User's Guide

AWR2944 Evaluation Module

Table of Contents

Trademarks

1 Getting Started

1.1 Introduction

The AWR2944EVM is an easy-to-use evaluation board for the AWR294x mmWave sensing device, with direct connectivity to the DCA1000 EVM.This EVM kit contains everything needed to start developing software for the on-chip C66x DSP, ARM® Cortex®-R5F controller, and hardware accelerator (HWA 2.0). Also included is on-board emulation for programming and debugging as well as on-board buttons and LEDs for quick integration of a simple user interface.

1.2 Key Features

- On-board antenna
- XDS110 based JTAG emulation with Serial port for onboard 64-bit QSPI flash programming
- UART to USB Debug port for terminal access using FT4232H
- 60-pin, high-density (HD) connector for external JTAG/ Emulator Interface with TRACE and CSI2 support
- 60-pin, high-density (HD) connector for debug, SPI, I2C and LVDS
- RJ45 connector to stream the captured data over the network to the host PC
- MATEnet Ethernet interface to stream the captured data over the network to an automotive host
- Dual On-board CAN-FD transceiver
- One button and LED for basic user interface
- 12 V power jack to power the board

1.3 What's Included

1.3.1 Kit Contents

- AWR2944EVM
- Micro USB cable
- Ethernet Cable
- Mounting brackets, screws, spacers and nuts, to allow placing the PCB vertical

Note

A 12V, > 2.5-A supply brick with a 2.1-mm barrel jack (center positive) is not included. TI recommends using an external power supply that complies with applicable regional safety standards, such as UL, CSA, VDE, CCC, PSE, and more. The length of the power cable should be < 3 m.

The following power supply has been tested to work with the AWR2944EVM: **SDI65-12-U-P5**.

1.3.2 mmWave Out-of-Box (OOB) Demo

TI provides sample demo codes to easily get started with the AWR2944 evaluation module (EVM) and to experience the functionality of the AWR2944 radar sensor. For details on getting started with these demos, see www.ti.com/tool/mmwave-sdk.

2 Hardware

CAUTION HOT SURFACE
CONTACT MAY CAUSE BURN
DO NOT TOUCH

Note

During operation, a minimum separation distance of 5 centimeters must be maintained between the user and the EVM.

