

Visit us at **IMS 2014** in Tampa Bay, FL **Booth 2041**

Contact your local TI sales representative to schedule a private meeting at TI's booth ([#2041](#)).

Join Texas Instruments (TI) engineers at the 2014 International Microwave Symposium (IMS)! Experts will be on hand to demonstrate and discuss TI's class-leading data converters, amplifiers, mixers, modulators, gain blocks, PLL/VCOs and clock jitter cleaners. TI demonstrations will include six key focus areas:

Wideband RF gain block amplifiers

TI's integrated power down removes an external switch

- 40M – 6GHz
- Low power
- Integrated power down control
- Internally matched 50 Ohm
- Cascade-able
- Tiny 2mm x 2mm WSON package
- NiPdAu lead frame – no tin (Sn)
- [Click for more information](#)

Wideband DACs, modulators, clocks for transmitters

High-performance transmit solution

- [TRF3722](#): Modulator with PLL/VCO
- [LMK04828](#): First JESD204B-compliant clock cleaner
- [DAC38J84](#): World's fastest 16-bit DAC at 2.5GSPS

Wideband ADCs, VGAs, mixers, clocks for receivers

High-performance receiver solution

- [LMH6521](#): 2-channel digital variable gain amplifier
- [ADC16DX370](#): 2-channel 16-bit 370MSPS ADC
- [LMK04828](#): First JESD204B-compliant clock cleaner

RF PLLs and synthesizers

For communications, industrial, consumer and automotive applications

- Frequencies up to 14 GHz
- Low phase noise
- Fully integrated VCO's
- FM modulation – FSK, PSK, frequency ramp
- Fractional and integer mode
- Phase detector frequency to 200 MHz
- [Click for more information](#)

4GSPS 12-bit ADC with digital down converter

Ultra-wideband RF sampling subsystem

- [ADC12J4000](#): 12-bit 4GSPS ADC with integrated digital down-converter
- [TRF3765](#): 300M-4800MHz low noise PLL/VCO
- [LMK04828](#): First JESD204B-compliant clock cleaner

Power amplifier bias solutions

Highly integrated, low-power analog monitoring and control solutions for power amplifier biasing capable of current, temperature and voltage supervision

- Low-cost bias control circuit for power amplifiers
- Includes a multi-channel 12-bit ADC converter
- Eight 12-bit DACs
- Four high-side current sense amplifiers supporting common mode voltages from 4V-60V
- Supports LMOS, GaAs and GaN technologies

IMPORTANT NOTICE

Texas Instruments Incorporated and its subsidiaries (TI) reserve the right to make corrections, enhancements, improvements and other changes to its semiconductor products and services per JESD46, latest issue, and to discontinue any product or service per JESD48, latest issue. Buyers should obtain the latest relevant information before placing orders and should verify that such information is current and complete. All semiconductor products (also referred to herein as "components") are sold subject to TI's terms and conditions of sale supplied at the time of order acknowledgment.

TI warrants performance of its components to the specifications applicable at the time of sale, in accordance with the warranty in TI's terms and conditions of sale of semiconductor products. Testing and other quality control techniques are used to the extent TI deems necessary to support this warranty. Except where mandated by applicable law, testing of all parameters of each component is not necessarily performed.

TI assumes no liability for applications assistance or the design of Buyers' products. Buyers are responsible for their products and applications using TI components. To minimize the risks associated with Buyers' products and applications, Buyers should provide adequate design and operating safeguards.

TI does not warrant or represent that any license, either express or implied, is granted under any patent right, copyright, mask work right, or other intellectual property right relating to any combination, machine, or process in which TI components or services are used. Information published by TI regarding third-party products or services does not constitute a license to use such products or services or a warranty or endorsement thereof. Use of such information may require a license from a third party under the patents or other intellectual property of the third party, or a license from TI under the patents or other intellectual property of TI.

Reproduction of significant portions of TI information in TI data books or data sheets is permissible only if reproduction is without alteration and is accompanied by all associated warranties, conditions, limitations, and notices. TI is not responsible or liable for such altered documentation. Information of third parties may be subject to additional restrictions.

Resale of TI components or services with statements different from or beyond the parameters stated by TI for that component or service voids all express and any implied warranties for the associated TI component or service and is an unfair and deceptive business practice. TI is not responsible or liable for any such statements.

Buyer acknowledges and agrees that it is solely responsible for compliance with all legal, regulatory and safety-related requirements concerning its products, and any use of TI components in its applications, notwithstanding any applications-related information or support that may be provided by TI. Buyer represents and agrees that it has all the necessary expertise to create and implement safeguards which anticipate dangerous consequences of failures, monitor failures and their consequences, lessen the likelihood of failures that might cause harm and take appropriate remedial actions. Buyer will fully indemnify TI and its representatives against any damages arising out of the use of any TI components in safety-critical applications.

In some cases, TI components may be promoted specifically to facilitate safety-related applications. With such components, TI's goal is to help enable customers to design and create their own end-product solutions that meet applicable functional safety standards and requirements. Nonetheless, such components are subject to these terms.

No TI components are authorized for use in FDA Class III (or similar life-critical medical equipment) unless authorized officers of the parties have executed a special agreement specifically governing such use.

Only those TI components which TI has specifically designated as military grade or "enhanced plastic" are designed and intended for use in military/aerospace applications or environments. Buyer acknowledges and agrees that any military or aerospace use of TI components which have **not** been so designated is solely at the Buyer's risk, and that Buyer is solely responsible for compliance with all legal and regulatory requirements in connection with such use.

TI has specifically designated certain components as meeting ISO/TS16949 requirements, mainly for automotive use. In any case of use of non-designated products, TI will not be responsible for any failure to meet ISO/TS16949.
