

TPS53685 Dual-Channel ($N + M \leq 8$ phase) D-CAP+™, Step-Down, Multiphase Controller with AMD-SVI3 and PMBus Interfaces

1 Features

- Input voltage range: 4.5 V to 17 V
- Output voltage range: 0.25 V to 5.5 V
- Dual output supporting $N+M \leq 8$ phases, $M \leq 4$ phases
- Native trans-inductor voltage regulator (TLVR) topology support
- AMD® SVI3 compliant
- Enhanced D-CAP+™ control to provide superior transient performance with excellent dynamic current sharing
- Programmable loop compensations
- Flexible phase-firing sequencing
- Individual phase current calibrations and reports
- Dynamic phase shedding with programmable current threshold for optimizing efficiency at light and heavy loads
- Fast phase-adding for undershoot reduction
- Driverless configuration for efficient high-frequency switching
- Fully compatible with TI NexFET™ power stages for high-density solutions
- Accurate, adjustable voltage positioning
- Patented AutoBalance™ phase current balancing
- Selectable per-phase current limit
- PMBus™ system interface for telemetry of voltage, current, power, temperature, and fault conditions
- 5.00 × 5.00 mm, 40-pin, 0.4 mm pitch, QFN package

2 Applications

- [Rack server](#)
- [Microserver and tower server](#)
- [High performance computing](#)
- [Baseband unit \(BBU\)](#)

3 Description

The TPS53685 is a fully AMD SVI3 compliant step-down controller with trans-inductor voltage regulator (TLVR) topology support, dual channels, built-in non-volatile memory (NVM), PMBus™ interface, and full compatible with TI NexFET™ smart power stages. Advanced control features such as D-CAP+™ architecture with undershoot reduction (USR) provide fast transient response and good current sharing, minimizing output capacitance requirements. The device also provides a novel phase interleaving strategy and dynamic phase shedding for efficiency improvements at different loads. Adjustable control of V_{CORE} slew rate and voltage positioning work with the AMD SVI3 features. In addition, the device supports the PMBus communication interface for reporting the telemetry of voltage, current, power, temperature, and fault conditions to the systems. All programmable parameters can be configured by the PMBus interface and can be stored in NVM as the new default values to minimize the external component count.

The TPS53685 device is offered in a thermally enhanced 40-pin QFN packaged and is rated to operate from -40°C to 125°C .

Device Information

PART NUMBER ⁽¹⁾	PACKAGE	BODY SIZE (NOM)
TPS53685	QFN (40)	5.00 × 5.00 mm

(1) For all available packages, see the orderable addendum at the end of the data sheet.

5 Device and Documentation Support

5.1 Documentation Support

5.1.1 Related Documentation

For related documentation see the following:

- Texas Instruments, Dual channel DCAP+ multiphase controllers: TPS53685, TPS536C5 Technical Reference Manual SLUUCN5

5.2 Receiving Notification of Documentation Updates

To receive notification of documentation updates, navigate to the device product folder on [ti.com](https://www.ti.com). Click on *Subscribe to updates* to register and receive a weekly digest of any product information that has changed. For change details, review the revision history included in any revised document.

5.3 Support Resources

[TI E2E™ support forums](#) are an engineer's go-to source for fast, verified answers and design help — straight from the experts. Search existing answers or ask your own question to get the quick design help you need.

Linked content is provided "AS IS" by the respective contributors. They do not constitute TI specifications and do not necessarily reflect TI's views; see TI's [Terms of Use](#).

5.4 Trademarks

D-CAP+™, NexFET™, AutoBalance™, TI E2E™ are trademarks of Texas Instruments.

PMBus™ is a trademark of SMIF, Inc..

AMD® is a registered trademark of Advanced Micro Devices, Inc..

All trademarks are the property of their respective owners.

5.5 Electrostatic Discharge Caution

This integrated circuit can be damaged by ESD. Texas Instruments recommends that all integrated circuits be handled with appropriate precautions. Failure to observe proper handling and installation procedures can cause damage.