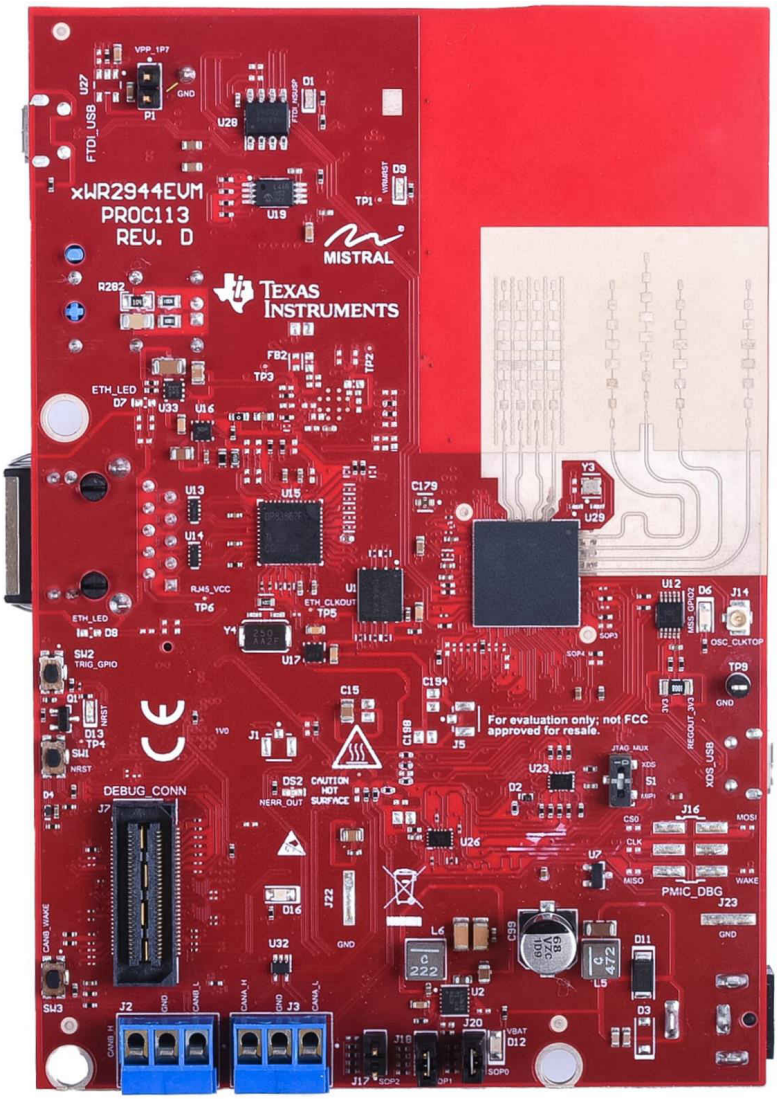

Figure 2-1. AWR2944EVM Front View

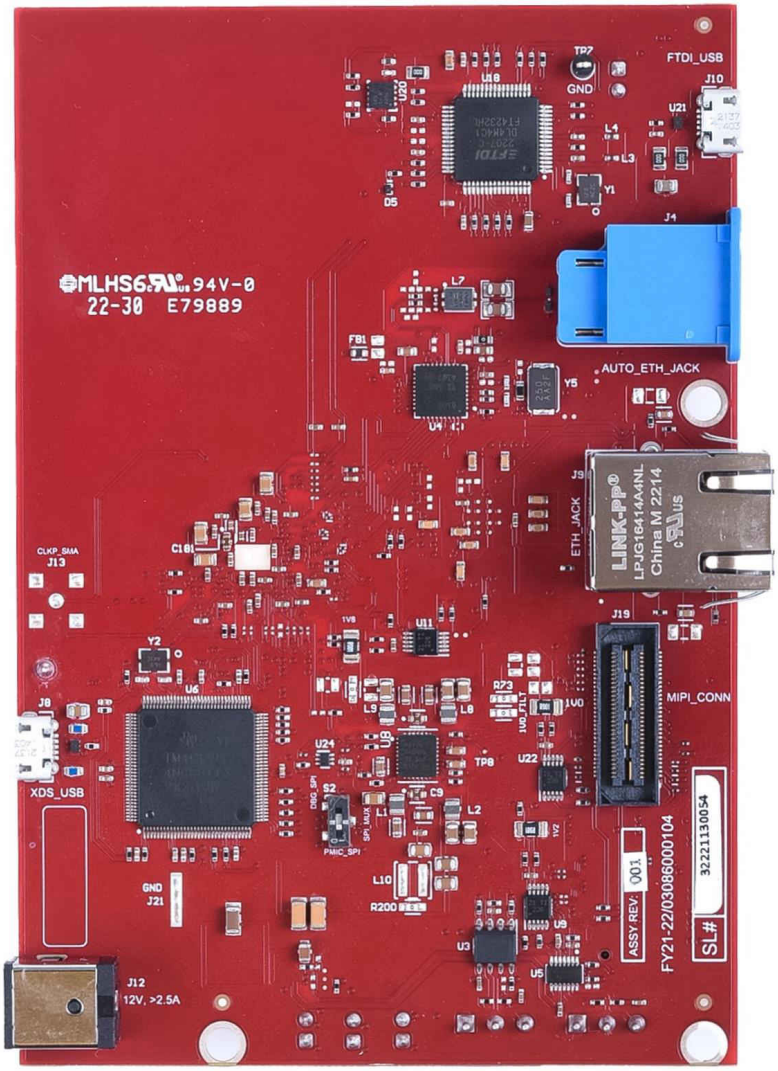

Figure 2-2. AWR2944EVM Back View

2.1 Block Diagram

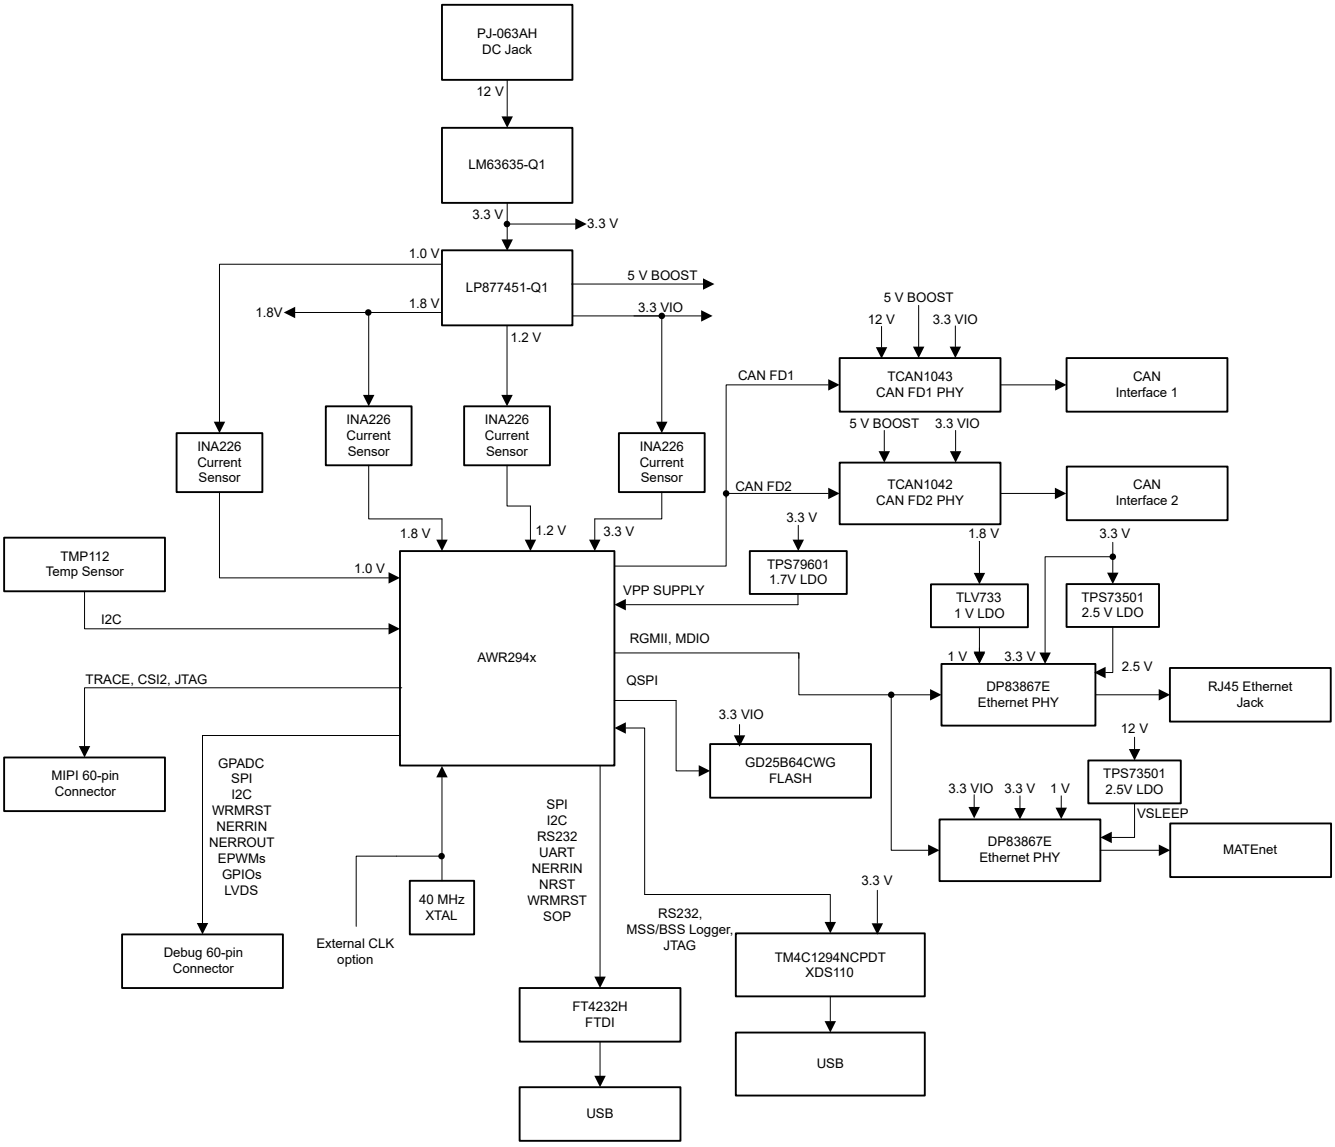

Figure 2-3. AWR2944EVM Block Diagram

2.2 PCB Handling Recommendations

This EVM contains components that can potentially be damaged by electrostatic discharge. Always transport and store the EVM in the supplied ESD bag when not in use. Handle using an antistatic wristband. Operate on an antistatic work surface. For more information on proper handling, refer to SSYA010A.

2.3 Power Connections

The AWR2944EVM is powered by the 12-V power jack (>2.5-A current capability). When power is provided the AR_NRST, VBAT_INT, and 5V0 LEDs glow, indicating that the board is powered up.

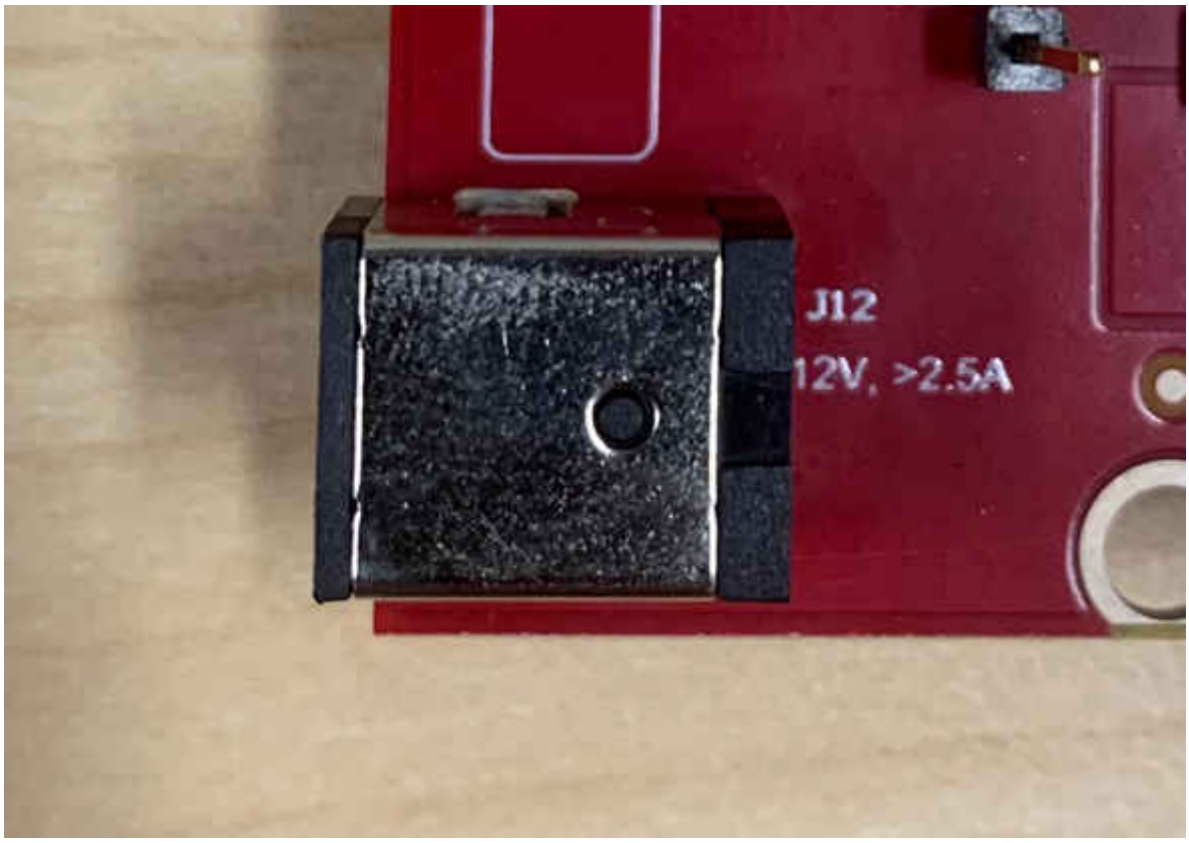

Figure 2-4. 12-V Power Connector

Note

After the 12-V power supply is provided to the EVM, TI recommends to press the NRST switch (SW1) one time to provide for a reliable boot-up state.

2.4 Connectors

2.4.1 MIPI 60-Pin Connector (J19)

This connector provides the standard MIPI 60-pin interface, as shown in Figure 5, for JTAG, CSI2 and trace capability through emulators such as the XDS560pro. Further information on the emulation and trace header can be found in the Emulation and Trace Headers Technical Reference Manual.This connector also provides access to the CSI_RX lanes which allow for playback or feeding external data and bypassing the RF front end, which enables testing and algorithm development on a known dataset.

To use this interface, the JTAG lines from the AWR2944EVM needs to be muxed to MIPI 60-pin connector. Refer to Section 2.8.1 for more details.

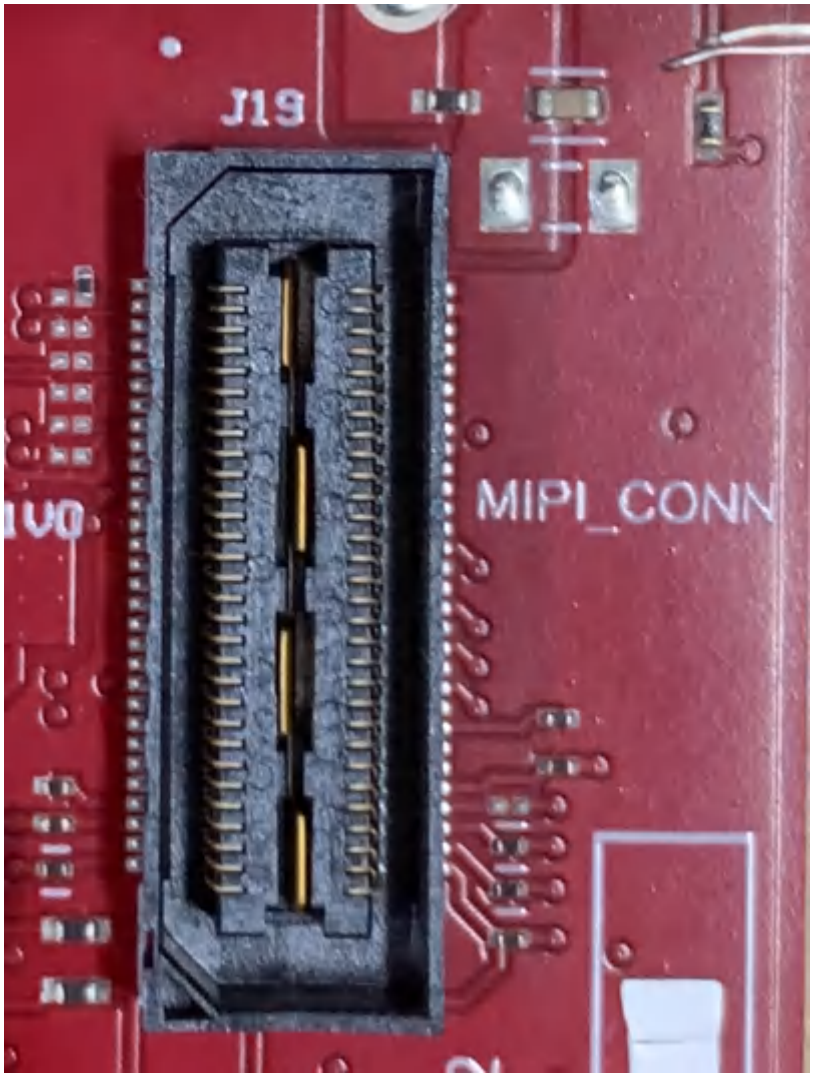

Figure 2-5. 60-pin MIPI Connector

Table 2-1 provides the pin assignment details for the MIPI 60-pin connector.

Table 2-1. J19 Pin Assignment

2.4.2 Debug Connector-60 pin (J7)

This connector enables interfacing of LVDS signals to the DCA1000 EVM for data capturing purposes.

Also, the connector has SPI, I2C, JTAG, GPADC, WRMRST, NRROUT, EPWM, and other control signals from AWR2944EVM for debug purpose.

The SPI is multiplexed to the Debug Connector. For more details refer to Section 2.8.1.

