New Product Update: Wi-SUN FAN 1.0 – Quick start to TI full stack

Rogério Almeida

September 2021

Agenda

- Overview of TI SW solutions
- Wi-SUN Overview
 - FAN 1.0
 - FAN 1.1
- TI Solutions for Wi-SUN
 - Certifications
 - Architecture options for smart meter
 - TI solution benefits
- Getting started with TI Wi-SUN FAN 1.0 solution
 - SDK
 - EVMs

Sub-1 GHz software solutions

IEEE 802.15.4: TI 15.4 Stack

Complete standards based star network
Low-power end nodes & gateway
Many RF PHYs to choose from for world-wide regulatory compliance & application needs

Wi-SUN

Standards-based robust mesh network, frequency hopping
Standards based multi-layer security & IPv6 protocol suite
Alliance: Promoter >300 members from 46 countries, 100M devices deployed WW

mioty

New standards-based LPWAN solution backed by major industry players including TI
Up to 5km in urban / 15km in rural areas
Low data rate, low power network

TI's long range offering

Wireless M-BUS

Only European standard for metering
Sub-1GHz star network with long range using 433MHz / 868MHz
Multiple options to suit your meter with wireless network processor or single SoC

Dual-band

Adding BLE to a Sub-1 GHz stack significantly streamlines device configuration & OTA firmware updates

Amazon Sidewalk

Leverages the 900 MHz band to create a long-range, low-power home network to extend the range of low-bandwidth devices beyond the home Wi-Fi network

Sub-1 GHz software solutions

IEEE 802.15.4: TI 15.4 Stack

Complete standards based solution
Low-power end nodes
Many RF PHYs to choose from for various regulatory compliance & applications

miotiv

New standards-based LPWAN solution
backed by major industry players

Up to 5km in urban / 15km in rural
Low data rate, low power

Dual-band

Adding BLE to a Sub-1 GHz solution
significantly streamlines device
configuration & OTA firmware updates

Wi-SUN

Standards-based robust mesh network, frequency

multi-layer security & IPv6 protocol

members from 46 countries, 95M
deployed WW

Wireless M-BUS

only European standard for metering
1GHz star network with long range
33MHz / 868MHz
options to suit your meter with
network processor or single SoC

Amazon Sidewalk

averages the 900 MHz band to create a
long-range, low-power home network to
extend the range of low-bandwidth devices
beyond the home Wi-Fi network

Wi-SUN | Resilient & secure mesh network

What is Wi-SUN?

- Wireless protocol Alliance with 300+ members from 46 countries
- IPv6 protocol suite with multi-layer security
- Key applications include smart utilities, smart grid, smart city, connected street & traffic lights

Benefits

- Self-healing mesh network with frequency hopping providing high level of robustness
- Sub-1GHz frequency bands with dedicated PHYs per region for longest range
- Certified products with multi-vendor interoperability

TI Advantage

- Cost optimized, small solution – lowest flash footprint
- Extremely low standby current (0.85uA)
- Highly efficient integrated PA (25% lower TX current at +20dBm vs. market)
- Seamless HW migration to larger memory devices for complete network solution

Getting Started

- Build a rapid prototype with \$30 [LaunchPad SensorTag](#)

- Expand to full development with [LaunchPads](#)

Applications

Wi-SUN Alliance – Key Focus areas

- **FAN (Field Area Network)** : Sub 1GHz Mesh solution across – Global coverage
 - Connecting a large number of devices for Smart Metering, Street lighting etc..
 - FAN1.0 – Only supports FSK data rate, non-sleepy devices
 - FAN1.1 - Supports sleepy end devices (water meter / gas meter), multi-rate, additional 800MHz and 900MHz region support, Japan, Brazil, EU and NA to include regional 2FSK PHYs and regional OFDM PHYs
- **HAN (Home Area Network)** : direct & 1-hop link – Japan
 - Connecting electricity meter (already part of some WAN like cellular network) to a HEMS (Home energy management system) and then to devices inside home

Wi-SUN 1.0 Certifications

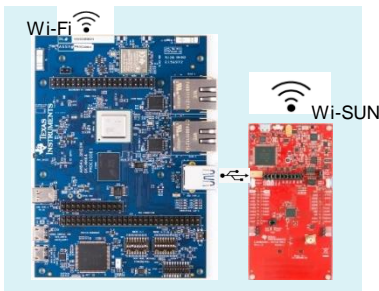

- Wi-SUN PHY Certification
 - Regions: North America, Brazil, Europe, India, Singapore
 - Devices: CC13x2R1, CC13x2P1, CC13x2R7, CC13x2P7
 - Modes: 1a, 1b, 2a, 3
- Wi-SUN Router Certification
 - Region: North America, Brazil
 - Devices: CC13x2R1, CC13x2P1, CC13x2R7, CC13x2P7
- Wi-SUN Border Router Certification
 - Region: North America, Brazil
 - Devices: CC13x2R7, CC13x2P7

