CD4027B CMOS Dual J-K Flip Flop

1 Features

- Set-reset capability
- Static flip-flop operation – retains state indefinitely with clock level either *high* or *low*
- Medium speed operation – 16 MHz (typical) clock toggle rate at 10 V
- Standardized symmetrical output characteristics
- 100% tested for quiescent current at 20 V
- Maximum input current of 1 µA at 18 V over full package-temperature range; 100 nA at 18 V and 25°C
- Noise margin (over full package-temperature range):
  - 1 V at V_{DD} = 5 V
  - 2 V at V_{DD} = 10 V
  - 2.5 V at V_{DD} = 15 V
- 5 V, 10 V, and 15 V parametric ratings
- Meets all requirements of JEDEC tentative standard No. 138, *standard specifications for description of 'B' series CMOS devices*

2 Applications

- Registers, counters, control circuits

3 Description

CD4027B is a single monolithic chip integrated circuit containing two identical complementary-symmetry J-K flip flops. Each flip-flop has provisions for individual J, K, Set, Reset, and Clock input signals. Buffered Q and $\overline{Q}$ signals are provided as outputs. This input-output arrangement provides for compatibile operation with the RCA-CD4013B dual D-type flip-flop.

The CD4027B is useful in performing control, register, and toggle functions. Logic levels present at the J and K inputs along with internal self-steering control the state of each flip-flop; changes in the flip-flop state are synchronous with the postitive-going transition of the clock pulse. Set and reset functions are independent of the clock and are initiated when a high level signal is present at either the Set or Reset input.

The CD4027B types are supplied in 16-lead hermetic dual-in-line ceramic packages (F3A suffix), 16-lead dual-in-line plastic packages (E suffice), 16-lead small-outline packages (M, M96, MT, and NSR suffixes), and 16-lead thin shrink small-outline packages (PW and PWR suffixes).

Table 5-1. Pin Functions

PIN		I/O	DESCRIPTION
NAME	NO.		
CLOCK1	13	I	Clock input for channel 1
CLOCK2	3	I	Clock input for channel 2
J1	10	I	J input for channel 1
J2	6	I	J input for channel 2
K1	11	I	K input for channel 1
K2	5	I	K input for channel 2
Q1	15	O	Q output for channel 1
$\overline{Q1}$	14	O	Inverted Q output for channel 1
Q2	1	O	Q output for channel 2
$\overline{Q2}$	2	O	Inverted Q output for channel 2
RESET1	12	I	Reset input for channel 1
RESET2	4	I	Reset input for channel 2
SET1	9	I	Set input for channel 1
SET2	7	I	Set input for channel 2
V_{DD}	16	—	Supply
V_{SS}	8	—	Ground

6 Specifications

6.1 Absolute Maximum Ratings

			MIN	MAX	UNIT
V_{DD}	DC Supply Voltage Range	Voltages referenced to V_{SS} Terminal	–0.5	20	V
All Inputs	Input Voltage Range		–0.5	V_{DD} + 0.5	V
Any One Input	DC Input Current			±10	mA
P_D	Power Dissipation per Package	For T_A = –55°C to + 100°C		500	mW
		For T_A = +100°C to +125°C	12mW/°C	200	mW
	Device Dissipation per Output Transistor	For T_A = Full package-temperature range (all package types)		100	mW
T_A	Operating- Temperature Range		–55	125	°C
T_{stg}	Storage temperature		–65	150	°C
	Lead Temperatur (During Soldering)	At distance 1/16 ± 1/32 inch (1.59 ± 0.79mm) from case for 10s max		265	°C

6.2 Recommended Operating Conditions

at T_A = 25°C, except as noted. For maximum reliability, nominal operating conditions should be selected so that operation is always within the following ranges:

CHARACTERISTIC			V_{DD} (V)	LIMITS		UNIT
				ALL PACKAGES		
				MIN	MAX	
	Supply-Voltage Range	For T_A = Full Package Temperature Range		3	18	V
t_S	Data Setup Time		5	200		ns
			10	75		
			15	50		
t_W	Clock Pulse Width		5	140		ns
			10	60		
			15	40		
f_{CL}	Clock Input Frequency (Toggle Mode)		5		3.5	MHz
			10	dc	8	
			15		12	
t_rCL, t_fCL(1)	Clock Rise or Fall Time		5		45	µs
			10		5	
			15		2	
t_W	Set or Reset Pulse Width		5	180		ns
			10	80		
			15	50		

(1) If more than one unite is cascaded in a parallel clocked operation, t_rCL should be made less than or equal to the sum of the fixed propagation delay time at 15 pF and the transitiopn time of the output driving stage for the estimated capacitive load.

6.3 Static Electrical Characteristics

CHARACTERISTIC	TEST CONDITIONS			LIMITS AT INDICATED TEMPERATURES (°C)							UNIT
	V_O (V)	V_{IN} (V)	V_{DD} (V)	–55	–40	+85	+125	+25

9 Device and Documentation Support

TI offers an extensive line of development tools. Tools and software to evaluate the performance of the device, generate code, and develop solutions are listed below.