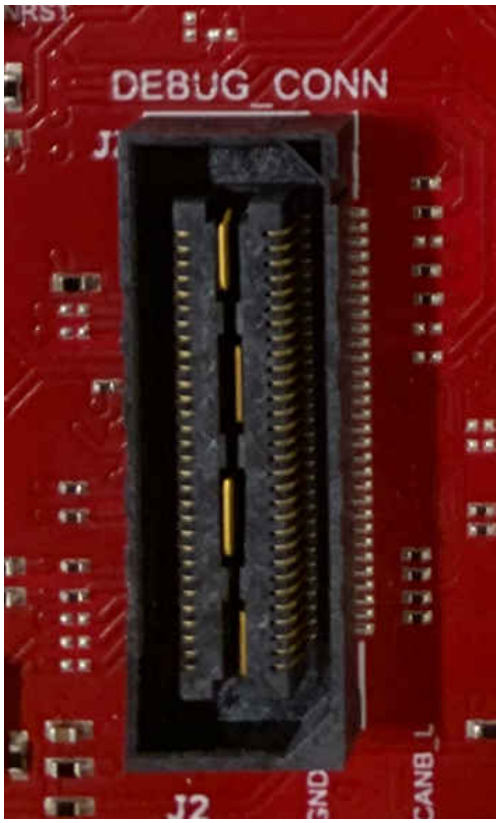

Figure 2-6. 60-pin Debug Connector

Table 2-2 provides the pin assignment details for the Debug 60-pin connector.

Table 2-2. J7 Pin Assignment

2.4.3 CAN-A Interface Connector (J3)

The J3 connector provides the CANA_L and CANA_H signals from the onboard can CAN-FD transceiver (TCAN1042HGVDRQ1). These can be directly wired to the CAN bus.

Figure 2-7. CAN_A Connector

Table 2-3 provides the pin assignment details for the CAN_A connector.

Table 2-3. J3 Pin Assignment

Pin Number	Description
1	CAN_L
2	GND
3	CAN_H

2.4.4 CAN-B Interface Connector (J2)

The J2 connector provides the CANB_L and CANB_H signals from the onboard can CAN-FD transceiver (TCAN1043ADYYRQ1). These can be directly wired to the CAN bus.

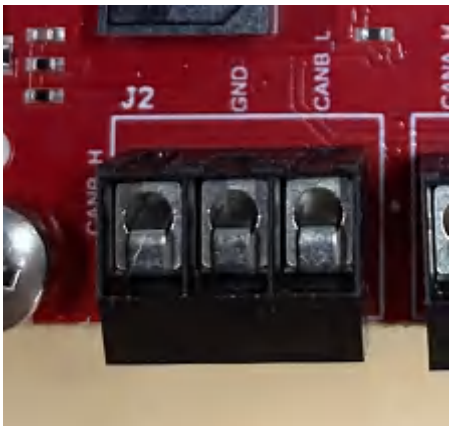

Figure 2-8. CAN_B Connector

Table 2-4 provides the pin assignment details for the CAN_B connector connector.

Table 2-4. J2 Pin Assignment

Pin Number	Description
1	CAN_L
2	GND
3	CAN_H

2.4.5 Ethernet Ports (J4 and J9)

The AWR2944EVM supports two RGMII Ethernet ports to provide the connection to the network. The J4 connector provides access over a MATEnet port (9-2304372-9 connector) via a DP83TC812R-Q1 PHY. The J9 port provides access over an RJ45 port via a DP83867ERGZR PHY. By default, the RGMII interfaces are connected to the J9 port only. To access the RGMII interface, over the J4 connector several resistors must be populated. For more details please see Section 2.4.5.1 and refer to the Schematic, BOM, and Assembly and Database and Layout sections.

This RGMII interface is intended to operate primarily as a 100Mbps ECU interface and can also be used as an Instrumentation Interface.

The RGMII interface supports following features:

- Full Duplex 10Mbps/100Mbps wire rate Interface to Ethernet PHY over RGMII, parallel interface
- MDIO Clause 22 and 45 PHY management interface
- IEEE 1588 Synchronous Ethernet support

The Ethernet port is interfaced to the AWR2944 through the Ethernet PHY and is used to stream the captured data over the network to the host PC.

Figure 2-9 shows the Ethernet RJ45 Mag-Jack connector, and Table 2-5 provides the connector pin details.

Table 2-5. J9 Pin Assignment

Pin Number	Description	Pin Number	Description
1	GND	2	Test point
3	ETH_D4P	4	ETH_D4N
5	ETH_D3P	6	ETH_D3N

S5	GND	S6	GND

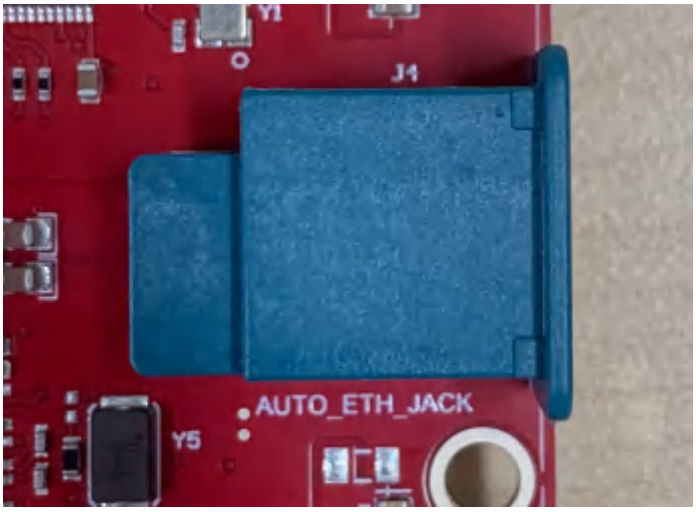

Figure 2-10. MATEnet Connector

2.4.5.1 ECOs to Enable the DP83TC812R PHY

By default, the board is designed to be used with the DP83867E PHY with the RJ45 connector. To enable the DP83TC812R PHY with the MATEnet connector, the following hardware changes must be made. For help with locating these components on the PCB, refer to the provided Schematic, BOM, and assembly files.

1. Remove R98 and populate on R74
2. Remove R101 and populate on R230
3. Remove R103 and populate on R96
4. Remove R105 and populate on R100
5. Remove R121 and populate on R178
6. Remove R122 and populate on R225
7. Remove R195 and populate on R245
8. Remove R290 and populate on R234
9. Remove R325 and populate on R237
10. Remove R336 and populate on R238
11. Remove R338 and populate on R239
12. Remove R339 and populate on R240
13. Remove R413 and populate on R247
14. Remove R369 and populate on R249
15. Populate D18 and D19 ESD diodes
16. Populate C55
17. The bootstrap configuration pins can be populated/removed as needed depending on the use case

2.4.6 USB Connectors (J8, J10)

Note

The EVM must be powered on before the USB cables are connected. Plugging in the USB cables before powering on the board can cause the board to get stuck in a permanent reset state. In the event that this occurs, just unplug the USB cables, power cycle the EVM, and plug in the USB cables to resolve the issue.

The AWR2944EVM has two standard micro USB connectors.

Micro USB Connector J10 provides access to the AWR2944 UART, SPI, I2C, RS232, and SOP interfaces through the FTDI chip.

Table 2-7. J10 Pin Assignment

Pin Number	Description	Pin Number	Description
1	FTDI_VBUS	2	FTDI_USBD_N
3	FTDI_USBD_P	4	FTDI_USBID
5	GND	6	GND
7	GND	8	GND
9	GND	10	GND
11	GND		

Figure 2-11. FTDI USB Port

Micro USB connector J8 provides access to the JTAG, MSS_UARTA, and MSS_UARTB interfaces of the AWR2944 via the XDS110 emulator.

This is the UART interface used to flash the binary to the onboard serial flash and for Out-of-box (OOB) demo.

Note

The OOB demo requires only J8 to be connected to the PC. J10 is not used for the OOB demo.

Table 2-8. J8 Pin Assignment

Pin Number	Description	Pin Number	Description
1	XDSET_VBUS	2	XDSET_D_N
3	XDSET_D_P	4	XDSET_ID
5	GND	6	GND
7	NC	8	NC
9	GND	10	GND
11	GND		

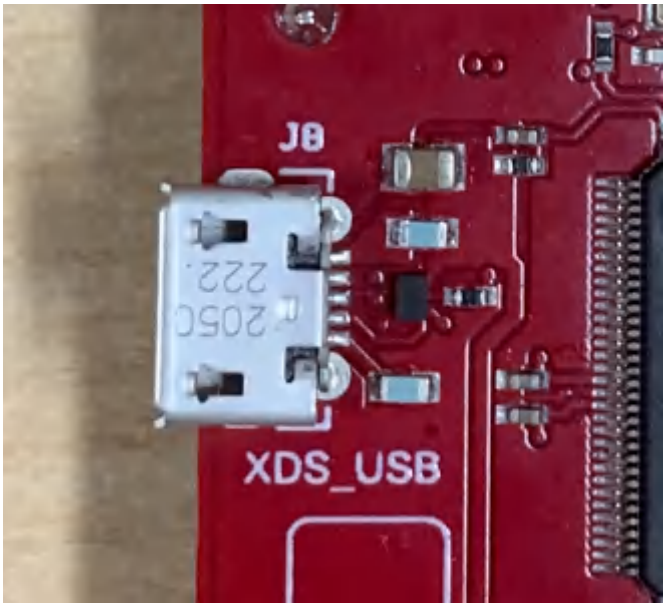

Figure 2-12. XDS USB Port

2.4.7 OSC_CLKOUT Connector (J14)

Connector J14 provides access to measure oscillator clock out signal from the AWR2944 device.

Figure 2-13. OSC Clock Port

2.4.8 PMIC SPI Connector (J16) (DNP)

Connector J16 provides access to the SPI and enable pins on the PMIC (U8). This part is not populated by default. To populate this connector with the appropriate part, please refer to the Schematic, BOM, and assembly files.

Table 2-9. J8 Pin Assignment

Pin Number	Description	Pin Number	Description
1	PMIC SPI_CS	2	PMIC SPI_PICO
3	PMIC SPI_CLK	4	NC
5	PMIC SPI_POCI	6	PMIC ENABLE

2.4.9 Voltage Rails Ripple Measurement Connectors (J1, J5) (DNP)

J1 Provides access to measure ripple on 1V0_FILTERED (1.0 analog RF supply for AWR2944) voltage rail.

J5 Provides access to measure ripple on 1V8_FILTERED (1.8-V analog supply for AWR2944) voltage rail.

These connectors are not populated on the board by default. To populate these connectors with the appropriate part, please refer to the Schematic, BOM, and assembly files.

2.5 Antenna

The AWR2944EVM includes onboard etched antennas for the four receivers and four transmitters, which enables tracking multiple objects with their distance and angle information. This antenna design enables estimation of both azimuth and elevation angles, which enable object detection in a 3-D plane (see Figure 2-14).

