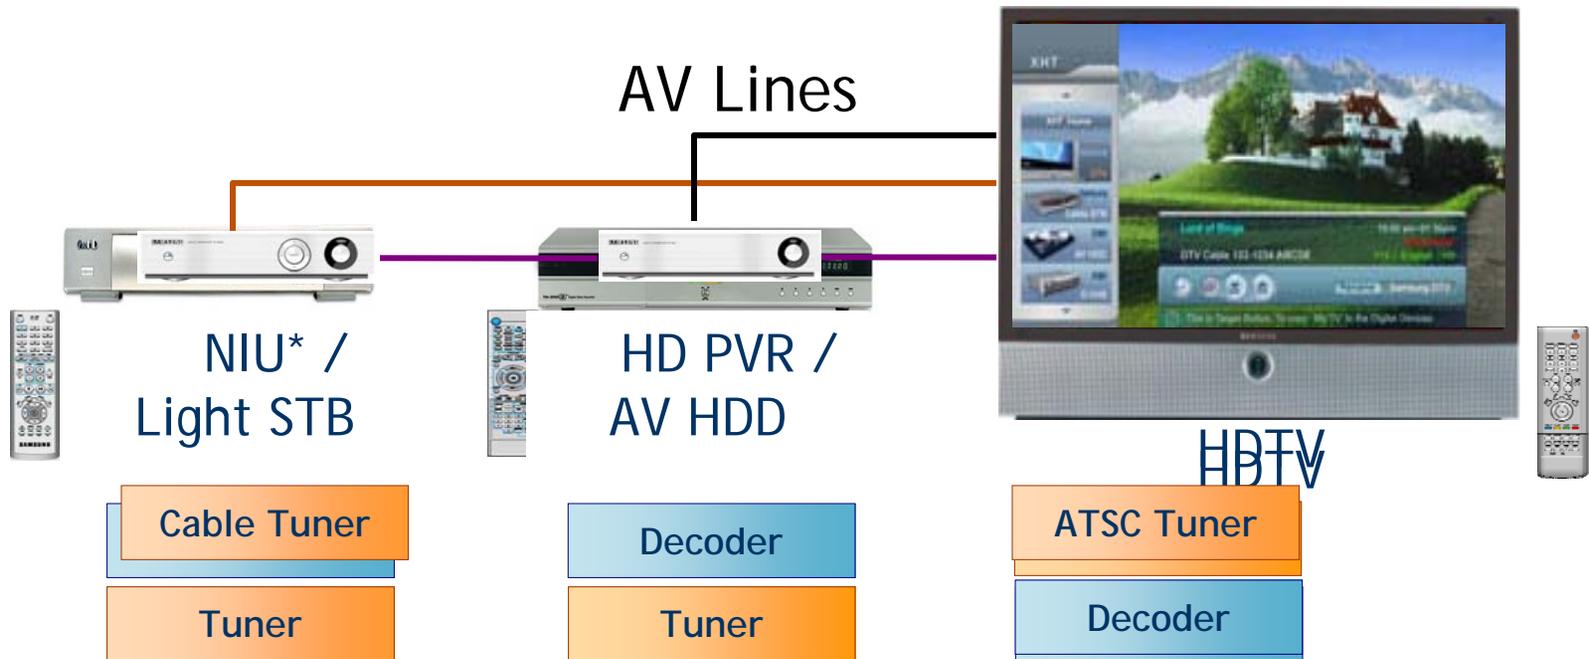

Room 2

Room 3

# Cost Benefits of Networked Architecture

# Benefits Summary

- ◆ Consumers:
  - Simplified setup and control
  - Share content throughout the home
  - Bridge between IT and CE networks
- ◆ Service Providers:
  - Reduced capital expenditures
  - New services and easier access to premium services
  - Built in content protection
- ◆ CE Manufacturers:
  - New products and features
  - Standardized Interoperability requirements
  - Compatibility with newer equipment
- ◆ Content Providers:
  - Proven content protection
  - Users have easier access to premium content

