

TLE207x, TLE207xA Excilibur Low-Noise High-Speed Operational Amplifiers

1 Features

- Low offset voltage: $\pm 300\mu\text{V}$ Typ (TLE2071A)
- Low noise: $17\text{nV}/\sqrt{\text{Hz}}$ at 1kHz
- Low bias current: $\pm 15\text{pA}$
- Wider Supply Rails Increase Dynamic Signal Range to $\pm 19\text{V}$
- Amplifier operates with differential inputs up to supply rail
- Wide bandwidth: 10MHz GBW, unity-gain stable
- Provides Maximum Noise Floor $17\text{nV}/\sqrt{\text{Hz}}$

2 Applications

- AC charging (pile) station
- AC drive power stage module
- Electricity meter
- Digital multimeter (DMM)
- Flight control unit
- Oscilloscopes & digitizers

3 Description

The TLE207x and TLE207xA family is a family of high voltage amplifiers which offer great DC precision and AC performance. This includes low noise floor and high slew rate, making TLE207x and TLE207xA family a flexible, high-performance amplifier. TLE207x and TLE207xA devices are great option for the following applications:

1. High speed data acquisition
2. Low-power audio processing
3. Portable and battery-powered devices

TLE207x and TLE207xA is available in standard packages PDIP and SOIC. The TLE207xM and TLE207xAM devices use the original design with JFET-input transistors and On-chip Zener trimming of offset voltage. The TLE207xM, TLE207xAM are available in CDIP, LCCC, and CFP For more information on packaging, see [Section 10](#)

Device Information

PART NUMBER ⁽¹⁾	CHANNEL COUNT	PACKAGE	PACKAGE SIZE ⁽²⁾
TLE2071	Single	D (SOIC, 8)	4.9mm × 6mm
		FK (LCCC, 20)	8.89mm × 8.89mm
		JG (CDIP, 8)	9.58mm × 7.62mm
		P (PDIP, 8)	9.59mm × 7.94mm
		U (CDP, 10)	6.86mm × 22.4mm
TLE2072	Dual	D (SOIC, 8)	4.9mm × 6mm
		FK (LCCC, 20)	8.89mm × 8.89mm
		JG (CDIP, 8)	9.58mm × 7.62mm
		P (PDIP, 8)	9.59mm × 7.94mm
		U (CDP, 10)	6.86mm × 22.4mm
TLE2074	Quad	DW (SOIC, 14)	10.3mm × 10.3mm
		FK (LCCC, 20)	8.89mm × 8.89mm
		J (CDIP, 14)	19.6mm × 7.9mm
		N (PDIP, 14)	19.3mm × 7.94mm

(1) For all available packages, see the orderable addendum at the end of the data sheet.

(2) The package size (length × width) is a nominal value and includes pins, where applicable.

$$\frac{V_{OUT}}{V_{IN}} = \left(1 + \frac{R_F}{R_G}\right) \left(\frac{1}{1 + sR_I C_1}\right)$$

TLE207X and TLE207XA in a Single-Pole, Low-Pass Filter

6 Specifications

6.1 Absolute Maximum Ratings

over operating free-air temperature range (unless otherwise noted)⁽¹⁾

		MIN	MAX	UNIT
V _{CC+}	Supply voltage V _S = (V+) – (V–)	0	38	V
V _{ID}	Differential input voltage range ⁽²⁾		V _S + 0.2	
V _I	Common-Mode Voltage Input Range	(V–) – 0.5V, (V+) + 0.5V		
I _I	Input current (each input)		± 1	mA
I _O	Output current (each output)		Continuous	mA
	Duration of short-circuit current at (or below) 25°C ⁽³⁾		Unlimited	
θ _{JA}	Package thermal impedance ^{(4) (5)}	D package	97.1	°C/W
		DW package	57.3	
		N package	79.7	
		P package	84.6	
θ _{JC}	Package thermal impedance ^{(4) (5)}	FK package	5.6	°C/W
		J package	15.1	
		JG package	14.5	
		U package	14.7	
		W package	10	
T _A	Operating free-air temperature range	C suffix	0	°C/W
		I suffix	–40	
		M suffix	–55	
T _{stg}	Storage temperature	–65	150	°C
	Case temperature for 60 seconds	FK package	260	°C
	Lead temperature 1,6 mm (1/16 inch) from case for 10 seconds:	DW or N package	260	°C
	Lead temperature 1,6 mm (1/16 inch) from case for 60 seconds:	J, JG, U, or W package	300	°C