Table 3-1. Wi-SUN® PHYs and TI Support Overview

| Symbol Rate (ksymbol/s) | Modulation Index | Wi-SUN® Mode | Frequency Bands | Regulatory Compliance Targets | Mandatory Wi-SUN® FAN 1.0 PHY | Support |
|-------------------------|------------------|--------------|-----------------|-------------------------------|-------------------------------|-------------------|
| 50 | 0.5 | #1a | EU | EN300 220 | Yes | Yes |
| | 1.0 | #1b | NA | FCC 15.247 | Yes | Yes |
| 100 | 0.5 | #2a | EU and NA | EN300 220 FCC 15.247 | Yes | Yes |
| | 1.0 | #2b | JP | ARIB STD-108 | No | Yes |
| 150 | 0.5 | #3 | NA and JP | FCC 15.247 ARIB STD-T108 | Yes | Yes |
| 200 | 0.5 | #4a | NA | FCC15.247 | No | Yes |
| | 1.0 | #4b | JP | ARIB STD-T108 | No | Yes |
| 300 | 0.5 | #5 | NA and JP | FCC15.247 ARIB STD-T108 | No | No (Coming later) |

Competitive analysis

- TI is addressing the growing WI-SUN market by releasing a portfolio of SW and HW products ranging from 352K of Flash up to 1M of Flash along with a comprehensive SW offering of PHY/MAC and FAN level deliverables.
- We have a comprehensive certification strategy where we certify our products at the WI-SUN alliance at all 3 levels.
- Low-cost development kits are be available world wide for initial development

Wi-SUN Border Router

| | TI | Comp A | Comp B |
|-----------------------|-------------------------|-----------------------------|-----------------------------|

48-pin VQFN
28 GPIOs

Expanded memory with CC1312R7 & CC1352P7

CC13xxP/CC26xxP

Key Features

Teal text = Changes vs CC13x2

RF Performance

- Excellent RF performance: upto 130dBm link budget @ 50kbps, 868 MHz
- Narrowband long range: upto 141dBm link budget @ 2.5kbps, 868 MHz
- Bluetooth 5 LE coded PHY with -105dBm sensitivity
- Sub-1GHz, 2.4 GHz and true dual band support with dedicated RF ports
- BLE 5, Zigbee, Thread and 2.4ghz proprietary protocol support
- +20 dBm power amplifier with industry lowest power consumption
- 868 MHz, 915Mhz, 433Mhz, 169 Mhz and 2.4Ghz ISM band support

MCU

- Powerful ARM Cortex-M4F @ 48Mhz
- 704 kB dual-bank Flash memory + 256 KB ROM
- Components in ROM: 15.4 MAC, RTOS & drivers
- 144kB ultra low leakage SRAM protected by parity for low soft error rate

Security

- Crypto hardware acceleration, AES-128/256, SHA-256, ECC, RSA-2048)

Ultra Low power

- MCU: 2.9 mA at 48MHz
- RX: 5.8 mA (868 MHz)
- TX at +14 dBm: 24.9 mA (868 MHz)
- Standby: 0.95 µA (RTC on, 144KB RAM and CPU retention)
- Shutdown: 150 nA (wakeup on external events)
- Ultra-low power sensor controller

Devices & Package

- CC1312R7: Sub1-Ghz wireless MCU with +14dBm TX
- CC1352P7: Dual-band wireless MCU with +20dBm TX
- 7x7mm QFN (upto 31 GPIOs) pin compatible with CC1310/11

TI Wi-SUN Development Kit – WWW.ti.com/wisun

Wi-SUN development kit includes TI CC1352P7 Launch Pads and AM64x based Linux border router running a simple web server for display of network topology and simple interaction (e.g. toggle LED)

CC1352P7 is recommended due integrated PA available, but customers can test it with CC1312R7 as well.

• Kit Contents

- 2x LAUNCHXL-CC1352P7 LaunchPad™ as Wi-SUN Nodes
- 1x LAUNCHXL-CC1352P7 LaunchPad™ as Wi-SUN Border Router
- 1x AM64 Starter Kit EVM as Wi-SUN Linux Border Router

Wi-SUN Border Router

Wi-SUN Nodes
