

'C6000: The World's Highest Performance DSP Platform

Henry Wiechman

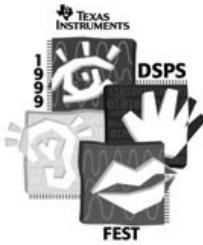

'C6000 Strategic Marketing Manager

xx/xx/99

1

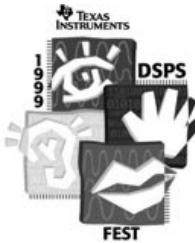

THE WORLD LEADER IN DSP AND ANALOG

 TEXAS
INSTRUMENTS

Today's Agenda

- ◆ Market Acceptance continues to grow
- ◆ Broad Range of Code Compatible Options
 - Floating point adds low-cost options
 - Fixed point adds peripheral options
 - Power and package size reductions enhance offering
- ◆ World's Best Development Environment
 - Compiler enhancements reduce code size
 - EVM bundles ease development
 - New DSKs offer low-cost evaluation platforms
- ◆ Technology Demonstration Kits highlight performance
- ◆ Advanced Data Converter/Power Management Solutions complete your design

Market Shows Strong Acceptance of TI's TMS320C6000 DSP

- ◆ Over \$1B of design ins (business over the next 3-5 years)
- ◆ Thousands of developers to date as measured by tool shipments
- ◆ Hundreds of third party products
- ◆ The industry's only code and pin compatible fixed and floating point DSPs offer broad price/performance options
 - ◆ \$25 to 2400 MIPS fixed-point
 - ◆ \$20 to 1 GFLOPS floating-point
 - ◆ Roadmap to over 5000 MIPS/3 GFLOPS
- ◆ Industry's best development environment
 - ◆ Code Composer Studio reduces development time
 - ◆ C compiler offers up to 5x the cycle count efficiency of competing solutions

THE WORLD LEADER IN DSP AND ANALOG

 TEXAS
INSTRUMENTS

'C6000 High Speed/High Performance Applications

Applications demanding fixed- or floating-point raw performance

Wireless

- Base station transceiver
- Smart antenna
- WLL base station
- Wireless LAN

Datacom/Network

- xDSL modem
- T1 RAS modem
- Encryption
- Packet processing
- Enterprise PBX

Telecom/Wireline

- Voice mail
- Speech recognition
- Text-to-speech
- Enterprise voice gateway
- Multichannel line echo cancellation

Graphics/Imaging

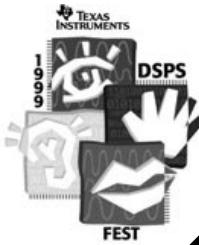

- Image transmission
- Pattern recognition
- Image enhancement
- Security identification
- Video conferencing
- Radar/Sonar

Medical

- Ultrasound equipment
- CAT scan
- MRI
- 3-D x-ray

Industrial

- Robotics
- Security access
- Visual inspection
- Process/distributive control

TI Building Floating Point Momentum

- ◆ 1GFLOPS 'C6701 now in volume production
 - Hundreds of 'C67x EVM bundles shipped
- ◆ C6711 simulator now available
 - Samples of 'C6711 scheduled for December '99
 - DSK planned for 1Q00
- ◆ Additional derivatives under development

'C62x Offers Broad Range of High Performance Options

- ◆ 'C6201 in volume production today
 - Thousands of 'C62x EVM bundles shipped
- ◆ 'C6202 now sampling in 27 and 18mm packages
 - Volume production (TMS) scheduled for 9/30
 - 0.15um version scheduled to sample 2Q00
- ◆ 'C6211 now sampling
 - 'C6211 DSK production scheduled for September
- ◆ 'C6203 scheduled to sample December '99
 - World's fastest and most integrated DSP
- ◆ New derivatives in 4Q99 expand peripheral options