- (1) Stresses beyond those listed under *absolute maximum ratings* can cause permanent damage to the device. These are stress ratings only and functional operation of the device at these or any other conditions beyond those indicated under *recommended operating conditions* is not implied. Exposure to absolute-maximum-rated conditions for extended periods can affect device reliability.
- (2) Differential voltages are at the non-inverting input with respect to the inverting input.
- (3) The output can be shorted to either supply. Temperatures and/or supply voltages must be limited to confirm that the maximum dissipation rate is not exceeded.
- (4) Maximum power dissipation is a function of T_{J(max)}, θ_{JA}, and T_A. The maximum allowable power dissipation at any allow able ambient temperature is P_D = (T_{J(max)} – T_A)/θ_{JA}. Operating at the absolute maximum T_J of 150°C can affect reliability.
- (5) The package thermal impedance is calculated in accordance with JEDEC 51-7 (plastic) or MIL-STD-883 Method 1012 (ceramic).

6.2 Recommended Operating Conditions

over operating free-air temperature range (unless otherwise noted)

			C SUFFIX		I SUFFIX		M SUFFIX		UNIT
			MIN	MAX	MIN	MAX	MIN	MAX	
$V_{CC\pm}$	Supply voltage		± 2.25	± 19	± 2.25	± 19	± 2.25	± 19	V

7 Application and Implementation

Note

Information in the following applications sections is not part of the TI component specification, and TI does not warrant its accuracy or completeness. TI's customers are responsible for determining suitability of components for their purposes, as well as validating and testing their design implementation to confirm system functionality.

7.1 Application Information

7.1.1 Input Characteristics

The TLE207x, TLE207xA, and TLE207xB are specified with a minimum and a maximum input voltage that if exceeded at either input can cause the device to malfunction. Because of the extremely high input impedance and resulting low bias current requirements, the TLE207x, TLE207xA, and TLE207xB are well suited for low-level signal processing; however, leakage currents on printed-circuit boards and sockets can easily exceed bias current requirements and cause degradation in system performance. Including guard rings around inputs is considered to be good practice (see Figure 7-1). These guards can be driven from a low-impedance source at the same voltage level as the common-mode input.

Figure 7-1. Use of Guard Rings

8 Device and Documentation Support

TI offers an extensive line of development tools. Tools and software to evaluate the performance of the device, generate code, and develop solutions are listed below.

8.1 Receiving Notification of Documentation Updates

To receive notification of documentation updates, navigate to the device product folder on ti.com. Click on *Notifications* to register and receive a weekly digest of any product information that has changed. For change details, review the revision history included in any revised document.

8.2 Support Resources

TI E2E™ [support forums](#) are an engineer's go-to source for fast, verified answers and design help — straight from the experts. Search existing answers or ask your own question to get the quick design help you need.

Linked content is provided "AS IS" by the respective contributors. They do not constitute TI specifications and do not necessarily reflect TI's views; see TI's [Terms of Use](#).

8.3 Trademarks

TI E2E™ is a trademark of Texas Instruments.
 All trademarks are the property of their respective owners.

8.4 Electrostatic Discharge Caution

This integrated circuit can be damaged by ESD. Texas Instruments recommends that all integrated circuits be handled with appropriate precautions. Failure to observe proper handling and installation procedures can cause damage.

ESD damage can range from subtle performance degradation to complete device failure. Precision integrated circuits may be more susceptible to damage because very small parametric changes could cause the device not to meet its published specifications.

8.5 Glossary

[TI Glossary](#) This glossary lists and explains terms, acronyms, and definitions.

9 Revision History

NOTE: Page numbers for previous revisions may differ from page numbers in the current version.

