

Mobile Internet Devices: Market overview

Seshu Madhavapeddy

General Manager, Mobile Internet Device Business Unit
Texas Instruments

Jim McGregor

Principal Analyst and Research Director
In-Stat

Introduction

- **Welcome to the Mobile Internet Device (MID) webinar series featuring:**
 - MID Market Overview – 6/26/08
 - MID Architectures – 8/7/08
 - MID Business Models – September (TBD)
 - MID Ecosystem – November (TBD)
- **Today's host:**
 - Tracy Wright, TI Media Relations
- **20-30 minute market overview followed by live Q&A**
- **Archive of webinar available at:**
 - <http://events.variview.net/clients/ti/20080626/>
 - www.instat.com

Presenters

■ Seshu Madhavapeddy

- General Manager, Mobile Internet Device Business Unit, Texas Instruments
- Joined TI in 2008
- Former president, CEO and founder of various technology start-up companies
- Guides TI's MID business strategy, software and hardware platforms, strategic partnerships and customer relationships

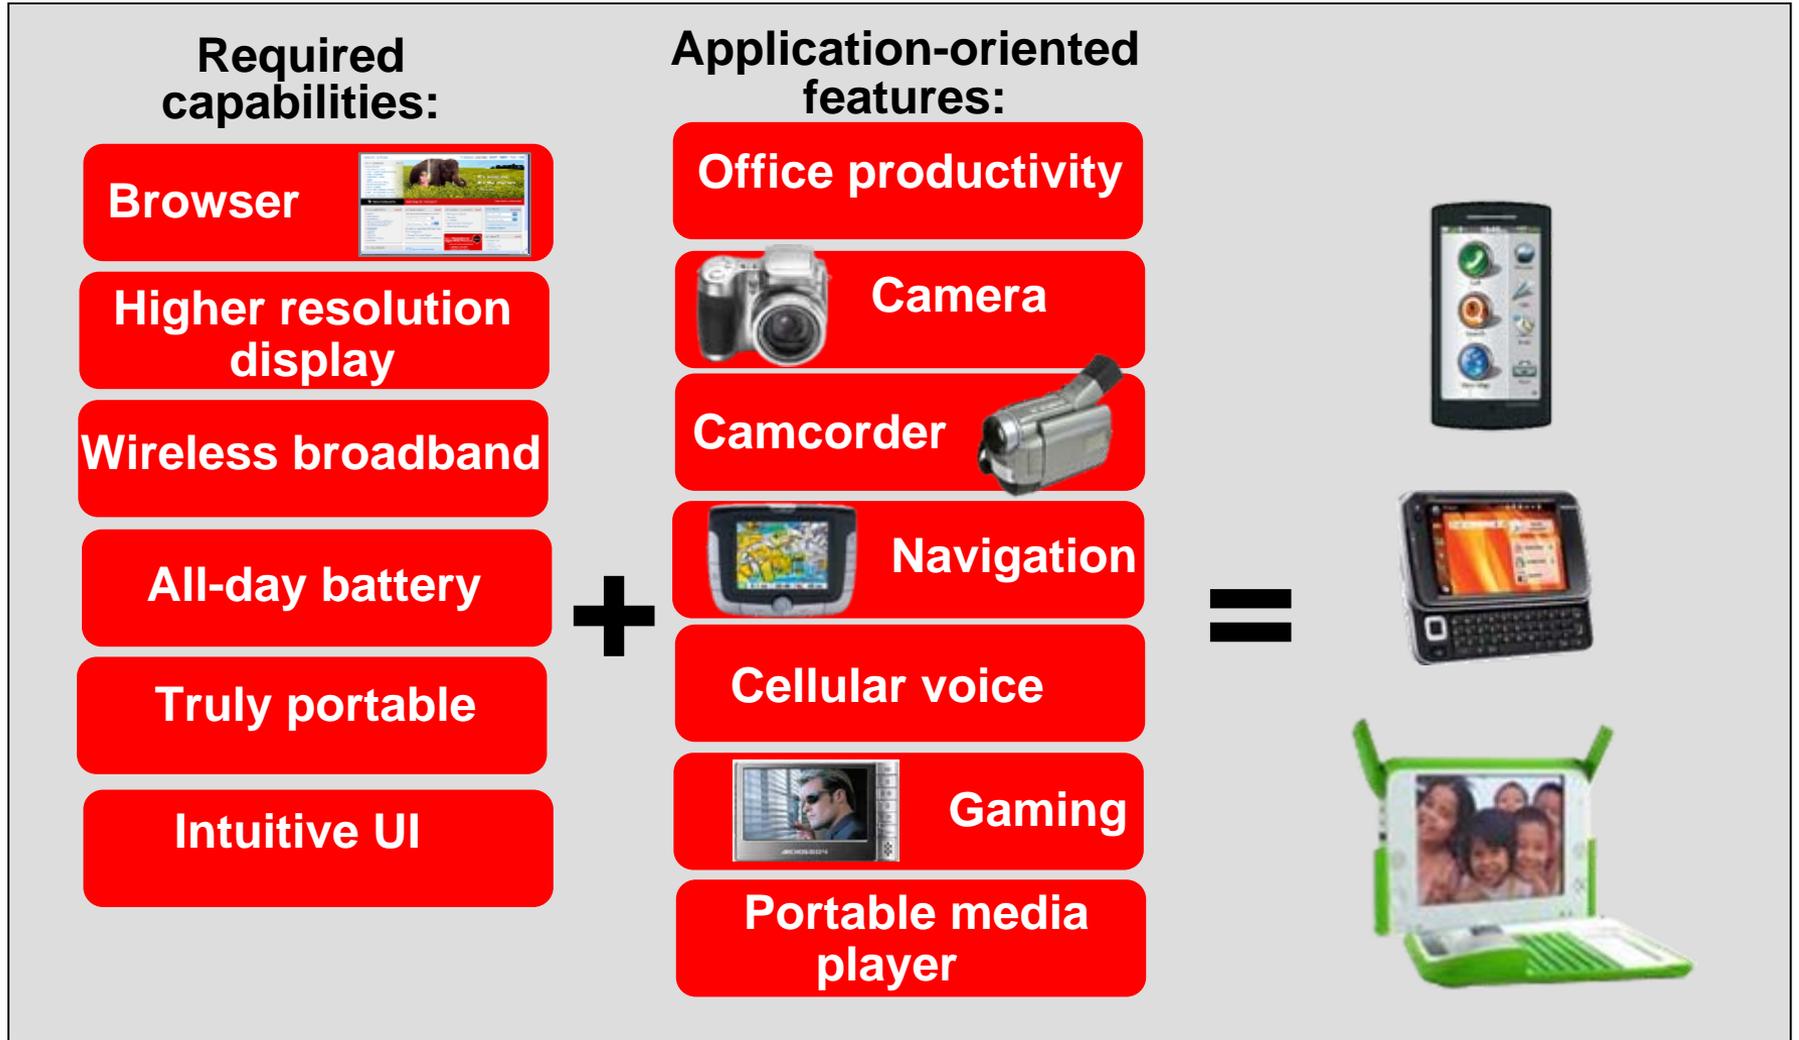

■ Jim McGregor

- Principal Analyst and Research Director, In-Stat
- Joined In-Stat in 2004
- 20+ years experience in the semiconductor and electronics industry
- Focused on emerging semiconductor and systems technology
- Background in systems and software engineering plus an MBA and experience in several business and management roles