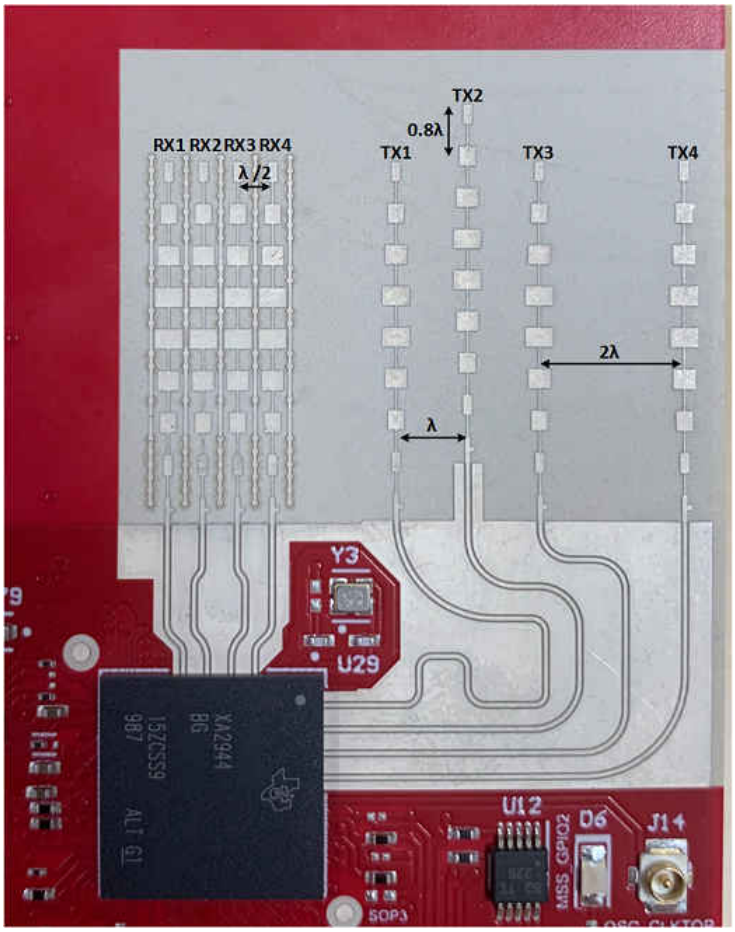

Figure 2-14. AWR2944EVM Antenna Design

The antenna placement shown in Figure 2-14 results in the virtual antenna array shown in Figure 2-15.

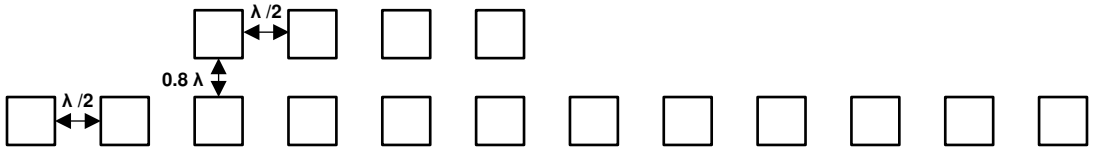

Figure 2-15. Virtual Antenna Array

The antenna peak gain is 13 dBi across the frequency band of 76 to 81 GHz. The radiation pattern of the antenna in the horizontal plan (H-plane) and elevation plan (E-plane) is as shown in Figure 2-16 and Figure 2-17, respectively.

The beamwidth of the antenna design can be determined from the radiation patterns provided below. For example, based on 3-dB drop in the gain as compared to bore sight, the horizontal 3dB-beamwidth is approximately ±30 degrees (see Figure 2-16), and elevation 3dB-beamwidth is approximately ±3 degrees (see Figure 2-17). Similarly, the horizontal 6 dB beamwidth is approximately ±45 degrees (see Figure 2-16) and the elevation 6dB-beamwidth is approximately ±5 degrees (see Figure 2-17).