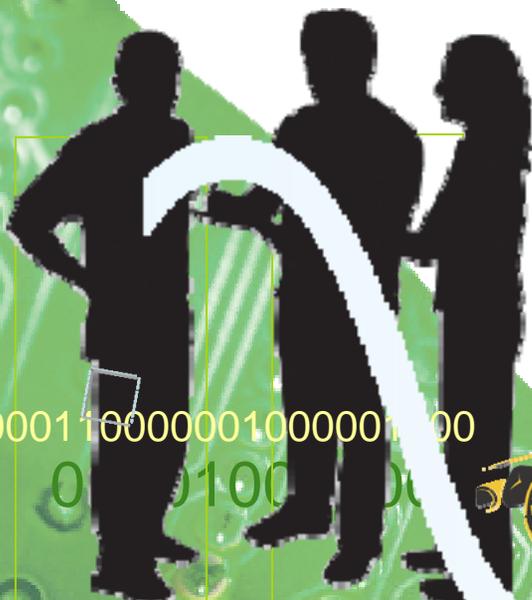

The logo for TI Developer Conference, featuring the letters 'TI' in a large, bold, black font, followed by a vertical line and the words 'Developer Conference' in a red, sans-serif font.

# HDTV Revolution

Millions of Households with wide-screen HDTVs

[ In-Stat, Nov.'05 ]

