Texas Instruments innovation challenge Korean MCU design contest 2013

다양하고 혁신적인 제품 개발 아이디어

참신하고 기발한 아이디어

우승의 기회를 잡으세요

응모자격

TI MCU에 관심 있는 전국의 공학 관련 대학 및 대학원생
- 개인 또는 5인 이하의 팀

공모일정

- 온라인등록 및 제안서 제출 기간: 4월 1일(월) - 6월 30일(일)
- 최종 리포트 제출 마감: 9월 30일(월)
- 1차 심사 결과 발표: 10월 31일(목)
- 2차 12팀 프레젠테이션 최종심사 및 시상식: 11월(일시 및 장소 추후 공지)

심사기준

TI MCU의 활용도, 디자인의 창의성, 완성도, 난이도, 실용성

MSP430, C2000, Stellaris LaunchPad를 기반으로 제안서를
제출하고 해당 LaunchPad를 무료로 받아보세요!

시상내역

- 대 상 (1팀): 상금 200만원
- 최우수상 (2팀): 상금 각 150만원
- 우 수 상 (3팀): 상금 각 100만원
- 장 려 상 (4팀): 상금 각 50만원
- 블로그상 (2팀): 상금 각 50만원
- * 모든 수상팀에게 상패 및 상장 수여
- * 2차 심사 참가생 전원에게 기념품 제공

입사지원혜택

대상, 최우수상, 우수상 수상자에 한하여 TI 코리아 공채 지원 시
서류전형 가산점 부여

IMPORTANT NOTICE

Texas Instruments Incorporated and its subsidiaries (TI) reserve the right to make corrections, enhancements, improvements and other changes to its semiconductor products and services per JESD46, latest issue, and to discontinue any product or service per JESD48, latest issue. Buyers should obtain the latest relevant information before placing orders and should verify that such information is current and complete. All semiconductor products (also referred to herein as "components") are sold subject to TI's terms and conditions of sale supplied at the time of order acknowledgment.

TI warrants performance of its components to the specifications applicable at the time of sale, in accordance with the warranty in TI's terms and conditions of sale of semiconductor products. Testing and other quality control techniques are used to the extent TI deems necessary to support this warranty. Except where mandated by applicable law, testing of all parameters of each component is not necessarily performed.

TI assumes no liability for applications assistance or the design of Buyers' products. Buyers are responsible for their products and applications using TI components. To minimize the risks associated with Buyers' products and applications, Buyers should provide adequate design and operating safeguards.

TI does not warrant or represent that any license, either express or implied, is granted under any patent right, copyright, mask work right, or other intellectual property right relating to any combination, machine, or process in which TI components or services are used. Information published by TI regarding third-party products or services does not constitute a license to use such products or services or a warranty or endorsement thereof. Use of such information may require a license from a third party under the patents or other intellectual property of the third party, or a license from TI under the patents or other intellectual property of TI.

Reproduction of significant portions of TI information in TI data books or data sheets is permissible only if reproduction is without alteration and is accompanied by all associated warranties, conditions, limitations, and notices. TI is not responsible or liable for such altered documentation. Information of third parties may be subject to additional restrictions.

Resale of TI components or services with statements different from or beyond the parameters stated by TI for that component or service voids all express and any implied warranties for the associated TI component or service and is an unfair and deceptive business practice. TI is not responsible or liable for any such statements.

Buyer acknowledges and agrees that it is solely responsible for compliance with all legal, regulatory and safety-related requirements concerning its products, and any use of TI components in its applications, notwithstanding any applications-related information or support that may be provided by TI. Buyer represents and agrees that it has all the necessary expertise to create and implement safeguards which anticipate dangerous consequences of failures, monitor failures and their consequences, lessen the likelihood of failures that might cause harm and take appropriate remedial actions. Buyer will fully indemnify TI and its representatives against any damages arising out of the use of any TI components in safety-critical applications.

In some cases, TI components may be promoted specifically to facilitate safety-related applications. With such components, TI's goal is to help enable customers to design and create their own end-product solutions that meet applicable functional safety standards and requirements. Nonetheless, such components are subject to these terms.

No TI components are authorized for use in FDA Class III (or similar life-critical medical equipment) unless authorized officers of the parties have executed a special agreement specifically governing such use.

Only those TI components which TI has specifically designated as military grade or "enhanced plastic" are designed and intended for use in military/aerospace applications or environments. Buyer acknowledges and agrees that any military or aerospace use of TI components which have **not** been so designated is solely at the Buyer's risk, and that Buyer is solely responsible for compliance with all legal and regulatory requirements in connection with such use.

TI has specifically designated certain components as meeting ISO/TS16949 requirements, mainly for automotive use. In any case of use of non-designated products, TI will not be responsible for any failure to meet ISO/TS16949.