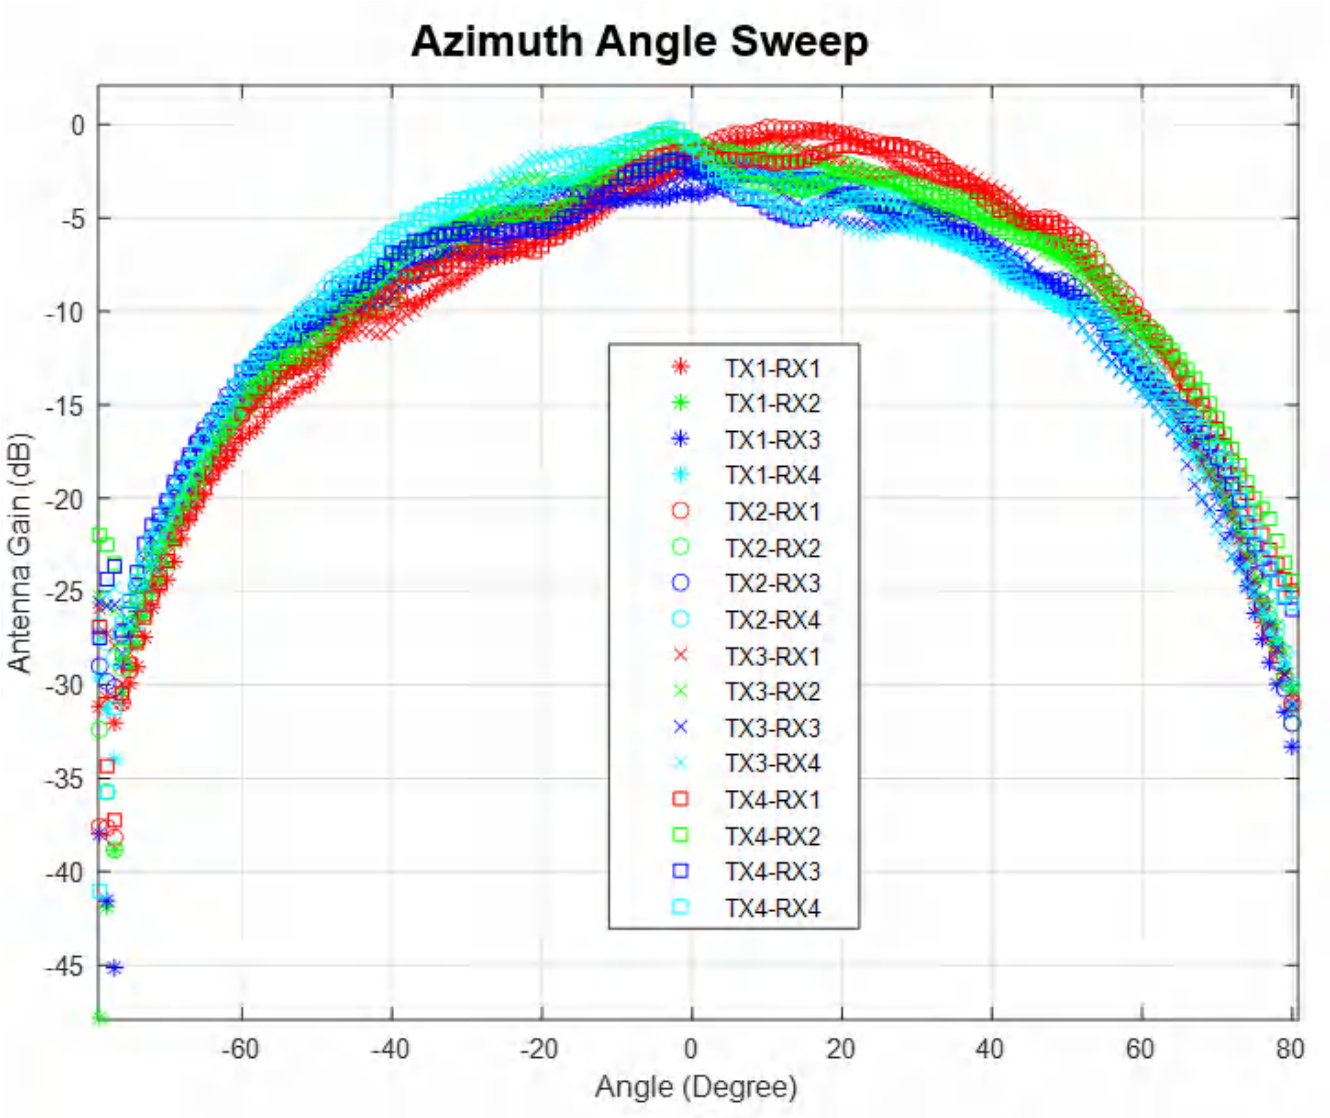

Figure 2-16. Azimuth Radiation Pattern

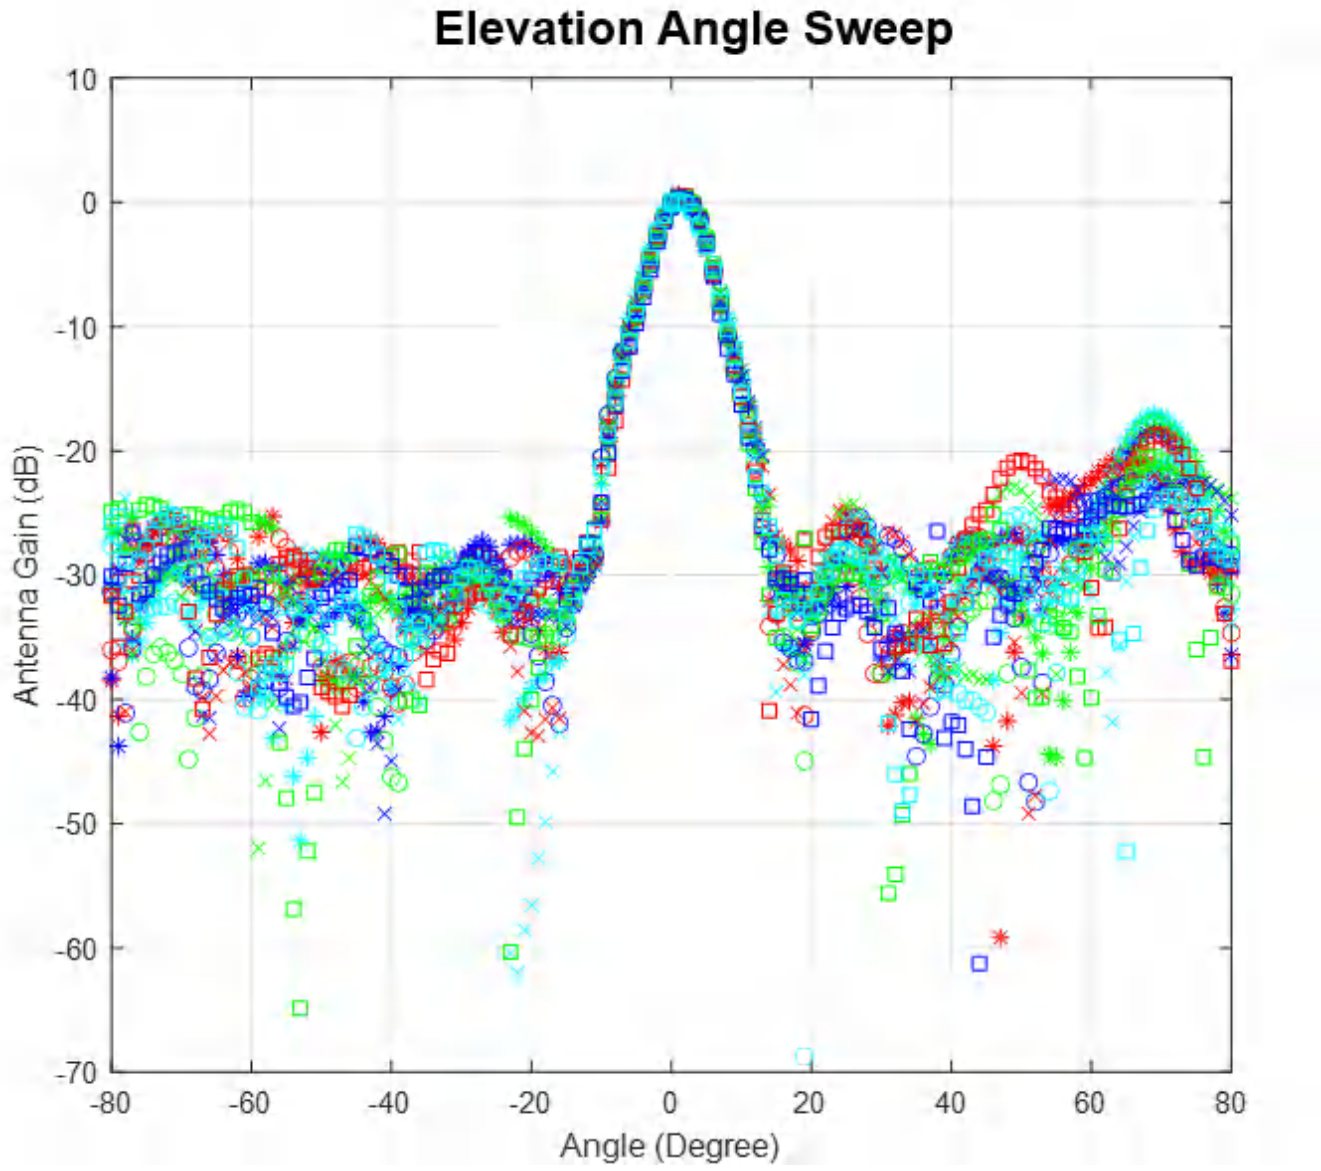

Figure 2-17. Elevation Radiation Pattern

2.6 PMIC

Power to the AWR2944 is provided by the LP877451-Q1 PMIC. This is a functional safety compliant PMIC that supports ASIL-C/SIL-2 applications. For more details, visit the LP87745-Q1 product page (https://www.ti.com/product/LP87745-Q1).

2.7 On-Board Sensors

The AWR2944EVM provides access to an on-board temperature sensor (TMP112AIDRLR) and four on-board current sensors (INA226AIDGSR). These sensors can be controlled by the radar via I2C. For details about the I2C addresses of these sensors, refer to Section 2.10.3.

The current sensors are designed to measure the current being supplied to the various power rails of the AWR2944 device. For details on the supply nodes that can be measured using the current sensors, refer to Table 2-10.

Table 2-10. Current Sensor Supply Details

Reference Designator	Supply Node	PCB Net Name
U9	AWR 1.2-V Supply	1V2
U11	AWR 1.8-V Supply	1V8
U12	AWR 3.3-V Supply	3V3
U22	AWR 1.0-V Supply	1V0

2.8 PC Connection

The PC connectivity is provided via two micro USB connectors, J8 and J10.

2.8.1 XDS110 Interface

J8 provides access to the onboard XDS110 (TM4C1294NCPDT) emulator. This connection provides the following interfaces to the PC:

- JTAG for CCS connectivity
- MSS logger UART (can be used to get MSS code logs on the PC)

When the J8 USB is connected to the PC the device manager should recognize two XDS110 COM ports under Ports (COM & LPT).

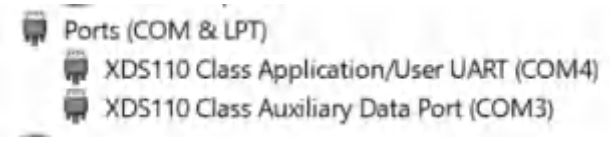

Figure 2-18. XDS110 COM Ports

XDS110 debug probe and data port are detected under Texas Instruments Debug Probes.

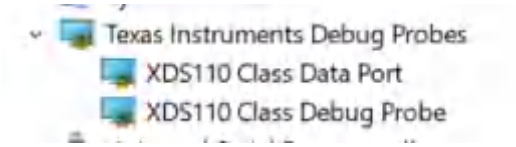

Figure 2-19. TI Debug Probes

If the PC is unable to recognize the above COM ports, install the latest EMUpack.

2.8.2 FTDI Interface

J10 provides access to the onboard FTDI ports. This provides the following interfaces to the PC:

- FTDI Port A -> MSS_SPIA interface
- FTDI Port B-> MSS_I2C interface; Host INTR signal.
- FTDI Port C -> BSS_UART port; DSS_UART port (not populated by default); NRESET and WARMRST control signals.
- FTDI Port D -> MSS_RS232 port; SOP0, SOP1, and SOP2 control signals

When the USB is connected for the first time to the PC, Windows® maybe not be able to recognize the device. This is indicated in the device manager with yellow exclamation marks, as shown in Figure 2-20.

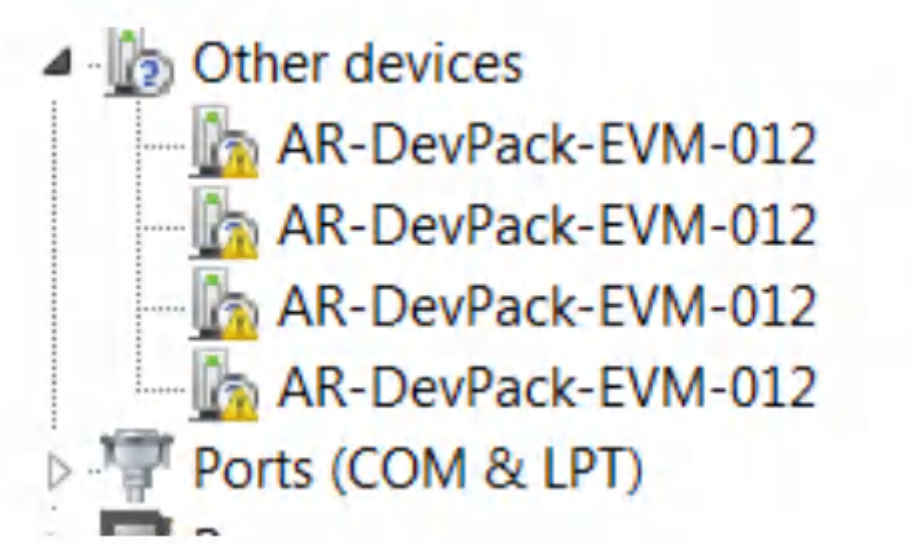

Figure 2-20. Uninstalled FTDI Drivers

To install the devices, download the latest FTDI drivers available in the mmwave SDK package. Right click on these devices, and update the drivers by pointing to the location where the FTDI drivers were installed (**C:\ti\mmwave_sdk_<version_number>\tools\ftdi**). This must be done for all four COM ports. When all four COM ports are installed, the device manager recognizes these devices and indicates the COM port numbers, as shown in Figure 2-21.

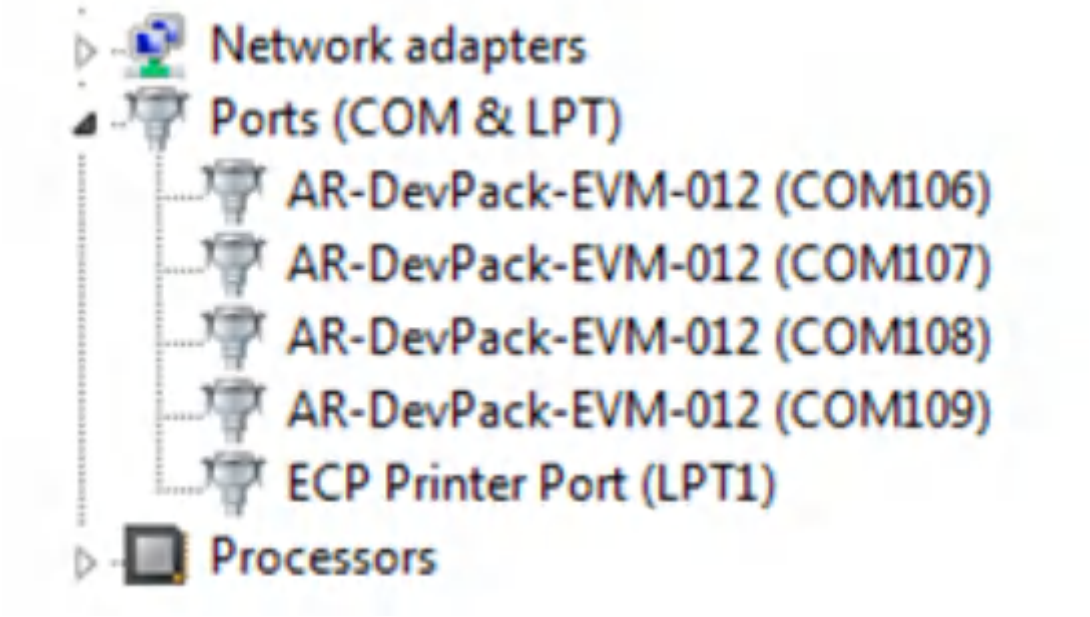

Figure 2-21. Installed FTDI Drivers

2.9 Connecting the AWR2944EVM to the DCA1000 EVM

The AWR2944EVM can be connected to the DCA1000 EVM platform to allow for LVDS data streaming. Figure 2-22 shows the AWR2944EVM interfaced to the DCA1000 EVM.