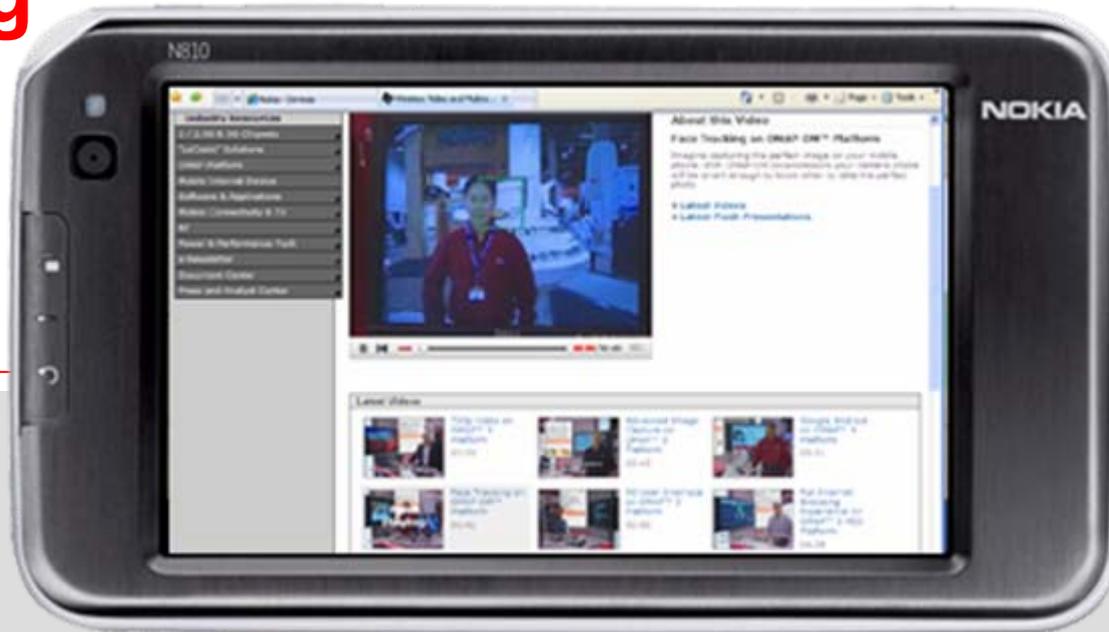

Presentation overview

- **What is a Mobile Internet Device?**
- **What is the MID market potential?**
- **Is the time right for MIDs?**
- **What challenges lie ahead?**

What is a Mobile Internet Device (MID)?

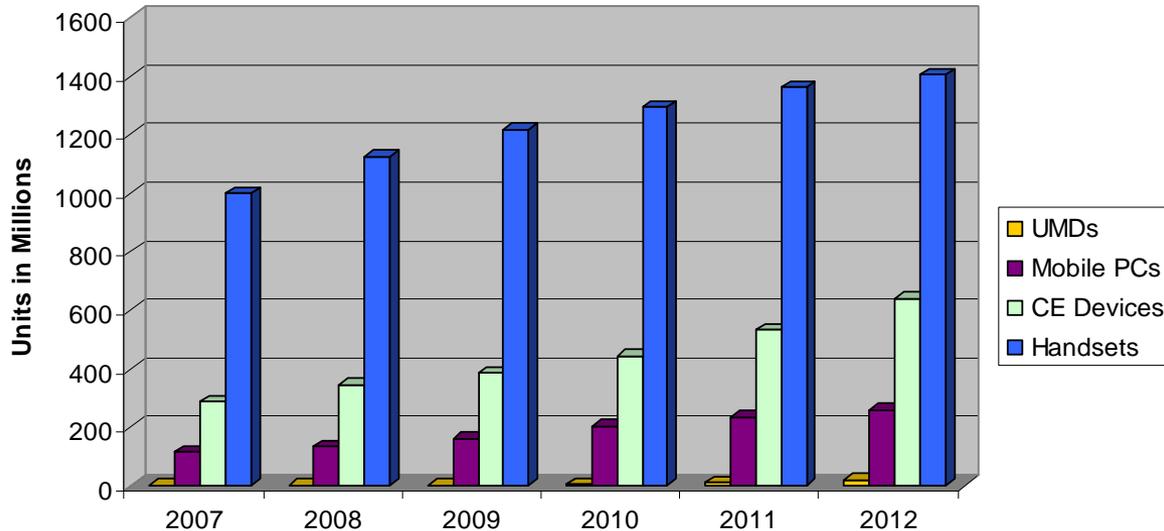

MIDs must deliver “no compromise” Internet browsing

- Display full web page
- All plug-ins and font types
- Intuitive zoom in and out
- Performance equaling PC w/ broadband