Changes from Revision C (February 1997) to Revision D (January 2025)	Page
• Deleted "On chip offset voltage trimming for improved DC performance".....	1
• Deleted "Direct upgrades to TL05x, TL07x, and TL08x Operational Amplifiers".....	1
• Changed Low bias current from $\pm 1\text{pA}$ to $\pm 15\text{pA}$	1
• Removed Total current in and out of VCC.....	7
• Changed Supply voltage values.....	7
• Changed Common mode input voltage input range.....	7
• Changed minimum from -19V to 0V	7
• Changed Maximum Positive peak output voltage swing typical value from 4.1V to 4.985V	8
• Changed Maximum Positive peak output voltage swing typical value from 3.9V to 4.925V	8
• Changed Maximum Positive peak output voltage swing typical value from 2.3V to 4.5V	8
• Deleted Full range values in I_{OS} CMRR.....	8
• Changed Maximum negative peak output voltage swing typical value from -4.2V to -4.985V	8
• Changed Maximum negative peak output voltage swing typical value from -4.1V to -4.925V	8
• Changed Maximum negative peak output voltage swing typical value from -2.4V to -4.5V	8
• Deleted Full range values in A_{VD}	8
• Changed Input resistance separated for differential and common mode, values to $100\text{M}\Omega$ and $6\text{T}\Omega$	8
• Changed Input capacitance from 11pF to 1pF , 2.9pF to 9pF	8
• Changed CMRR typical value from 89dB to 85dB	8
• Changed Supply current values from 1.6mA to 2.48mA and 2.2mA to 2.92mA	8

• Changed Short circuit output current values from -35mA to $\pm 65\text{mA}$	8
• Changed Slew rate typical values from $35\text{V}/\mu\text{s}$ to $32\text{V}/\mu\text{s}$ in EC table of specifications.	9
• Merged positive and negative slew rates in EC table of specifications.	9
• Deleted maximum value for Equivalent input noise voltage and at 10Khz typical value updated from $12\text{nV}/\sqrt{\text{Hz}}$ to $4.4\text{nV}/\sqrt{\text{Hz}}$ in EC table of specifications.....	9
• Changed Peak to peak equivalent input noise voltage, from $0.6\mu\text{V}_{\text{PP}}$ to $2.77\mu\text{V}_{\text{PP}}$ in EC table of specifications.....	9
• Changed Equivalent input noise current from $2.8\text{fA}/\sqrt{\text{Hz}}$ to $60\text{fA}/\sqrt{\text{Hz}}$ at 1KHz in EC table of specifications.....	9
• Changed THD+N value from 0.013% to 0.0032% and 90dB in EC table of specifications.....	9
• Changed Unity gain bandwidth values from 9.4MHz to 10.6MHz in EC table of specifications.....	9
• Changed Maximum output swing bandwidth from 2.8Mhz to 300KHz in EC table of specifications.....	9
• Changed $V_{\text{OM+}}$ values from 14.1V to 14.985V at 200 μA from 13.9V to 14.925V at 2mA, from 12.3V to 14.5V at 20mA.....	9
• Changed $V_{\text{OM-}}$ valued from -14.2V to -14.985V at 200 μA from -14V to -14.925V at 2mA, from -12.4V to -14.5V at 20mA.....	9
• Deleted Full range for CMRR.....	9
• Changed Input capacitance Differential mode from 2.5pF to 9pF.....	9
• Changed Input capacitance Common mode from 7.5pF to 1pF.....	9
• Changed Supply current typical from 1.7mA to 2.48mA.....	9
• Changed Supply current maximum from 2.2mA to 2.92mA.....	9
• Changed Short-circuit output current typical value to $\pm 65\text{mA}$	9
• Updated Phase Margin vs Load Capacitance plot.....	44
• Updated Non-inverting Large-Signal Pulse Response plot.....	44
• Updated Small-Signal Pulse Response plot.....	44
• Updated Open-Loop Output Impedance vs Frequency plot.....	44
• Removed several plots from <i>Typical Characteristics</i> section.....	44

10 Mechanical, Packaging, and Orderable Information

The following pages include mechanical, packaging, and orderable information. This information is the most current data available for the designated devices. This data is subject to change without notice and revision of this document. For browser-based versions of this data sheet, refer to the left-hand navigation.

PACKAGING INFORMATION

Orderable part number	Status (1)	Material type (2)	Package Pins	Package qty Carrier	RoHS (3)	Lead finish/ Ball material (4)	MSL rating/ Peak reflow (5)	Op temp (°C)	Part marking (6)

⁽¹⁾ **Status:** For more details on status, see our [product life cycle](#).