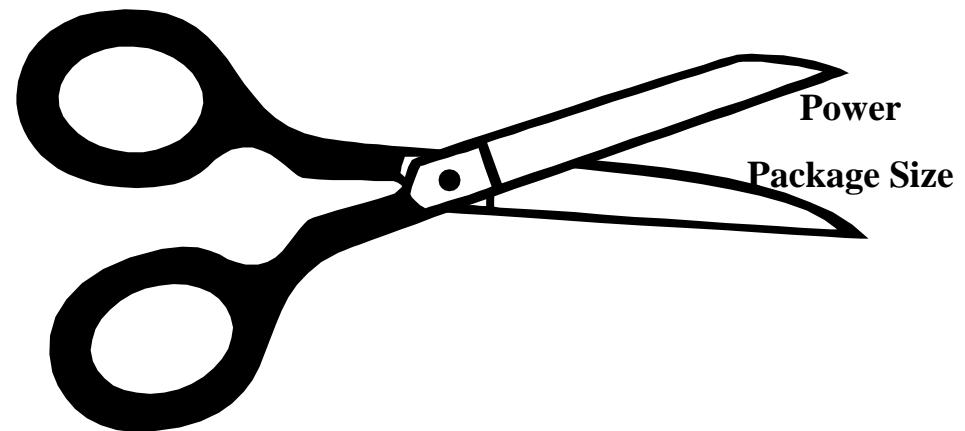

xx/xx/99

6

Performance Leader Slashes Power Consumption and Package Size

- ◆ Compared to the original 'C6201, the newest 'C6000 devices feature:
 - 80% Lower Power Consumption
 - 75% Smaller Package

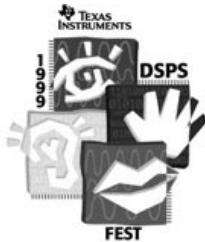

'C6000 Full Chip Power Drops To 1W

	CPU Power (mA/MIPS)	Total Power (W)
'C6201B	0.15	1.7
'C6203	0.09	1.1
'C6701	0.22	1.8

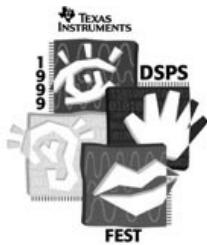

- ◆ 'C62x CPU consumes only 0.09mA/MIPS at 1.5V
- ◆ Full chip dissipation down to ~1W at 1.5V
 - 'C6203 samples in 4Q99
 - Sub 1W devices are coming
 - Continued design/process improvements
 - New voltage levels

Code Composer Studio

- ◆ **Integrated Development Environment (IDE)**
 - Integrates features for every stage of the development cycle
- ◆ **DSP/BIOS Enables Real-time Analysis**
 - View data without halting the processor
 - Immediately identify problems
- ◆ **Advanced Data Visualization**
 - View DSP target signals & data as images
 - Gain an intuitive understanding of the system and its characteristics
- ◆ **Integrate Third-Party Tools**
 - Extend the environment to match growing needs

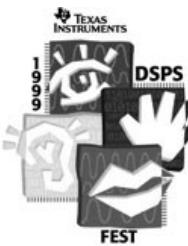

C6000 EVMs Speed Development

'C62x Fixed Point EVM
EVM bundle price \$1995
EVM price \$995

'C67x Floating Point EVM
EVM bundle price \$2495
EVM price \$1495

'C62x Multi-Channel EVM
EVM bundle price \$3995

'C6211-DSP Starter Kit (DSK) - \$195

◆ Hardware

- 150 MHz 'C6211 DSP based board ('C6711 version planned for 1Q00)
- AD535- 16-bit A/D Converter
- 4 Mbytes SDRAM
- 128 Kbytes Flash ROM
- Power Supply Universal (CE Compliant)
- Parallel Port Cable

◆ Software

- Code Generation Tools
 - ◆ C Compiler, Assembler & Linker
- Code Composer Debugger
- Example Programs & S/W Utilities

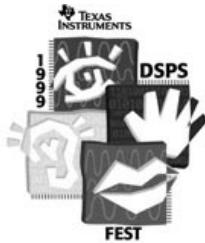

◆ On-Line Documentation

(shrink wrapped with CD ROM)

- License Agreement
- Installation instructions

xx/xx/99

'C6000 Technology Demonstration Kits (TDKs)

- ◆ Primary purpose is to demonstrate C6000 capabilities in various applications
- ◆ Demonstration algorithms not fully optimized to showcase fast-time-to-market with minimal effort
- ◆ Application notes discuss relevant code development issues
- ◆ Object code versions available on the internet for TI hardware platforms
- ◆ Third party involvement encouraged

'C6000 Means Code Compatible Performance Leadership Today and in the Future

- ◆ World's broadest offering of high performance DSPs
 - Code compatible fixed and floating point devices available today in volume production
 - Six announced devices with more to come
 - New devices consume 80% less power in a 75% smaller package
- ◆ World's most complete DSP development environment
 - Code Composer Studio
 - Industry's most efficient C compiler
- ◆ Complete hardware/software solutions available today
 - Numerous third party products
 - TI TDKs
 - TI high speed data converter and sophisticated power management products
