

TI K-12 education partnerships

About TI and education:

Our top philanthropic priority at TI is the positive transformation of the K-12 public education system within the communities where we live and work.

- **In the U.S. our focus is science, technology, engineering and math (STEM),** and we especially work to increase these skills in under-resourced communities and among minority students and girls.
- Globally we support **increased access to education in TI site communities.**

In the past five years alone, TI and the TI Foundation have invested more than \$150 million to support education, including support for higher education, K-12 initiatives for students and teachers, and research.

In 2012 TI employees gave almost 45,700 hours of their time as volunteers to community organizations.

Partnerships:

Below are some of the organizations TI partners with that benefit K-12 education in Silicon Valley, California.

- California Alliance of African American Educators - Frank Greene Scholars Program
- Cupertino Education Endowment Foundation
- Eastside Union High School District
- Environmental Volunteers
- Family Giving Tree - Back to School Drive
- Fremont High Schools Foundation
- Girls Achieving in Non-traditional Subjects (GAINS)
- IEEE - TOPS of Santa Clara Valley
- Industry Initiatives For Science and Math Education
- InnVision Shelter Network Summer Camp Program
- National Coalition of 100 Black Women, Silicon Valley Chapter
- New Teacher Center
- Resource Area For Teaching (RAFT)
- San Jose State University - CommUniverCity Engineering in Action Program
- Santa Clara City Library Foundation
- Santa Clara County Office of Education
- Santa Clara Unified School District
- Schmahl Science Workshops
- Science Buddies
- Silicon Valley Community Foundation
- Silicon Valley Education Foundation
- Society of Women Engineers - GetSET (Science, Engineering and Technology) Program
- Youth Science Institute

In addition to our work in Silicon Valley, TI provides funding and volunteers to education partners in our site communities around the world, including Dallas, Texas; South Portland, Maine; Tucson, Arizona; China; India; Malaysia; Scotland; and the Philippines.

IMPORTANT NOTICE

Texas Instruments Incorporated and its subsidiaries (TI) reserve the right to make corrections, enhancements, improvements and other changes to its semiconductor products and services per JESD46, latest issue, and to discontinue any product or service per JESD48, latest issue. Buyers should obtain the latest relevant information before placing orders and should verify that such information is current and complete. All semiconductor products (also referred to herein as "components") are sold subject to TI's terms and conditions of sale supplied at the time of order acknowledgment.

TI warrants performance of its components to the specifications applicable at the time of sale, in accordance with the warranty in TI's terms and conditions of sale of semiconductor products. Testing and other quality control techniques are used to the extent TI deems necessary to support this warranty. Except where mandated by applicable law, testing of all parameters of each component is not necessarily performed.

TI assumes no liability for applications assistance or the design of Buyers' products. Buyers are responsible for their products and applications using TI components. To minimize the risks associated with Buyers' products and applications, Buyers should provide adequate design and operating safeguards.

TI does not warrant or represent that any license, either express or implied, is granted under any patent right, copyright, mask work right, or other intellectual property right relating to any combination, machine, or process in which TI components or services are used. Information published by TI regarding third-party products or services does not constitute a license to use such products or services or a warranty or endorsement thereof. Use of such information may require a license from a third party under the patents or other intellectual property of the third party, or a license from TI under the patents or other intellectual property of TI.

Reproduction of significant portions of TI information in TI data books or data sheets is permissible only if reproduction is without alteration and is accompanied by all associated warranties, conditions, limitations, and notices. TI is not responsible or liable for such altered documentation. Information of third parties may be subject to additional restrictions.

Resale of TI components or services with statements different from or beyond the parameters stated by TI for that component or service voids all express and any implied warranties for the associated TI component or service and is an unfair and deceptive business practice. TI is not responsible or liable for any such statements.

Buyer acknowledges and agrees that it is solely responsible for compliance with all legal, regulatory and safety-related requirements concerning its products, and any use of TI components in its applications, notwithstanding any applications-related information or support that may be provided by TI. Buyer represents and agrees that it has all the necessary expertise to create and implement safeguards which anticipate dangerous consequences of failures, monitor failures and their consequences, lessen the likelihood of failures that might cause harm and take appropriate remedial actions. Buyer will fully indemnify TI and its representatives against any damages arising out of the use of any TI components in safety-critical applications.

In some cases, TI components may be promoted specifically to facilitate safety-related applications. With such components, TI's goal is to help enable customers to design and create their own end-product solutions that meet applicable functional safety standards and requirements. Nonetheless, such components are subject to these terms.

No TI components are authorized for use in FDA Class III (or similar life-critical medical equipment) unless authorized officers of the parties have executed a special agreement specifically governing such use.

Only those TI components which TI has specifically designated as military grade or "enhanced plastic" are designed and intended for use in military/aerospace applications or environments. Buyer acknowledges and agrees that any military or aerospace use of TI components which have **not** been so designated is solely at the Buyer's risk, and that Buyer is solely responsible for compliance with all legal and regulatory requirements in connection with such use.

TI has specifically designated certain components as meeting ISO/TS16949 requirements, mainly for automotive use. In any case of use of non-designated products, TI will not be responsible for any failure to meet ISO/TS16949.