⁽²⁾ **Material type:** When designated, preproduction parts are prototypes/experimental devices, and are not yet approved or released for full production. Testing and final process, including without limitation quality assurance, reliability performance testing, and/or process qualification, may not yet be complete, and this item is subject to further changes or possible discontinuation. If available for ordering, purchases will be subject to an additional waiver at checkout, and are intended for early internal evaluation purposes only. These items are sold without warranties of any kind.

⁽³⁾ **RoHS values:** Yes, No, RoHS Exempt. See the [TI RoHS Statement](#) for additional information and value definition.

⁽⁴⁾ **Lead finish/Ball material:** Parts may have multiple material finish options. Finish options are separated by a vertical ruled line. Lead finish/Ball material values may wrap to two lines if the finish value exceeds the maximum column width.

⁽⁵⁾ **MSL rating/Peak reflow:** The moisture sensitivity level ratings and peak solder (reflow) temperatures. In the event that a part has multiple moisture sensitivity ratings, only the lowest level per JEDEC standards is shown. Refer to the shipping label for the actual reflow temperature that will be used to mount the part to the printed circuit board.

⁽⁶⁾ **Part marking:** There may be an additional marking, which relates to the logo, the lot trace code information, or the environmental category of the part.

Multiple part markings will be inside parentheses. Only one part marking contained in parentheses and separated by a "~" will appear on a part. If a line is indented then it is a continuation of the previous line and the two combined represent the entire part marking for that device.

Important Information and Disclaimer: The information provided on this page represents TI's knowledge and belief as of the date that it is provided. TI bases its knowledge and belief on information provided by third parties, and makes no representation or warranty as to the accuracy of such information. Efforts are underway to better integrate information from third parties. TI has taken and continues to take reasonable steps to provide representative and accurate information but may not have conducted destructive testing or chemical analysis on incoming materials and chemicals. TI and TI suppliers consider certain information to be proprietary, and thus CAS numbers and other limited information may not be available for release.

In no event shall TI's liability arising out of such information exceed the total purchase price of the TI part(s) at issue in this document sold by TI to Customer on an annual basis.

PACKAGE OUTLINE

JG0008A

CDIP - 5.08 mm max height

CERAMIC DUAL IN-LINE PACKAGE

4230036/A 09/2023

NOTES:

1. All linear dimensions are in millimeters. Any dimensions in parenthesis are for reference only. Dimensioning and tolerancing per ASME Y14.5M.
2. This drawing is subject to change without notice.
3. This package can be hermetically sealed with a ceramic lid using glass frit.
4. Index point is provided on cap for terminal identification.
5. Falls within MIL STD 1835 GDIP1-T8

PACKAGE OUTLINE

SOIC - 2.65 mm max height

SOIC

4220721/A 07/2016

NOTES:

1. All linear dimensions are in millimeters. Dimensions in parenthesis are for reference only. Dimensioning and tolerancing per ASME Y14.5M.
2. This drawing is subject to change without notice.
3. This dimension does not include mold flash, protrusions, or gate burrs. Mold flash, protrusions, or gate burrs shall not exceed 0.15 mm, per side.
4. This dimension does not include interlead flash. Interlead flash shall not exceed 0.25 mm, per side.
5. Reference JEDEC registration MS-013.

SOLDER PASTE EXAMPLE
BASED ON 0.125 mm THICK STENCIL
SCALE:7X

4220721/A 07/2016

NOTES: (continued)

8. Laser cutting apertures with trapezoidal walls and rounded corners may offer better paste release. IPC-7525 may have alternate design recommendations.
9. Board assembly site may have different recommendations for stencil design.

P (R-PDIP-T8)

PLASTIC DUAL-IN-LINE PACKAGE

4040082/E 04/2010

- NOTES:
- A. All linear dimensions are in inches (millimeters).
 - B. This drawing is subject to change without notice.
 - C. Falls within JEDEC MS-001 variation BA.

N (R-PDIP-T**)

PLASTIC DUAL-IN-LINE PACKAGE

16 PINS SHOWN

- NOTES:
- A. All linear dimensions are in inches (millimeters).
 - B. This drawing is subject to change without notice.
 - C Falls within JEDEC MS-001, except 18 and 20 pin minimum body length (Dim A).
 - D The 20 pin end lead shoulder width is a vendor option, either half or full width.
