Sub-1 GHz RF Value Line

Low-cost device family based on low-power CC1101 RF technology

TI's Sub-1GHz RF value line family offers developers low-cost connectivity solutions for sub-1 GHz RF applications such as remote controls, toys, home and building automation, and security systems. The CC110L transceiver, CC113L receiver and CC115L transmitter devices are all based on TI's Sub-1 GHz CC1101 RF technology, and are pin-, register- and code-compatible, as well as backwards compatible with existing sub-1 GHz systems. In high volume, the RF value line offers a two-chip, one-way RF link for less than USD $1.00.

The Sub-1 GHz RF value line includes new low-cost reference designs, with a compact PCB antenna for 433, 868, 915 MHz, featuring a reduced component count and complete designs ready for FCC and ETSI certification. The small-size, compact PCB helix antenna represents only a quarter of the size of previous PCB antennas, and is useful for applications requiring high antenna efficiency in a compact area.

Development Kits

The CC11xLDK-868-915 and CC11xLEMK-433 development kits provide complete hardware performance testing and software development platforms for the Sub-1 GHz RF Value Line product family.

Sub-1 GHz RF Value Line

Low-cost device family based on low-power CC1101 RF technology

Key Features

- $1.00 price tag on transmitter + receiver bundle
- Low-cost reference design with compact PCB antenna
- Fast startup-time with 0.24ms from power down to RX or TX
- 0.2 µA sleep current
- Supports multiple modulation formats with 2-FSK, 4-FSK, GFSK and OOK.
- Programmable data rate from 0.6 to 600kbps
- Supports multiple frequency bands: 300-348, 387–464 and 779– 928 MHz
- All value line devices are pin-, register- and code-compatible
- Seamless integration with CC1190 range extender:
  - Up to +27 dBm output power and 120 dBm sensitivity
  - Up to +20 dBm output power without frequency hopping (FHSS) under FCC regulations

Key Benefits

- Complete one-way RF link for USD $1.00 in high volume
- 50% cost reduction on external components
- Complete design ready for FCC and ETSI certification
- Low power, long battery life time
- Enables battery-operated meters to last for 10+ years
- Flexible and backwards compatible with existing sub-1 GHz systems
- Easy to switch between one-way and two-way solutions
- Long range communications, up to several kilometers
- Solid RF link

Sub-1 GHz wireless connectivity plug-in board for MSP430 LaunchPad

Based on the CC110L sub-1 GHz RF value line transceiver, the 430BOOST-CC110L RF BoosterPack is a low-cost wireless connectivity plug-in board for the MSP430 LaunchPad development kit - an easy-to-use, affordable, and scalable introduction to the world of microcontrollers and the MSP430 family. Snap the 430BOOST-CC110L RF BoosterPack onto your LaunchPad and you are all set for adding wireless capabilities to MSP430-based designs.

The RF BoosterPack includes an ETSI-compliant and FCC certified module integrating TI’s CC110L sub-1 GHz RF value line transceiver, passive components and compact PCB antenna. For more information, visit www.ti.com/rfboosterpack
IMPORTANT NOTICE

Texas Instruments Incorporated and its subsidiaries (TI) reserve the right to make corrections, modifications, enhancements, improvements, and other changes to its products and services at any time and to discontinue any product or service without notice. Customers should obtain the latest relevant information before placing orders and should verify that such information is current and complete. All products are sold subject to TI's terms and conditions of sale supplied at the time of order acknowledgment.

TI warrants performance of its hardware products to the specifications applicable at the time of sale in accordance with TI's standard warranty. Testing and other quality control techniques are used to the extent TI deems necessary to support this warranty. Except where mandated by government requirements, testing of all parameters of each product is not necessarily performed.

TI assumes no liability for applications assistance or customer product design. Customers are responsible for their products and applications using TI components. To minimize the risks associated with customer products and applications, customers should provide adequate design and operating safeguards.

TI does not warrant or represent that any license, either express or implied, is granted under any TI patent right, copyright, mask work right, or other TI intellectual property right relating to any combination, machine, or process in which TI products or services are used. Information published by TI regarding third-party products or services does not constitute a license from TI to use such products or services or a warranty or endorsement thereof. Use of such information may require a license from a third party under the patents or other intellectual property of TI.

Reproduction of TI information in TI data books or data sheets is permissible only if reproduction is without alteration and is accompanied by all associated warranties, conditions, limitations, and notices. Reproduction of this information with alteration is an unfair and deceptive business practice. TI is not responsible or liable for such altered documentation. Information of third parties may be subject to additional restrictions.

Resale of TI products or services with statements different from or beyond the parameters stated by TI for that product or service voids all express and implied warranties for the associated TI product or service and is an unfair and deceptive business practice. TI is not responsible or liable for any such statements.

TI products are not authorized for use in safety-critical applications (such as life support) where a failure of the TI product would reasonably be expected to cause severe personal injury or death, unless officers of the parties have executed an agreement specifically governing such use. Buyers represent that they have all necessary expertise in the safety and regulatory ramifications of their applications, and acknowledge and agree that they are solely responsible for all legal and regulatory requirements concerning such use. Buyers represent that they have all necessary expertise in the safety and regulatory ramifications of their applications, and acknowledge and agree that they are solely responsible for all legal and regulatory requirements concerning such use. Buyers must fully indemnify TI and its representatives against any damages arising out of the use of TI products in such safety-critical applications.

TI products are neither designed nor intended for use in military/aerospace applications or environments unless the TI products are specifically designated by TI as military-grade or "enhanced plastic." Only products designated by TI as military-grade meet military specifications. Buyers acknowledge and agree that any such use of TI products which TI has not designated as military-grade is solely at the Buyer's risk, and that they are solely responsible for compliance with all legal and regulatory requirements in connection with such use. TI products are neither designed nor intended for use in automotive applications or environments unless the specific TI products are designated by TI as compliant with ISO/TS 16949 requirements. Buyers acknowledge and agree that, if they use any non-designated products in automotive applications, TI will not be responsible for any failure to meet such requirements.