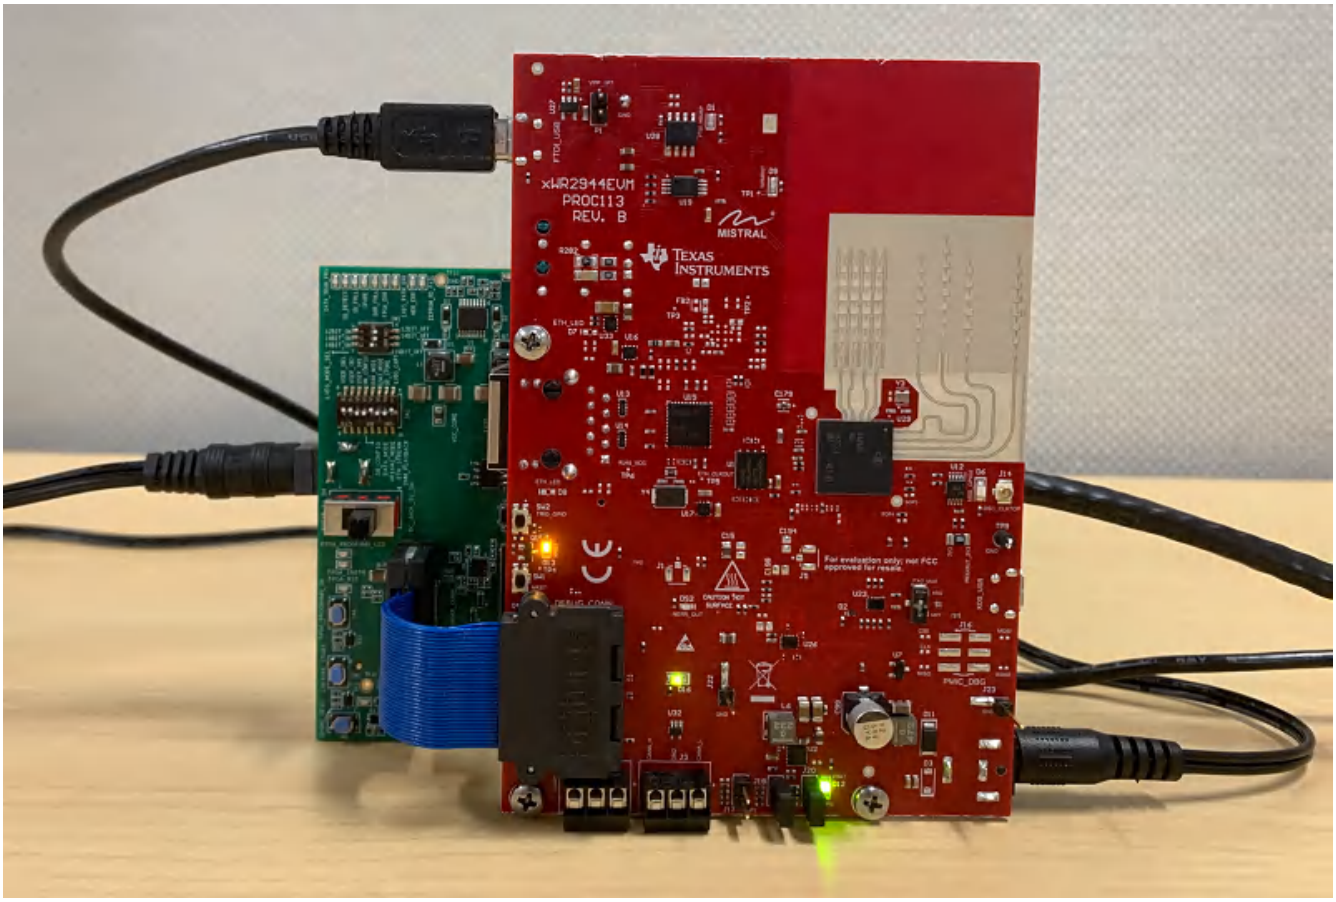

Figure 2-22. AWR2944EVM and DCA1000 EVM

When using the AWR2944EVM with the DCA1000 EVM, the following settings must be used.

1. Set the AWR2944EVM to SOP2 mode.

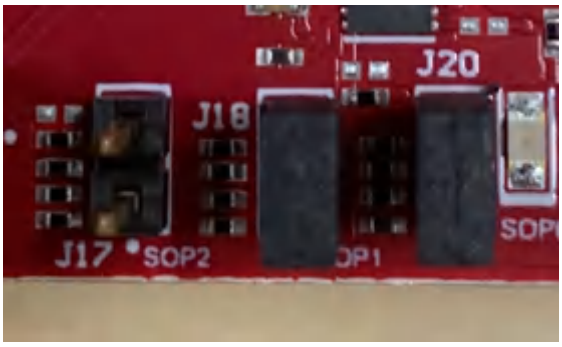

Figure 2-23. SOP2 Mode

2. Set the DCA1000 EVM switches to the following configuration.

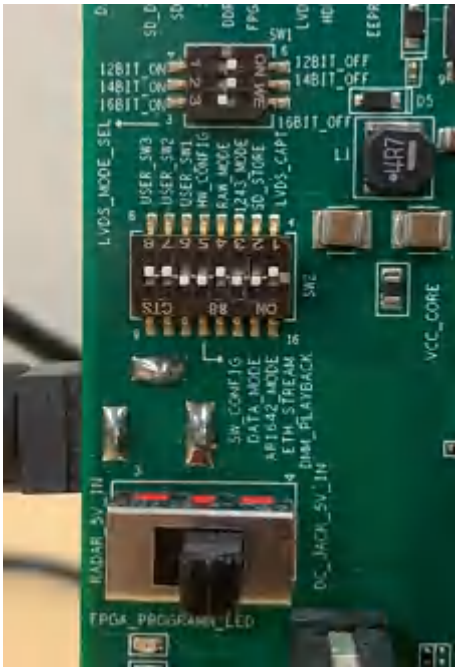

Figure 2-24. DCA1000 Switch Settings

3. The 12-V supply must be connected to J12 on the AWR2944EVM
4. A 5-V supply must be connected to J2 on the DCA1000 EVM
5. A micro USB cable must be connected to the FTDI port on the AWR2944EVM (J10)
6. The Samtec ribbon cable must be connected to J7 on the AWR2944EVM and J3 on the DCA1000 EVM
7. An RJ45 cable must be connected to J6 on the DCA1000 EVM

2.10 Jumpers, Switches, and LEDs

2.10.1 Switches

The AWR2944EVM contains two switches to mux various interfaces to different connectors on the EVM.

Table 2-11. MUX Switches

Reference	Usage	Comments	Image
S1	JTAG	When set to 'MIPI' position, the JTAG interface is routed to the MIPI 60-pin connector (J19). When set to 'XDS' position, the JTAG interface is routed to the XDS110 USB interface (J8)	

Table 2-11. MUX Switches (continued)

Reference	Usage	Comments	Image
S2	SPI	When set to 'PMIC_SPI' position, the MSS_SPIB interface is routed to the PMIC and to the J16 header. 1 When set to 'DBG_SPI', the MSS_SPIB interface is routed to the 60-pin debug header (J7)	

1. DNP resistors R5, R61, R167, and R176 must be populated to bring the MSS_SPIB interface out to the J16 header.

2.10.2 Sense On Power (SOP) Jumpers (J17, J18, J20)

The AWR2944EVM can be set to operate in different modes based on the state of the SOP [2:0] lines. These lines are sensed ONLY during boot up of the AWR2944 device. The state of the device is described in Table 2-12.

A closed jumper refers to a '1' and open the jumper refers to a '0' state of the SOP signal going to the AWR2944 device.

Note

The SOP[2:0] pins can also be controlled via the on-board FTDI. In this case the FTDI settings would override the jumper settings.

Table 2-12. SOP[0:2] Modes

Reference	Usage	Comments
J17 (SOP 2), J18 (SOP 1), J20 (SOP 0)	SOP[2:0]	101 (SOP mode 5) = Flashing mode 001 (SOP mode 4) = Functional mode 000 (SOP mode 3) = Reserved 011 (SOP mode 2) = Development mode 010 (SOP mode 1) = Reserved

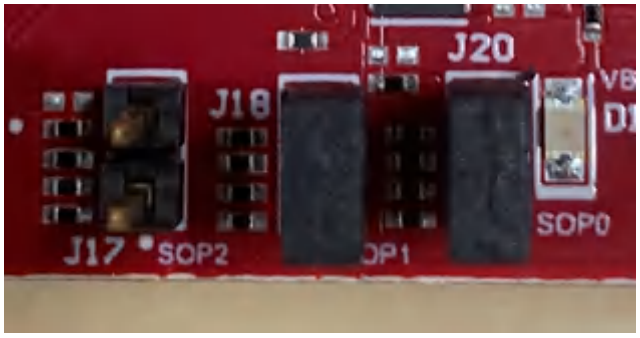

Figure 2-25. SOP Jumpers

Additionally, the SOP[4:3] signals defines the XTAL clock input as per the below configurations provided in Table 2-13.

Table 2-13. SOP[4:3] Modes

Reference	Usage	Comments
R303, R312 Populated. R301,R309 unpopulated	SOP[4:3]	00 = 40 MHz **(Default state)**
R301, R312 Populated. R303,R319 unpopulated		01 = 45.1584 MHz
R303, R309 Populated. R301,R312 unpopulated		10 = 49.152 MHz
R301, R309 Populated. R303,R312 unpopulated		11 = 50 MHz

2.10.3 I2C Connections

The board features temperature sensor for measuring onboard temperature, current sensors for current measurement for 1.2-V, 1.8-V, 3.3-V, 1V0_RF1, and 1V0_RF2 AWR2944 supply rails and EEPROM for storing board ID. These are connected to the AWR2944EVM through I2C bus.

Table 2-14 shows the list of I2C devices available in AWR2944EVM board and the address.

Table 2-14. I2C Device Addresses

Sensor Type	Reference Designator	Part Number	Target Address
Temp sensor	U24	TMP112AIDRLR	0x49
Current sensor for 3.3-V rail	U12	INA226AIDGSR	0x44
Current sensor for 1.8-V rail	U11	INA226AIDGSR	0x41
Current sensor for 1.2-V Digital rail	U9	INA226AIDGSR	0x40
Current sensor for 1.0-V RF1 rail	U22	INA226AIDGSR	0x42
Current sensor for 1.0-V RF2 rail	U30	INA226AIDGSR	0x43
EEPROM	U28	CAV24C02WE-GT3	0x50

2.10.4 Push Buttons

Table 2-15. Push Button Switches

Reference	Usage	Comments	Image
SW1	RESET	This Switch is used to RESET the AWR2944, PMIC, XDS110 and FTDI device.	