Demand for mobile Internet is increasing

WW Mobile Internet Applications

Source: In-Stat, 6/08

3 distinct vendor categories:

- Smartphone vendors
- PC notebook vendors
- CE handheld vendors

3 distinct form factors of MIDs:

- Pocket MIDs
- Tablets
- Net-books

	Pocket MIDs	Tablets	Net-books	Vendor share
Smartphone vendors	● →			60%
PC notebook vendors		←	●	25%
CE handheld vendors	←	●	→	15%
MID type share	70%	10%	20%	

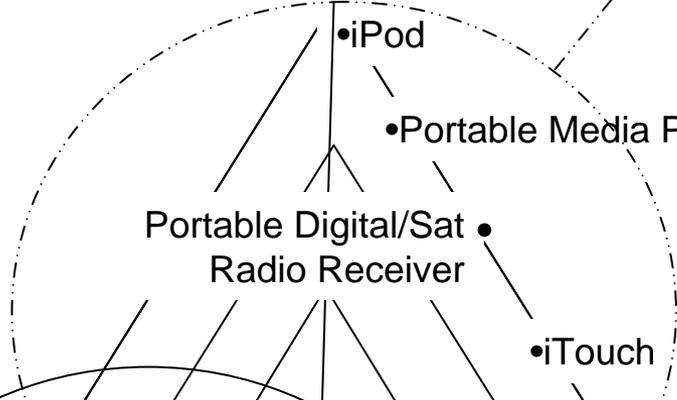

Multiple form factors evolving into MIDs

Consumer Electronics

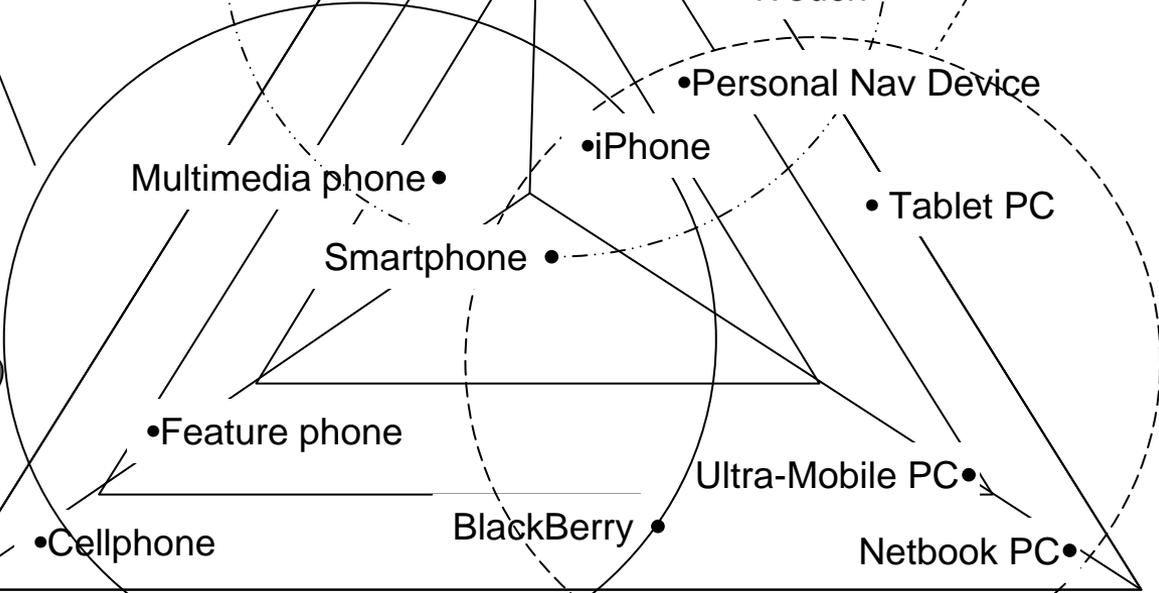

Portable Entertainment Devices

Ultra Mobile Devices

Cellular Devices

Computing

Cellular

Why now?