9.1 Receiving Notification of Documentation Updates

To receive notification of documentation updates, navigate to the device product folder on ti.com. Click on *Subscribe to updates* to register and receive a weekly digest of any product information that has changed. For change details, review the revision history included in any revised document.

9.2 Support Resources

TI E2E™ support forums are an engineer's go-to source for fast, verified answers and design help — straight from the experts. Search existing answers or ask your own question to get the quick design help you need.

Linked content is provided "AS IS" by the respective contributors. They do not constitute TI specifications and do not necessarily reflect TI's views; see TI's Terms of Use.

9.3 Trademarks

TI E2E™ is a trademark of Texas Instruments.
All trademarks are the property of their respective owners.

9.4 Electrostatic Discharge Caution

This integrated circuit can be damaged by ESD. Texas Instruments recommends that all integrated circuits be handled with appropriate precautions. Failure to observe proper handling and installation procedures can cause damage.

ESD damage can range from subtle performance degradation to complete device failure. Precision integrated circuits may be more susceptible to damage because very small parametric changes could cause the device not to meet its published specifications.

9.5 Glossary

TI Glossary	This glossary lists and explains terms, acronyms, and definitions.

10 Mechanical, Packaging, and Orderable Information

The following pages include mechanical, packaging, and orderable information. This information is the most current data available for the designated devices. This data is subject to change without notice and revision of this document. For browser-based versions of this data sheet, refer to the left-hand navigation.

(1) **Status:** For more details on status, see our product life cycle.

(2) **Material type:** When designated, preproduction parts are prototypes/experimental devices, and are not yet approved or released for full production. Testing and final process, including without limitation quality assurance, reliability performance testing, and/or process qualification, may not yet be complete, and this item is subject to further changes or possible discontinuation. If available for ordering, purchases will be subject to an additional waiver at checkout, and are intended for early internal evaluation purposes only. These items are sold without warranties of any kind.

(3) **RoHS values:** Yes, No, RoHS Exempt. See the TI RoHS Statement for additional information and value definition.

(4) Lead finish/Ball material: Parts may have multiple material finish options. Finish options are separated by a vertical ruled line. Lead finish/Ball material values may wrap to two lines if the finish value exceeds the maximum column width.

(5) MSL rating/Peak reflow: The moisture sensitivity level ratings and peak solder (reflow) temperatures. In the event that a part has multiple moisture sensitivity ratings, only the lowest level per JEDEC standards is shown. Refer to the shipping label for the actual reflow temperature that will be used to mount the part to the printed circuit board.

(6) Part marking: There may be an additional marking, which relates to the logo, the lot trace code information, or the environmental category of the part.

Multiple part markings will be inside parentheses. Only one part marking contained in parentheses and separated by a "~" will appear on a part. If a line is indented then it is a continuation of the previous line and the two combined represent the entire part marking for that device.

C. Falls within JEDEC MS–001, except 18 and 20 pin minimum body length (Dim A).
D. The 20 pin end lead shoulder width is a vendor option, either half or full width.

IMPORTANT NOTICE AND DISCLAIMER

TI PROVIDES TECHNICAL AND RELIABILITY DATA (INCLUDING DATASHEETS), DESIGN RESOURCES (INCLUDING REFERENCE DESIGNS), APPLICATION OR OTHER DESIGN ADVICE, WEB TOOLS, SAFETY INFORMATION, AND OTHER RESOURCES “AS IS” AND WITH ALL FAULTS, AND DISCLAIMS ALL WARRANTIES, EXPRESS AND IMPLIED, INCLUDING WITHOUT LIMITATION ANY IMPLIED WARRANTIES OF MERCHANTABILITY, FITNESS FOR A PARTICULAR PURPOSE OR NON-INFRINGEMENT OF THIRD PARTY INTELLECTUAL PROPERTY RIGHTS.

These resources are intended for skilled developers designing with TI products. You are solely responsible for (1) selecting the appropriate TI products for your application, (2) designing, validating and testing your application, and (3) ensuring your application meets applicable standards, and any other safety, security, regulatory or other requirements.

These resources are subject to change without notice. TI grants you permission to use these resources only for development of an application that uses the TI products described in the resource. Other reproduction and display of these resources is prohibited. No license is granted to any other TI intellectual property right or to any third party intellectual property right. TI disclaims responsibility for, and you fully indemnify TI and its representatives against any claims, damages, costs, losses, and liabilities arising out of your use of these resources.

TI’s products are provided subject to TI’s Terms of Sale, TI’s General Quality Guidelines, or other applicable terms available either on ti.com or provided in conjunction with such TI products. TI’s provision of these resources does not expand or otherwise alter TI’s applicable warranties or warranty disclaimers for TI products. Unless TI explicitly designates a product as custom or customer-specified, TI products are standard, catalog, general purpose devices.

TI objects to and rejects any additional or different terms you may propose.