Table 2-15. Push Button Switches (continued)

Reference	Usage	Comments	Image
SW2	GPIO_28	When pushed, the GPIO_28 shall be pulled to High.	
SW3	CANB_WAKE	Used to Wake up the CANB Transceiver	

2.10.5 LEDs

Table 2-16. On Board LEDs

Ref	Colour	Usage	Comments	Image
D12	Green	12-V supply indication	This LED indicates the presence of 12-V supply input	
D16	Green	5-V Supply	This LED indicates the presence of 5-V supply output	
Table 2-16. On Board LEDs (continued)

Ref	Colour	Usage	Comments	Image
D13	Yellow	NRST	This LED is used to indicate the state of NRST pin. If this LED is glowing, the device is out of reset.	
DS2	Red	NERROUT	Glows if there is any HW error in the AWR2944 device	
D9	Yellow	WRMRST	Open drain fail safe warm reset signal	
D6	Green	GPIO_2	Glows when the GPIO_2 is logic-1	D1	Yellow	FTDI_SUSPEND_N	Glows when FTDI is in suspend state	
3 Design Files and Software Tools

3.1 Design Files

To view the schematics, assembly drawings, and BOM, see AWR2944EVM Schematic, Assembly Files, and BOM.

To view the design database and layout details, see AWR2944EVM Database and Layout Files.

3.2 Software, Development Tools, and Example Code

To enable quick development of end applications on the on-chip C66x DSP, ARM® Cortex®-R5F controller, and hardware accelerator (HWA 2.0), TI provides a software development kit (SDK) that includes demo codes, software drivers, emulation packages for debug, and more. These can be found at mmwave-sdk.

4 Revision History

NOTE: Page numbers for previous revisions may differ from page numbers in the current version.

Changes from Revision * (November 2021) to Revision A (March 2023)	Page
• Added 64-bit size to flash programming key feature	2
• Changed AWR2944EVM Front View image	3
• Changed AWR2944EVM Back View image	3
• Changed AWR2944EVM Block Diagram	5
• Changed all instances of legacy terminology to POCI and PICO where I^2C is mentioned	8
• Added PMIC section	17
• Changed all instances of legacy terminology to controller and target where I^2C is mentioned	23

STANDARD TERMS FOR EVALUATION MODULES

1. *Delivery:* TI delivers TI evaluation boards, kits, or modules, including any accompanying demonstration software, components, and/or documentation which may be provided together or separately (collectively, an “EVM” or “EVMs”) to the User (“User”) in accordance with the terms set forth herein. User's acceptance of the EVM is expressly subject to the following terms.

   1.1 EVMs are intended solely for product or software developers for use in a research and development setting to facilitate feasibility evaluation, experimentation, or scientific analysis of TI semiconductors products. EVMs have no direct function and are not finished products. EVMs shall not be directly or indirectly assembled as a part or subassembly in any finished product. For clarification, any software or software tools provided with the EVM (“Software”) shall not be subject to the terms and conditions set forth herein but rather shall be subject to the applicable terms that accompany such Software

   1.2 EVMs are not intended for consumer or household use. EVMs may not be sold, sublicensed, leased, rented, loaned, assigned, or otherwise distributed for commercial purposes by Users, in whole or in part, or used in any finished product or production system.

2 *Limited Warranty and Related Remedies/Disclaimers*:

   2.1 These terms do not apply to Software. The warranty, if any, for Software is covered in the applicable Software License Agreement.

   2.2 TI warrants that the TI EVM will conform to TI's published specifications for ninety (90) days after the date TI delivers such EVM to User. Notwithstanding the foregoing, TI shall not be liable for a nonconforming EVM if (a) the nonconformity was caused by neglect, misuse or mistreatment by an entity other than TI, including improper installation or testing, or for any EVMs that have been altered or modified in any way by an entity other than TI, (b) the nonconformity resulted from User's design, specifications or instructions for such EVMs or improper system design, or (c) User has not paid on time. Testing and other quality control techniques are used to the extent TI deems necessary. TI does not test all parameters of each EVM. User's claims against TI under this Section 2 are void if User fails to notify TI of any apparent defects in the EVMs within ten (10) business days after delivery, or of any hidden defects with ten (10) business days after the defect has been detected.

   2.3 TI's sole liability shall be at its option to repair or replace EVMs that fail to conform to the warranty set forth above, or credit User's account for such EVM. TI's liability under this warranty shall be limited to EVMs that are returned during the warranty period to the address designated by TI and that are determined by TI not to conform to such warranty. If TI elects to repair or replace such EVM, TI shall have a reasonable time to repair such EVM or provide replacements. Repaired EVMs shall be warranted for the remainder of the original warranty period. Replaced EVMs shall be warranted for a new full ninety (90) day warranty period.

WARNING

Evaluation Kits are intended solely for use by technically qualified, professional electronics experts who are familiar with the dangers and application risks associated with handling electrical mechanical components, systems, and subsystems.

User shall operate the Evaluation Kit within TI’s recommended guidelines and any applicable legal or environmental requirements as well as reasonable and customary safeguards. Failure to set up and/or operate the Evaluation Kit within TI’s recommended guidelines may result in personal injury or death or property damage. Proper set up entails following TI’s instructions for electrical ratings of interface circuits such as input, output and electrical loads.

NOTE:

EXPOSURE TO ELECTROSTATIC DISCHARGE (ESD) MAY CAUSE DEGREDATION OR FAILURE OF THE EVALUATION KIT; TI RECOMMENDS STORAGE OF THE EVALUATION KIT IN A PROTECTIVE ESD BAG.

3 *Regulatory Notices:*

3.1 *United States*

3.1.1 *Notice applicable to EVMs not FCC-Approved:*

FCC NOTICE: This kit is designed to allow product developers to evaluate electronic components, circuitry, or software associated with the kit to determine whether to incorporate such items in a finished product and software developers to write software applications for use with the end product. This kit is not a finished product and when assembled may not be resold or otherwise marketed unless all required FCC equipment authorizations are first obtained. Operation is subject to the condition that this product not cause harmful interference to licensed radio stations and that this product accept harmful interference. Unless the assembled kit is designed to operate under part 15, part 18 or part 95 of this chapter, the operator of the kit must operate under the authority of an FCC license holder or must secure an experimental authorization under part 5 of this chapter.

3.1.2 *For EVMs annotated as FCC – FEDERAL COMMUNICATIONS COMMISSION Part 15 Compliant:*

CAUTION

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

FCC Interference Statement for Class A EVM devices

NOTE: This equipment has been tested and found to comply with the limits for a Class A digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference when the equipment is operated in a commercial environment. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instruction manual, may cause harmful interference to radio communications. Operation of this equipment in a residential area is likely to cause harmful interference in which case the user will be required to correct the interference at his own expense.

FCC Interference Statement for Class B EVM devices

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- *Reorient or relocate the receiving antenna.*
- *Increase the separation between the equipment and receiver.*
- *Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.*
- *Consult the dealer or an experienced radio/TV technician for help.*

3.2 *Canada*

3.2.1 *For EVMs issued with an Industry Canada Certificate of Conformance to RSS-210 or RSS-247*

Concerning EVMs Including Radio Transmitters:

This device complies with Industry Canada license-exempt RSSs. Operation is subject to the following two conditions:

(1) this device may not cause interference, and (2) this device must accept any interference, including interference that may cause undesired operation of the device.

Concernant les EVMs avec appareils radio:

Le présent appareil est conforme aux CNR d'Industrie Canada applicables aux appareils radio exempts de licence. L'exploitation est autorisée aux deux conditions suivantes: (1) l'appareil ne doit pas produire de brouillage, et (2) l'utilisateur de l'appareil doit accepter tout brouillage radioélectrique subi, même si le brouillage est susceptible d'en compromettre le fonctionnement.

Concerning EVMs Including Detachable Antennas:

Under Industry Canada regulations, this radio transmitter may only operate using an antenna of a type and maximum (or lesser) gain approved for the transmitter by Industry Canada. To reduce potential radio interference to other users, the antenna type and its gain should be so chosen that the equivalent isotropically radiated power (e.i.r.p.) is not more than that necessary for successful communication. This radio transmitter has been approved by Industry Canada to operate with the antenna types listed in the user guide with the maximum permissible gain and required antenna impedance for each antenna type indicated. Antenna types not included in this list, having a gain greater than the maximum gain indicated for that type, are strictly prohibited for use with this device.

Concernant les EVMs avec antennes détachables

Conformément à la réglementation d'Industrie Canada, le présent émetteur radio peut fonctionner avec une antenne d'un type et d'un gain maximal (ou inférieur) approuvé pour l'émetteur par Industrie Canada. Dans le but de réduire les risques de brouillage radioélectrique à l'intention des autres utilisateurs, il faut choisir le type d'antenne et son gain de sorte que la puissance isotrope rayonnée équivalente (p.i.r.e.) ne dépasse pas l'intensité nécessaire à l'établissement d'une communication satisfaisante. Le présent émetteur radio a été approuvé par Industrie Canada pour fonctionner avec les types d'antenne énumérés dans le manuel d'usage et ayant un gain admissible maximal et l'impédance requise pour chaque type d'antenne. Les types d'antenne non inclus dans cette liste, ou dont le gain est supérieur au gain maximal indiqué, sont strictement interdits pour l'exploitation de l'émetteur

3.3 *Japan*

3.3.1 *Notice for EVMs delivered in Japan:* Please see http://www.tij.co.jp/lsds/ti_ja/general/eStore/notice_01.page 日本国内に輸入される評価用キット、ボードについては、次のところをご覧ください。

https://www.ti.com/ja-jp/legal/notice-for-evaluation-kits-delivered-in-japan.html

3.3.2 *Notice for Users of EVMs Considered "Radio Frequency Products" in Japan:* EVMs entering Japan may not be certified by TI as conforming to Technical Regulations of Radio Law of Japan.