- **New usage models +**
 - **The move to a mobile society**
 - **Change in Internet information**
 - The old Internet – unidirectional information
 - The new Internet – bi-directional rich data content
 - **Change in Internet usage**
 - Communication + Computing + Entertainment
 - Gaming, social networking, video, etc.
- **New Technologies +**
 - **High-performance/low-power processors**
 - **High-performance graphics (DX-10+)**
 - **Advanced UI, browsers and applications using hosted applications & data**
 - **Access to wireless broadband**
- **New business models =**

Major market inflection points within 5 years

In-Stat

MIDs drive changes in business models: content and service delivery is crucial

Key industry challenges

- **Communications**
 - Support of multiple communication standards will be required
- **Battery technology**
 - No revolutionary battery solution in the near-term
 - Silicon technology must compensate
- **Business models**
 - How do all participants make money working together?
- **No one size fits all!**
 - Moving from geographic requirements to personal requirements
 - Plethora of solutions aimed at different applications and usage models

Summary

- **Demand for mobile Internet and consumer electronics functionality on the rise**
- **New usage models and technologies fueling rapid market growth**
- **Challenges to MID market include:**
 - **Communications**
 - **Battery life**
 - **Business models**
 - **No one size fits all**

IMPORTANT NOTICE

Texas Instruments Incorporated and its subsidiaries (TI) reserve the right to make corrections, modifications, enhancements, improvements, and other changes to its products and services at any time and to discontinue any product or service without notice. Customers should obtain the latest relevant information before placing orders and should verify that such information is current and complete. All products are sold subject to TI's terms and conditions of sale supplied at the time of order acknowledgment.

TI warrants performance of its hardware products to the specifications applicable at the time of sale in accordance with TI's standard warranty. Testing and other quality control techniques are used to the extent TI deems necessary to support this warranty. Except where mandated by government requirements, testing of all parameters of each product is not necessarily performed.

TI assumes no liability for applications assistance or customer product design. Customers are responsible for their products and applications using TI components. To minimize the risks associated with customer products and applications, customers should provide adequate design and operating safeguards.

TI does not warrant or represent that any license, either express or implied, is granted under any TI patent right, copyright, mask work right, or other TI intellectual property right relating to any combination, machine, or process in which TI products or services are used. Information published by TI regarding third-party products or services does not constitute a license from TI to use such products or services or a warranty or endorsement thereof. Use of such information may require a license from a third party under the patents or other intellectual property of the third party, or a license from TI under the patents or other intellectual property of TI.

Reproduction of TI information in TI data books or data sheets is permissible only if reproduction is without alteration and is accompanied by all associated warranties, conditions, limitations, and notices. Reproduction of this information with alteration is an unfair and deceptive business practice. TI is not responsible or liable for such altered documentation. Information of third parties may be subject to additional restrictions.

Resale of TI products or services with statements different from or beyond the parameters stated by TI for that product or service voids all express and any implied warranties for the associated TI product or service and is an unfair and deceptive business practice. TI is not responsible or liable for any such statements.

TI products are not authorized for use in safety-critical applications (such as life support) where a failure of the TI product would reasonably be expected to cause severe personal injury or death, unless officers of the parties have executed an agreement specifically governing such use. Buyers represent that they have all necessary expertise in the safety and regulatory ramifications of their applications, and acknowledge and agree that they are solely responsible for all legal, regulatory and safety-related requirements concerning their products and any use of TI products in such safety-critical applications, notwithstanding any applications-related information or support that may be provided by TI. Further, Buyers must fully indemnify TI and its representatives against any damages arising out of the use of TI products in such safety-critical applications.

TI products are neither designed nor intended for use in military/aerospace applications or environments unless the TI products are specifically designated by TI as military-grade or "enhanced plastic." Only products designated by TI as military-grade meet military specifications. Buyers acknowledge and agree that any such use of TI products which TI has not designated as military-grade is solely at the Buyer's risk, and that they are solely responsible for compliance with all legal and regulatory requirements in connection with such use.

TI products are neither designed nor intended for use in automotive applications or environments unless the specific TI products are designated by TI as compliant with ISO/TS 16949 requirements. Buyers acknowledge and agree that, if they use any non-designated products in automotive applications, TI will not be responsible for any failure to meet such requirements.