# HANA & DLNA

## Complements not Competitors

- ◆ Entertainment centric
- ◆ HD focus
- ◆ Streaming real-time entertainment

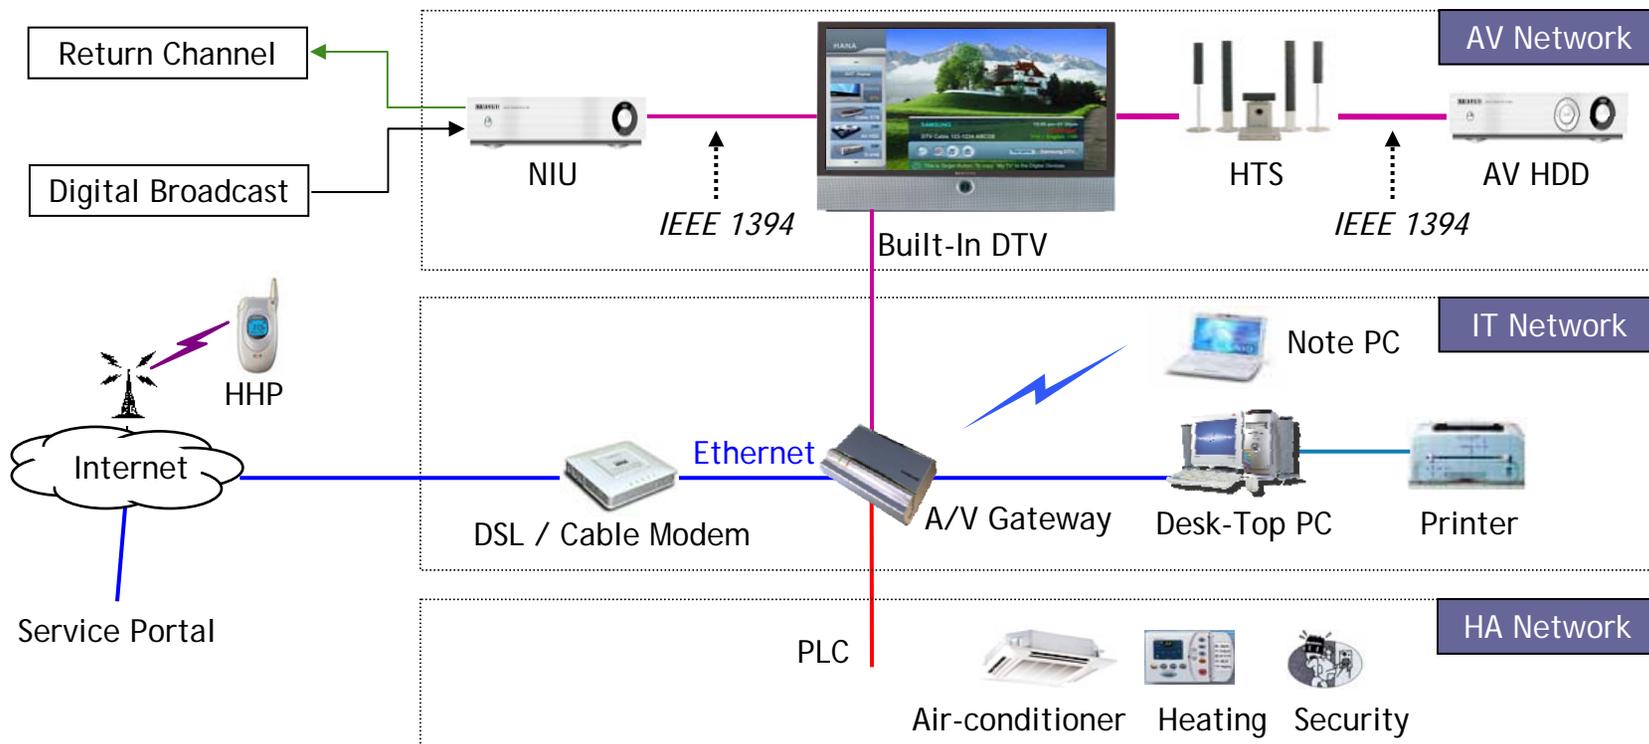

- ◆ PC centric
- ◆ No HD in sight
- ◆ Time-shifted entertainment

# Network Segmentation

- **Segment AV from IT or Home Appliance Networks**

- Commercial contents stay within a “Trust Network”.
- AV Network is a Trust Network. IT Network is not a Trust Network.
- Personal contents from IT Network flow into AV Network via A/V Gateway