If User uses EVMs in Japan, not certified to Technical Regulations of Radio Law of Japan, User is required to follow the instructions set forth by Radio Law of Japan, which includes, but is not limited to, the instructions below with respect to EVMs (which for the avoidance of doubt are stated strictly for convenience and should be verified by User):

1. Use EVMs in a shielded room or any other test facility as defined in the notification #173 issued by Ministry of Internal Affairs and Communications on March 28, 2006, based on Sub-section 1.1 of Article 6 of the Ministry's Rule for Enforcement of Radio Law of Japan,
2. Use EVMs only after User obtains the license of Test Radio Station as provided in Radio Law of Japan with respect to EVMs, or
3. Use of EVMs only after User obtains the Technical Regulations Conformity Certification as provided in Radio Law of Japan with respect to EVMs. Also, do not transfer EVMs, unless User gives the same notice above to the transferee. Please note that if User does not follow the instructions above, User will be subject to penalties of Radio Law of Japan.

【無線電波を送信する製品の開発キットをお使いになる際の注意事項】 開発キットの中には技術基準適合証明を受けていないものがあります。 技術適合証明を受けていないもののご使用に際しては、電波法遵守のため、以下のいずれかの措置を取っていただく必要がありますのでご注意ください。

1. 電波法施行規則第6条第1項第1号に基づく平成18年3月28日総務省告示第173号で定められた電波暗室等の試験設備でご使用いただく。
2. 実験局の免許を取得後ご使用いただく。
3. 技術基準適合証明を取得後ご使用いただく。

なお、本製品は、上記の「ご使用にあたっての注意」を譲渡先、移転先に通知しない限り、譲渡、移転できないものとします。

上記を遵守頂けない場合は、電波法の罰則が適用される可能性があることをご留意ください。 日本テキサス・インスツルメンツ株式会社

東京都新宿区西新宿 6 丁目 2 4 番 1 号

西新宿三井ビル

3.3.3 *Notice for EVMs for Power Line Communication:* Please see http://www.tij.co.jp/lsds/ti_ja/general/eStore/notice_02.page

電力線搬送波通信についての開発キットをお使いになる際の注意事項については、次のところをご覧ください。https://www.ti.com/ja-jp/legal/notice-for-evaluation-kits-for-power-line-communication.html

3.4 *European Union*

3.4.1 *For EVMs subject to EU Directive 2014/30/EU (Electromagnetic Compatibility Directive)*:

This is a class A product intended for use in environments other than domestic environments that are connected to a low-voltage power-supply network that supplies buildings used for domestic purposes. In a domestic environment this product may cause radio interference in which case the user may be required to take adequate measures.

4 *EVM Use Restrictions and Warnings:*

4.1 EVMS ARE NOT FOR USE IN FUNCTIONAL SAFETY AND/OR SAFETY CRITICAL EVALUATIONS, INCLUDING BUT NOT LIMITED TO EVALUATIONS OF LIFE SUPPORT APPLICATIONS.

4.2 User must read and apply the user guide and other available documentation provided by TI regarding the EVM prior to handling or using the EVM, including without limitation any warning or restriction notices. The notices contain important safety information related to, for example, temperatures and voltages.

4.3 *Safety-Related Warnings and Restrictions:*

4.3.1 User shall operate the EVM within TI's recommended specifications and environmental considerations stated in the user guide, other available documentation provided by TI, and any other applicable requirements and employ reasonable and customary safeguards. Exceeding the specified performance ratings and specifications (including but not limited to input and output voltage, current, power, and environmental ranges) for the EVM may cause personal injury or death, or property damage. If there are questions concerning performance ratings and specifications, User should contact a TI field representative prior to connecting interface electronics including input power and intended loads. Any loads applied outside of the specified output range may also result in unintended and/or inaccurate operation and/or possible permanent damage to the EVM and/or interface electronics. Please consult the EVM user guide prior to connecting any load to the EVM output. If there is uncertainty as to the load specification, please contact a TI field representative. During normal operation, even with the inputs and outputs kept within the specified allowable ranges, some circuit components may have elevated case temperatures. These components include but are not limited to linear regulators, switching transistors, pass transistors, current sense resistors, and heat sinks, which can be identified using the information in the associated documentation. When working with the EVM, please be aware that the EVM may become very warm.

4.3.2 EVMs are intended solely for use by technically qualified, professional electronics experts who are familiar with the dangers and application risks associated with handling electrical mechanical components, systems, and subsystems. User assumes all responsibility and liability for proper and safe handling and use of the EVM by User or its employees, affiliates, contractors or designees. User assumes all responsibility and liability to ensure that any interfaces (electronic and/or mechanical) between the EVM and any human body are designed with suitable isolation and means to safely limit accessible leakage currents to minimize the risk of electrical shock hazard. User assumes all responsibility and liability for any improper or unsafe handling or use of the EVM by User or its employees, affiliates, contractors or designees.

4.4 User assumes all responsibility and liability to determine whether the EVM is subject to any applicable international, federal, state, or local laws and regulations related to User's handling and use of the EVM and, if applicable, User assumes all responsibility and liability for compliance in all respects with such laws and regulations. User assumes all responsibility and liability for proper disposal and recycling of the EVM consistent with all applicable international, federal, state, and local requirements.

5. *Accuracy of Information:* To the extent TI provides information on the availability and function of EVMs, TI attempts to be as accurate as possible. However, TI does not warrant the accuracy of EVM descriptions, EVM availability or other information on its websites as accurate, complete, reliable, current, or error-free.

6. *Disclaimers:*

6.1 EXCEPT AS SET FORTH ABOVE, EVMS AND ANY MATERIALS PROVIDED WITH THE EVM (INCLUDING, BUT NOT LIMITED TO, REFERENCE DESIGNS AND THE DESIGN OF THE EVM ITSELF) ARE PROVIDED "AS IS" AND "WITH ALL FAULTS." TI DISCLAIMS ALL OTHER WARRANTIES, EXPRESS OR IMPLIED, REGARDING SUCH ITEMS, INCLUDING BUT NOT LIMITED TO ANY EPIDEMIC FAILURE WARRANTY OR IMPLIED WARRANTIES OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE OR NON-INFRINGEMENT OF ANY THIRD PARTY PATENTS, COPYRIGHTS, TRADE SECRETS OR OTHER INTELLECTUAL PROPERTY RIGHTS.

6.2 EXCEPT FOR THE LIMITED RIGHT TO USE THE EVM SET FORTH HEREIN, NOTHING IN THESE TERMS SHALL BE CONSTRUED AS GRANTING OR CONFERRING ANY RIGHTS BY LICENSE, PATENT, OR ANY OTHER INDUSTRIAL OR INTELLECTUAL PROPERTY RIGHT OF TI, ITS SUPPLIERS/LICENSORS OR ANY OTHER THIRD PARTY, TO USE THE EVM IN ANY FINISHED END-USER OR READY-TO-USE FINAL PRODUCT, OR FOR ANY INVENTION, DISCOVERY OR IMPROVEMENT, REGARDLESS OF WHEN MADE, CONCEIVED OR ACQUIRED.

7. *USER'S INDEMNITY OBLIGATIONS AND REPRESENTATIONS.* USER WILL DEFEND, INDEMNIFY AND HOLD TI, ITS LICENSORS AND THEIR REPRESENTATIVES HARMLESS FROM AND AGAINST ANY AND ALL CLAIMS, DAMAGES, LOSSES, EXPENSES, COSTS AND LIABILITIES (COLLECTIVELY, "CLAIMS") ARISING OUT OF OR IN CONNECTION WITH ANY HANDLING OR USE OF THE EVM THAT IS NOT IN ACCORDANCE WITH THESE TERMS. THIS OBLIGATION SHALL APPLY WHETHER CLAIMS ARISE UNDER STATUTE, REGULATION, OR THE LAW OF TORT, CONTRACT OR ANY OTHER LEGAL THEORY, AND EVEN IF THE EVM FAILS TO PERFORM AS DESCRIBED OR EXPECTED.

8. *Limitations on Damages and Liability:*

   8.1 *General Limitations*. IN NO EVENT SHALL TI BE LIABLE FOR ANY SPECIAL, COLLATERAL, INDIRECT, PUNITIVE, INCIDENTAL, CONSEQUENTIAL, OR EXEMPLARY DAMAGES IN CONNECTION WITH OR ARISING OUT OF THESE TERMS OR THE USE OF THE EVMS , REGARDLESS OF WHETHER TI HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES. EXCLUDED DAMAGES INCLUDE, BUT ARE NOT LIMITED TO, COST OF REMOVAL OR REINSTALLATION, ANCILLARY COSTS TO THE PROCUREMENT OF SUBSTITUTE GOODS OR SERVICES, RETESTING, OUTSIDE COMPUTER TIME, LABOR COSTS, LOSS OF GOODWILL, LOSS OF PROFITS, LOSS OF SAVINGS, LOSS OF USE, LOSS OF DATA, OR BUSINESS INTERRUPTION. NO CLAIM, SUIT OR ACTION SHALL BE BROUGHT AGAINST TI MORE THAN TWELVE (12) MONTHS AFTER THE EVENT THAT GAVE RISE TO THE CAUSE OF ACTION HAS OCCURRED.

   8.2 *Specific Limitations.* IN NO EVENT SHALL TI'S AGGREGATE LIABILITY FROM ANY USE OF AN EVM PROVIDED HEREUNDER, INCLUDING FROM ANY WARRANTY, INDEMITY OR OTHER OBLIGATION ARISING OUT OF OR IN CONNECTION WITH THESE TERMS, , EXCEED THE TOTAL AMOUNT PAID TO TI BY USER FOR THE PARTICULAR EVM(S) AT ISSUE DURING THE PRIOR TWELVE (12) MONTHS WITH RESPECT TO WHICH LOSSES OR DAMAGES ARE CLAIMED. THE EXISTENCE OF MORE THAN ONE CLAIM SHALL NOT ENLARGE OR EXTEND THIS LIMIT.

9. *Return Policy.* Except as otherwise provided, TI does not offer any refunds, returns, or exchanges. Furthermore, no return of EVM(s) will be accepted if the package has been opened and no return of the EVM(s) will be accepted if they are damaged or otherwise not in a resalable condition. If User feels it has been incorrectly charged for the EVM(s) it ordered or that delivery violates the applicable order, User should contact TI. All refunds will be made in full within thirty (30) working days from the return of the components(s), excluding any postage or packaging costs.

10. *Governing Law:* These terms and conditions shall be governed by and interpreted in accordance with the laws of the State of Texas, without reference to conflict-of-laws principles. User agrees that non-exclusive jurisdiction for any dispute arising out of or relating to these terms and conditions lies within courts located in the State of Texas and consents to venue in Dallas County, Texas. Notwithstanding the foregoing, any judgment may be enforced in any United States or foreign court, and TI may seek injunctive relief in any United States or foreign court.
