*
* Model Usage Notes:
*
* A. Features have been modelled
*   1. Output Voltage Setting
*   2. Internal Soft-start
*   3. Current Limit
*   4. Power Good
*   5. UVLO Protection
*   6. OVP protection
*
* B. Features have not been modelled
*   1. Operating Quiescent Current
*   2. Shutdown Current
*   3. Temperature dependent characteristics
*   4. PLL lock in time
*   5. Sync feature works with fixed frequency external clock. If the clock frequency
*       varies, switching frequency locks with minimum frequency of external clock.
*
* C. Application Notes
*   1. The parameter SS has been used to reach the steady state faster.
*       Keep SS = 0 to observe startup behaviour.
*       Keep SS = 1 to observe for faster Steady state.