※ NIU : Network Interface Unit

## IEEE -1394 & HANA:

## New Applications:

**SEE THE FUTURE**

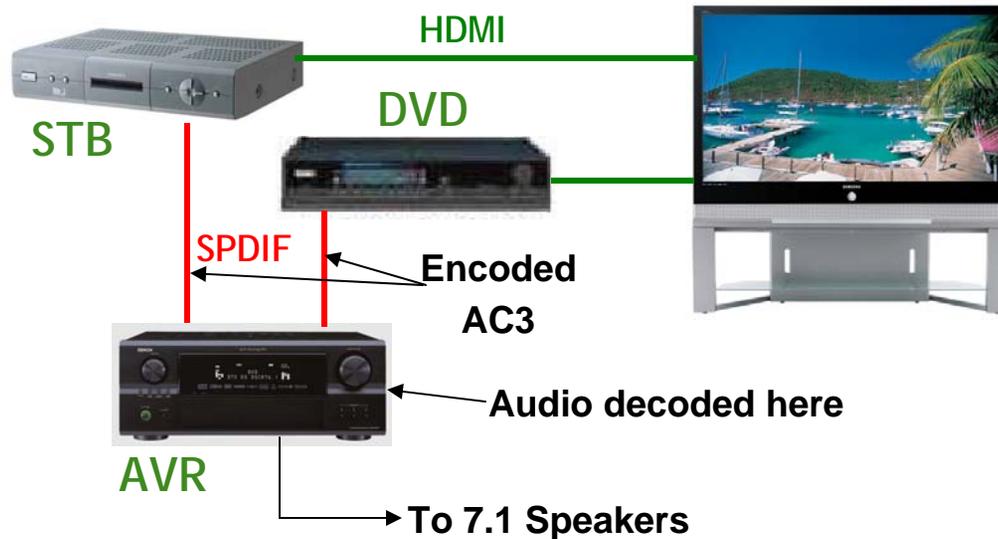

**CREATE YOUR OWN**

Technology for Innovators™

 **TEXAS INSTRUMENTS**

# Addressing Today's A/V Lip-Sync Problem with 1394

## Today's CE Cluster

- Lip-Sync