

C6455 DSP Power Scheme C6455 x 6

Notes: Capacitance Vout 1.2V
 1. Recommended the 4-5 x 680 uf on the output bus for 1.2V.
 ESR ≤ 0.005mΩ for each Capacitor to insure compliance with ≤ 3% limit on Voltage tolerance limits.
 2. Required to follow the DSP processor quantity and types plus location of ceramic capacitors on the DSP pins.