ESD damage can range from subtle performance degradation to complete device failure. Precision integrated circuits may be more susceptible to damage because very small parametric changes could cause the device not to meet its published specifications.

5.6 Glossary

[TI Glossary](#)

This glossary lists and explains terms, acronyms, and definitions.

6 Mechanical, Packaging, and Orderable Information

The following pages include mechanical, packaging, and orderable information. This information is the most current data available for the designated devices. This data is subject to change without notice and revision of this document. For browser-based versions of this data sheet, refer to the left-hand navigation.

6.1 Tape and Reel Information

Device	Package Type	Package Drawing	Pins	SPQ	Reel Diameter (mm)	Reel Width W1 (mm)	A0 (mm)	B0 (mm)	K0 (mm)	P1 (mm)	W (mm)	Pin1 Quadrant
TPS53685RSBR	WQFN	RSB	40	3000	330.0	12.4	5.25	5.25	1.1	8.0	12.0	Q2

TAPE AND REEL BOX DIMENSIONS

PACKAGE OUTLINE

WQFN - 0.8 mm max height

PLASTIC QUAD FLATPACK - NO LEAD

NOTES:

1. All linear dimensions are in millimeters. Any dimensions in parenthesis are for reference only. Dimensioning and tolerancing per ASME Y14.5M.
2. This drawing is subject to change without notice.
3. The package thermal pad must be soldered to the printed circuit board for thermal and mechanical performance.

6. Laser cutting apertures with trapezoidal walls and rounded corners may offer better paste release. IPC-7525 may have alternate design recommendations.

PACKAGING INFORMATION

Orderable part number	Status (1)	Material type (2)	Package Pins	Package qty Carrier	RoHS (3)	Lead finish/ Ball material (4)	MSL rating/ Peak reflow (5)	Op temp (°C)	Part marking (6)
TPS53685RSBR	Active	Production	WQFN (RSB) 40	3000 LARGE T&R	Yes	NIPDAUAG	Level-2-260C-1 YEAR	-40 to 105	TPS 53685
TPS53685RSBR.A	Active	Production	WQFN (RSB) 40	3000 LARGE T&R	Yes	NIPDAUAG	Level-2-260C-1 YEAR	-40 to 105	TPS 53685

⁽¹⁾ **Status:** For more details on status, see our [product life cycle](#).

⁽²⁾ **Material type:** When designated, preproduction parts are prototypes/experimental devices, and are not yet approved or released for full production. Testing and final process, including without limitation quality assurance, reliability performance testing, and/or process qualification, may not yet be complete, and this item is subject to further changes or possible discontinuation. If available for ordering, purchases will be subject to an additional waiver at checkout, and are intended for early internal evaluation purposes only. These items are sold without warranties of any kind.

⁽³⁾ **RoHS values:** Yes, No, RoHS Exempt. See the [TI RoHS Statement](#) for additional information and value definition.

⁽⁴⁾ **Lead finish/Ball material:** Parts may have multiple material finish options. Finish options are separated by a vertical ruled line. Lead finish/Ball material values may wrap to two lines if the finish value exceeds the maximum column width.

⁽⁵⁾ **MSL rating/Peak reflow:** The moisture sensitivity level ratings and peak solder (reflow) temperatures. In the event that a part has multiple moisture sensitivity ratings, only the lowest level per JEDEC standards is shown. Refer to the shipping label for the actual reflow temperature that will be used to mount the part to the printed circuit board.

⁽⁶⁾ **Part marking:** There may be an additional marking, which relates to the logo, the lot trace code information, or the environmental category of the part.

Multiple part markings will be inside parentheses. Only one part marking contained in parentheses and separated by a "~" will appear on a part. If a line is indented then it is a continuation of the previous line and the two combined represent the entire part marking for that device.

Important Information and Disclaimer: The information provided on this page represents TI's knowledge and belief as of the date that it is provided.