issue when audio decoded in separate box from video

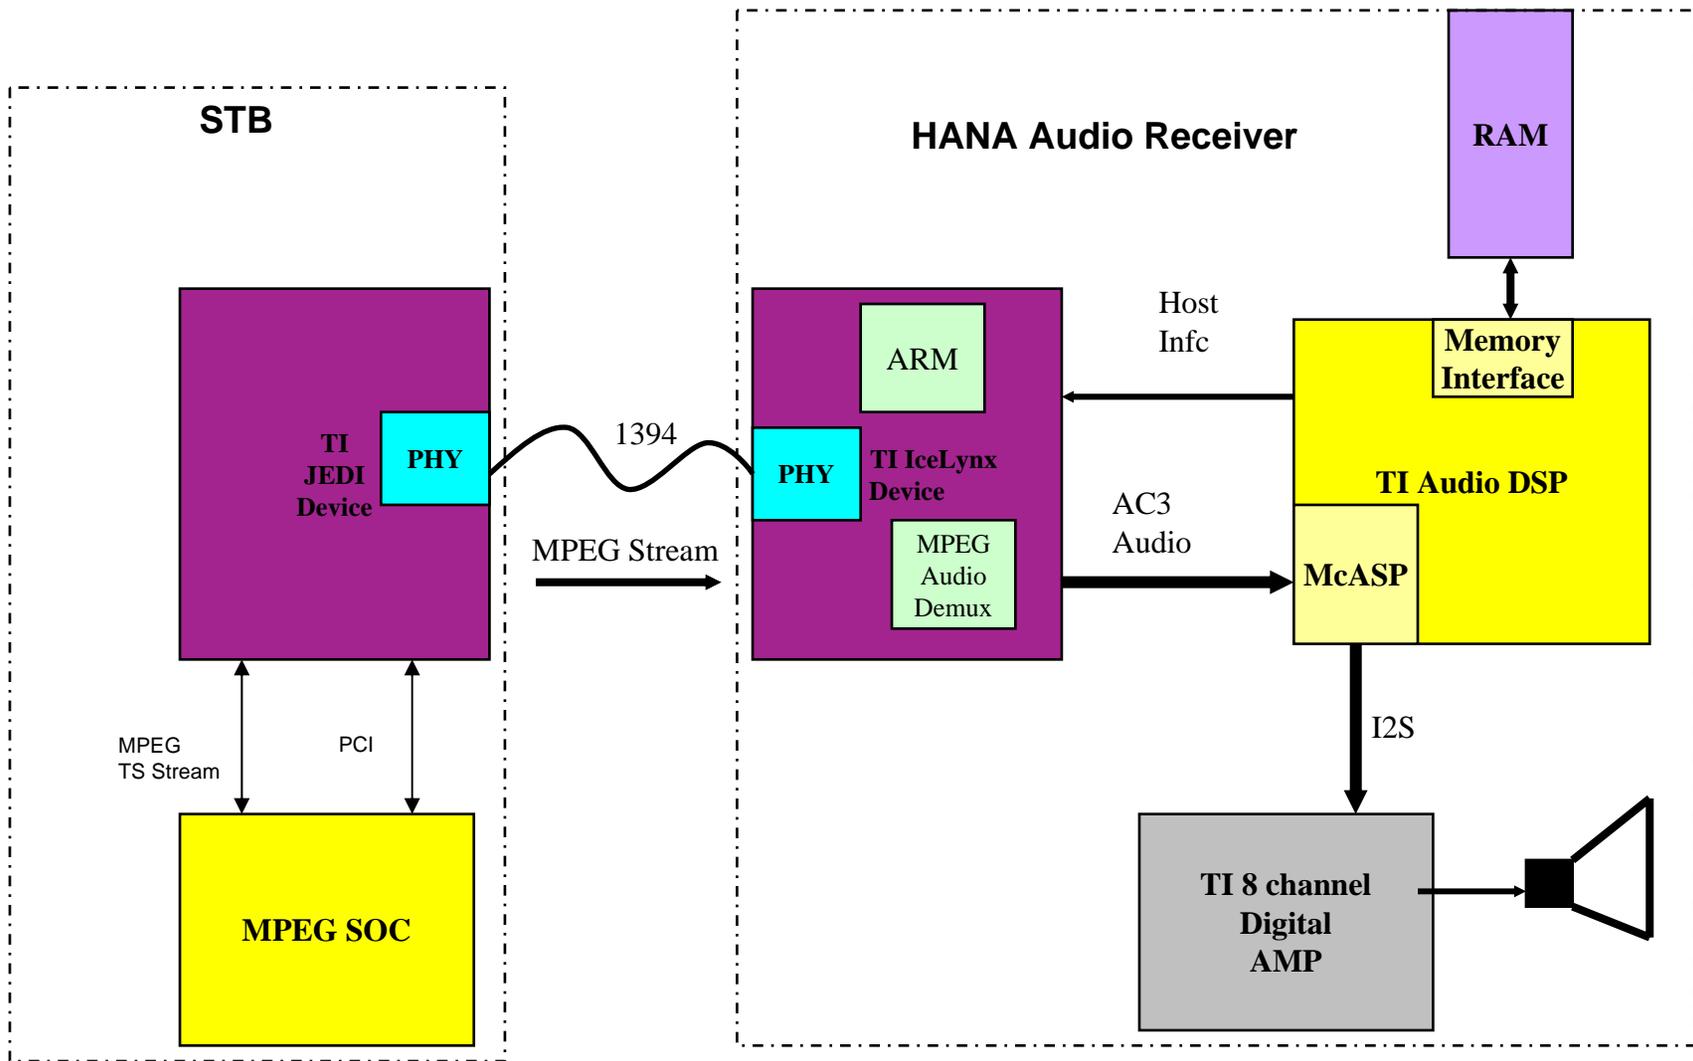

## 1394 CE Cluster

Video decoded here for display via HDMI

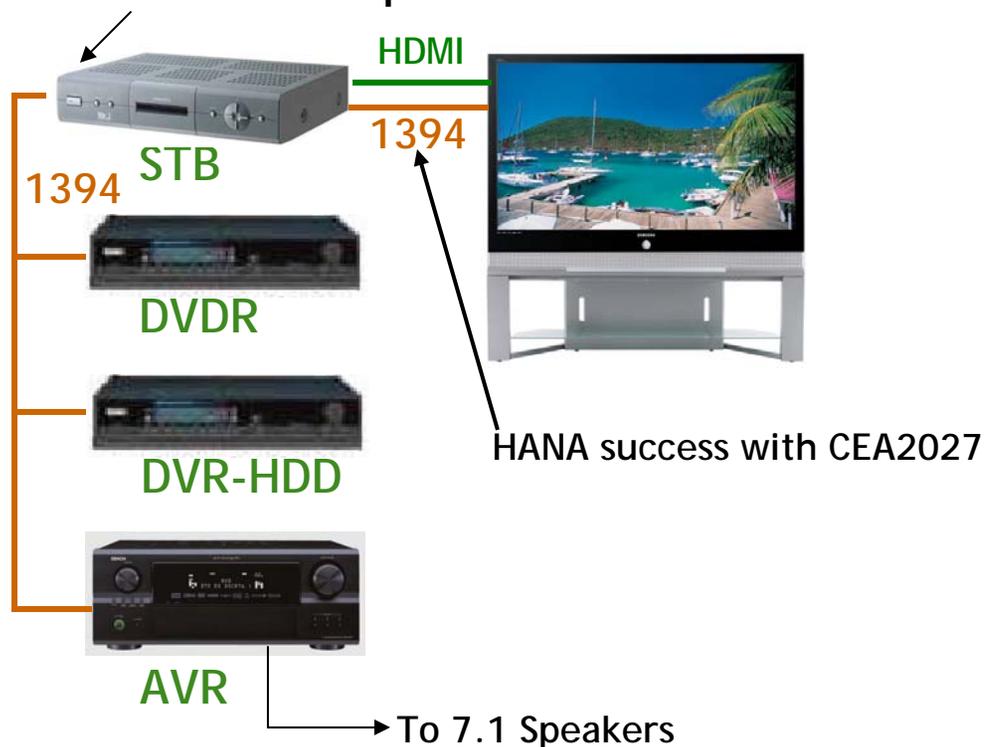

- Network nature of 1394 allows boxes to adjust out decoder delays
- No more lip-sync.....

# 1394 Connection Between STB and Audio Receiver

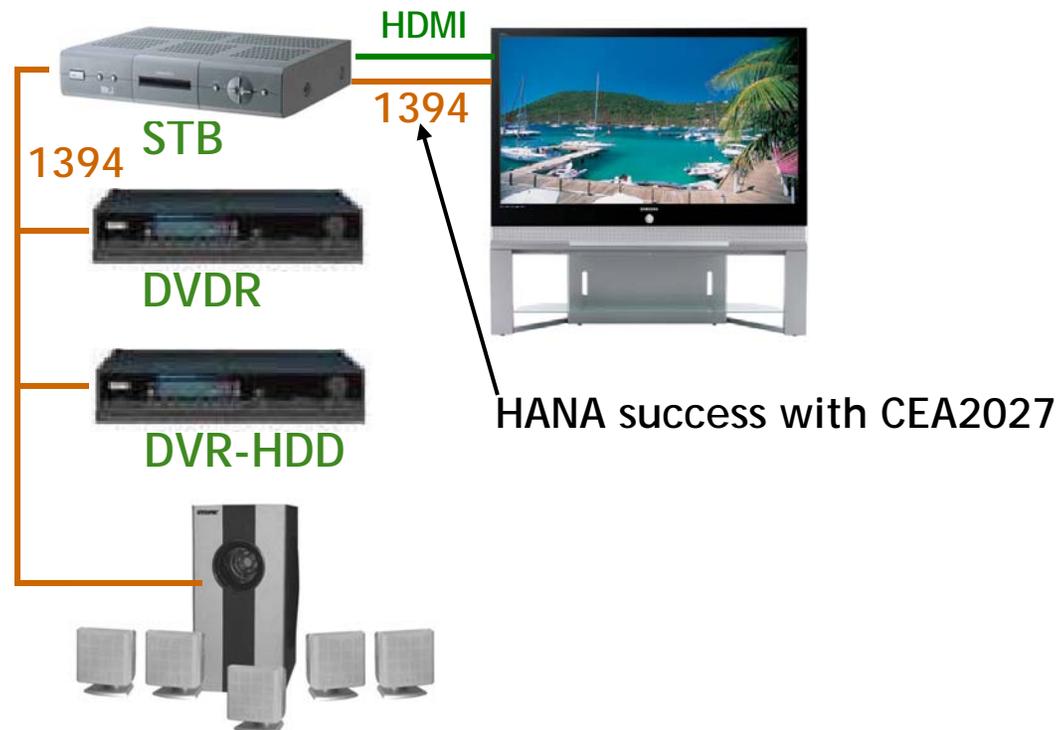

## Low Cost 1394 CE Cluster for HD recording and solving lip-sync issues

- It is not required that STB decodes surround sound audio

- MPEG stays compressed for recording and storage.
- Eliminates need for decoder in DVDR and DVR-HDD
- Audio can either be decoded with video and provided to AVR as 8 discrete channels or 1394 chip within AVR can demux audio from video and provide to audio decoder

## Low Cost 1394 CE Cluster for HD recording and solving lip-sync issues

- Audio decode and 6 or 8 channel audio DAC/amplification in subwoofer
- Sub serves up GUI to TV via CES2027 specification
- A/V source switching and audio control performed via TV remote

## External HDD recording with 1394

DVD CCA announcement on download to burn solution

<http://www.dvdcca.org/data/css/DVDCCArecordrlsFINAL.pdf>

### 1394 CE Cluster

- Reduce Capex due to internal HDD removal
- Can daisy chain multiple AVHDDs
- AVHDD can be securely locked to STB

# Call to Actions

- ◆ **Come by the demo**
- ◆ **[www.hanaalliance.org](http://www.hanaalliance.org)**
- ◆ **[www.1394ta.org](http://www.1394ta.org)**
- ◆ **Expect HANA based products at the end of the year**

**HD Networking Simplified:  
One Cable. One Remote. No new Cables**

Where others only promise...  
**HANA Delivers**
